In an increasingly globalised built environment, industry achieving higher levels of integration across organisational and software boundaries can lead to improved economic, social and environmental outcomes. This book is the direct result of a collaborative global network of industry and academic researchers spread across nine countries as part of CIB's International Council for Research and Innovation in Building and Construction Task Group 90 TG90 Information Integration in Construction IICON. The book provides a broad view of some of the opportunities and challenges brought by integrating information across organisational and system boundaries in the built environment industry. Chapters cover a large range of topics and are separated into three sections: resources, processes and added value. They provide a much needed international perspective on a current global evolution in the industry and present leading original research and valuable lessons for researchers, industry practitioners, government clients and policy makers across the industry. Key features include a broad range of topics that are not covered elsewhere in the literature: contributions from a diverse group of industry research leaders from across the globe; exemplar case studies providing real world examples of where information integration has been a key factor for success or lack thereof has been at the root cause of failure; an analysis of future priority areas for research and development investment as well as their strategic implications for public and private decision makers; the book will deliver innovation in best practice methodology for information sharing across disciplines and between the design, construction and asset management sectors. *Design Solutions and Innovations in Temporary Structures* Beale, Robert, André, João, 2017-02-07. Temporary structures are a vital but often overlooked component in the success of any construction project. With the assistance of modern technology, design and operation procedures in this area have undergone significant enhancements in recent years. *Design Solutions and Innovations in Temporary Structures* is a comprehensive source of academic research on the latest methods, practices and analyses for effective and safe temporary structures. Including perspectives on numerous relevant topics such as safety considerations, quality management and structural analysis, this book is ideally designed for engineers, professionals, academics, researchers.

and practitioners actively involved in the construction industry
