essays written by leading economists on the subject of the Industrial Revolution Among the questions discussed are the causes for the pre eminence of Britain the roles of the inputs for growth capital labor technical progress the importance of demand factors the relation between agricultural progress and the Industrial Revolution and the standard of living debate The essays demonstrate that the application of fresh viewpoints to the literature has given us a considerable new body of data at our disposal making it possible to test commonly held hypotheses In addition this new data has enabled economists to apply a more rigorous logic to the thinking about the Industrial Revolution thus sharpening many issues heretofore blurred by slipshod methodology and internal inconsistencies *Bibliography of European Economic and Social History* Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily *A Companion to Nineteenth-Century Europe, 1789 - 1914* Stefan Berger, 2008-04-15 This Companion provides an overview of European history during the long nineteenth century from 1789 to 1914 Consists of 32 chapters written by leading international scholars Balances coverage of political diplomatic and international history with discussion of economic social and cultural concerns Covers both Eastern and Western European states including Britain Pays considerable attention to smaller countries as well as to the great powers Compares particular phenomena and developments across Europe *The Global Evolution of Industrial Relations* Bruce E. Industrialization and Colonization Tim McNeese, 2000-09-01 Industrialization and Colonization covers the latter decades of the 19th century and the early years of the 20th Building on the advances of the industrial revolution this post revolutionary period is similarly defined by remarkable technological and industrial innovation An era of firsts steel bridges sewing machines bicycles typewriters radios automobiles airplanes electric light bulbs and the first motion picture the Age of Progress gave birth to unprecedented modes of productivity transportation and communication Thomas Alva Edison and Wilbur and Orville Wright are among the historic figures discussed Challenging review questions encourage meaningful reflection and historical analysis A unit test and answer key are included *Unwitting Architect* Julian Germann, 2021-01-05 The global rise of neoliberalism since the 1970s is widely seen as a dynamic originating in the United States and the United Kingdom and only belatedly and partially repeated by Germany From this Anglocentric perspective Germany's emergence at the forefront of neoliberal reforms in the eurozone is perplexing and tends to be attributed to the same forces conventionally associated with the Anglo American pioneers This book challenges this ruling narrative conceptually and empirically It

recasts the genesis of neoliberalism as a process driven by a plenitude of actors ideas and interests And it lays bare the pragmatic reasoning and counterintuitive choices of German crisis managers that are obscured by this master story Drawing on extensive original archival research this book argues that German officials did not intentionally set out to promote neoliberal change Instead they were more intent on preserving Germany s export markets and competitiveness in order to stabilize the domestic compact between capital and labor Nevertheless the series of measures German policy elites took to manage the end of golden age capitalism promoted neoliberal transformation in crucial respects it destabilized the Bretton Woods system it undermined socialist and social democratic responses to the crisis in Europe it frustrated an internationally coordinated Keynesian reflation of the world economy and ultimately it helped push the US into the Volcker interest rate shock that inaugurated the attack on welfare and labor under Reagan and Thatcher From this vantage point the book illuminates the very different rationale behind the painful reforms German state managers have demanded of their indebted eurozone partners

Artisans in Europe, 1300-1914 James R. Farr, 2000-08-17 This book is a survey of the history of work in general and of European urban artisans in particular from the late middle ages to the era of industrialization Unlike traditional histories of work and craftsmen this book offers a multi faceted understanding of artisan experience situated in the artisans culture It treats economic and institutional topics but also devotes considerable attention to the changing ideologies of work the role of government regulation in the world of work the social history of craftspeople the artisan in rebellion against the various authorities in his world and the ceremonial and leisure life of artisans Women masters journeymen apprentices and non guild workers all receive substantial treatment The book concludes with a chapter on the nineteenth century examining the transformation of artisan culture exploring how and why the early modern craftsman became the industrial wage worker mechanic or shopkeeper of the modern age
