Dynamics of Social Class Craig B Howley, Aimee Howley, Jerry D Johnson, 2014-03-01 Half the world's population lives in rural places but education scholars and policy makers worldwide give little attention to rural of education Indeed most national systems including in the developed world treat their educational systems as institutions to modernize the global economy The authors in this volume have different concerns They are rural education scholars from Australia Canada the United States and Kyrgyzstan and here their focus is the dynamics of social class in particular rural schools but also in rural schooling as a local manifestation of a national and the global system For the most part the volume comprises relevant empirical reports but none neglects theory and some privilege theory and interpretation First and last chapters introduce the texts and synthesize their joint and separate meanings What are the

implications of place for social class How do class dynamics manifest differently in more and less racially homogeneous rural communities How does place affect class and how might class affect place How does schooling in rural communities reproduce or interrupt social class mobility across generations The chapters engage such questions more completely than other volumes in rural education not as a final word or interm summary but as an opening to an important line of inquiry thus far largely neglected in rural education scholarship **Psychotherapy, American Culture, and Social Policy** E.

Throop, 2009-01-05 A lively indictment of American culture's pervasive use of the psychotherapeutic metaphor to explain behaviours a habit that has crossed the Atlantic in recent years arguing that psychotherapy and excessive individualism has only ensured the continuance of social problems **Innovations in Educational Ethnography** George Spindler, Lorie Hammond, 2012-10-12 This volume focuses on and exemplifies how ethnography a research tool devoted to looking at human interaction as a cultural process rather than individual psychology can shed light on educational processes framed by the complex internationalized societies in which we live today Part I offers theoretical chapters about ethnography and examples of innovative ethnography from particular perspectives In Part II the emphasis is on the application of ethnographic approaches to educational settings Each contribution not only takes the reader on a thoughtful and enlightening journey but raises issues that are important to both educators and ethnographers including the relationship of researcher to subject the meaning of participant in participant observation and ways to give voice to disenfranchised players and on the complex ways in which all parties experience identities such as race in the modern world **Innovations in Educational Ethnography Theory Methods and Results** is a product of both continuity and change It presents current writings from mentors in the field of ethnography and education as well as the work of their students and of educators engaged in cultural studies of their work In many ways it provides fresh new vistas on the old questions that have always guided ethnographic research and can be used as a survey both of what ethnography has been and what it is becoming This book is the work of many hands and provides excellent examples of trends in both basic and applied ethnography of education These two kinds of work augment and reinforce each other and also represent important current research directions in depth reflection on the process of ethnography itself and an application of its insights to teaching and learning in schools universities and communities No one philosophy guides the contributions to this volume nor were they chosen as exemplary of a particular approach yet foundational understandings and principles of ethnography shine through the work in both predictable and unexpected ways

Theorizing Social Class and Education Diane Reay, Carol Vincent, 2016-04-08 *Theorizing Social Class and Education* presents a selection of writing on class analysis within sociology of education as it has evolved over the last decade both in

the UK and internationally Moving from a narrow focus on class position and categorisation to a much broader view on behaviours attitudes identities and practices the contributors explore and theorize the ways in which particular individuals develop their perspectives and understandings of the social world and the role education plays in shaping these This book was originally published as a special issue of the British Journal of Sociology of Education Revisiting Education in the New Latino Diaspora Edmund Hamann, Stanton Wortham, Enrique G. Murillo, 2015-04-01 For most of US history most of America's Latino population has lived in nine states California Arizona New Mexico Colorado Texas Illinois Florida New Jersey and New York It follows that most education research that considered the experiences of Latino families with US schools came from these same states But in the last 30 years Latinos have been resettling across the US attending schools and creating new patterns of inter ethnic interaction in educational settings Much of this interaction with this New Latino Diaspora has been initially tentative and improvisational but too often it has left intact the patterns of lower educational success that have prevailed in the traditional Latino diaspora Revisiting Education in the New Latino Diaspora is an extensive update with all new material of the groundbreaking volume Education in the New Latino Diaspora Ablex Publishing that these same editors produced in 2002 This volume consciously includes a number of junior scholars e g C Allen Lynn Soria Colomer Amanda Morales Rebecca Lowenhaupt Adam Sawyer and more established ones Frances Contreras Jason Irizarry Socorro Herrera Linda Harklau as it considers empirical cases from Washington State to Georgia from the Mid Atlantic to the Great Plains where rural suburban and urban communities start their second or third decades of responding to a previously unprecedented growth in newcomer Latino populations With excuses of surprise and improvisational strategies less persuasive as Latino newcomer populations become less new this volume considers the persistence the anomie and pragmatism of Latino newcomers on the one hand with the variously enlightened paternalistic dismissive and xenophobic responses of educators and education systems on the other With foci as personal as accounts of growing up as an adoptee in a mixed race family and the testimonio of a successful undocumented college graduate to the macro scale of examining state level education policies and with an age range from early childhood education to the university level this volume insists that the worlds of education research and migration studies can both gain from considering the educational responses in the last two decades to the newish Latino presence in the 41 U S states that have not long been the home to large well established Latino populations but that now enroll 2.5 million Latino students in K 12 alone Timely and compelling Revisiting Education in the NLD offers new insight into the Latino Diaspora in the US just as the discussions regarding immigration policy bilingual education and immigrant rights are gaining steam Drawing from a variety of perspectives contributing authors interrogate the very concept of the diaspora The wide range of research in this volume thoughtfully illustrates the nuanced phenomena and provides rich descriptions of complex situations No longer a simple question of immigration the book considers language and legal status in schools international adoption teacher preparation and the relationships between

established and relatively new Latino communities in a variety of contexts Comprised of rich thoughtful research Revisiting Education provides a fascinating window into the context of Latino reception nationwide Rebecca M Callahan Associate Professor University of Texas Austin As the leader of a 10 years and counting research study in Mexico that has identified and interviewed transnationally mobile students with prior experience in U S schools I can affirm that in addition to students with backgrounds in California Arizona Texas and Colorado migration links now join schools in Georgia Minnesota Oklahoma Alabama etc to schools in Mexico For that reason and many others I am excited to see this far ranging interdisciplinary new text that considers policy implementation through lenses as different as teacher preparation Latino adoption into culturally mixed families the fate of Latino newcomers in low density districts where there are few like them and the misuse of Spanish teachers as interpreters This is an relevant book for American educators and scholars but also for readers beyond U S borders Hamann Wortham Murillo and their contributors should be celebrated for this fine new collection Dr V ctor Z iga Dean of Research and Extension Universidad de Monterrey
