From the bestselling author of *When Corporations Rule the World* An extensively researched powerfully argued eye opening critique of how today's corporate capitalism is destroying the things of real value in the world like cancer destroys life Portrays a hopeful future alternatives to a corporate dominated and money ruled world in showing how to restore health to markets democracy and every day life Offers practical suggestions for individuals who want to contribute to the process of change Co published with Kumarian Press There is a deep chasm between the promises of the new global capitalism and the reality of social breakdown spiritual emptiness and environmental destruction it is leaving in its wake In this important book David Korten makes a compelling and well documented case that capitalism is actually delivering a fatal blow not only to life but also to democracy and the market Among his startling ideas Capitalism is a pathology that commonly afflicts market economies in the absence of vigilant public oversight Since the economy internal to a corporation is a planned economy the current consolidation of economic control under a handful of global corporations is a victory for central planning not the market economy The alternative to the new global capitalism is a global system of thriving healthy market economies that function as extensions of healthy local ecosystems to meet the livelihood needs of people and communities Radical as such proposals may seem they actually reflect processes that are steadily gaining momentum around the world *The Post Corporate World* provides a vision of what's needed and what's possible as well as a detailed agenda for change Korten shows that to have a just sustainable and compassionate society concentrated absentee ownership and footloose speculative capital as embodied in the global for profit public corporation must be eliminated in favor of enterprises based on patient rooted stakeholder ownership limited to those who have a stake in the firm as a worker supplier customer or member of the community in which it is located Korten outlines numerous specific actions to free the creative powers of individuals and societies through the realization of real democracy the local rooting of capital through stakeholder ownership and a restructuring of the rules of commerce to create mindful market economies that combine market principles with a culture that nurtures social bonding and responsibility Like Korten's previous bestseller *When Corporations Rule the World* this provocative book is sure to stimulate national dialogue and debate and inspire a bevy of grassroots discussions and initiatives *The Post Corporate World* presents readers with a profound challenge and an empowering sense of hope

**Bioregionalism and Global Ethics** Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and

from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both *The Humanitarian Enterprise* Larry Minear, 2002

*Globalization and Terrorism* Jamal R. Nassar,2009-07-16 Courageously stepping into charged terrain this book casts a clear light on globalization and terrorism for what they are not what some may wish them to be Jamal R Nassar carefully defines these twin concepts placing them in historical as well as political context Woven throughout the book is his central theme of the migration of dreams and nightmares As some are able to take advantage of the opportunities of globalization leaving others behind they leave behind a legacy of unrealistic dreams These unfulfilled hopes of the poor and oppressed often transform themselves into nightmares for the wealthy and powerful This vicious cycle the author argues is often enhanced by globalization and effected by terrorism Focusing on the key case studies of Palestine and Northern Ireland Nassar applies their lessons to other examples of conflict including Iraq Afghanistan the Congo Chechnya and Colombia in order to internationalize our understanding of how globalization and terrorism operate in a range of situations He also devotes a chapter to Islamist terrorism in a tour de force of incisiveness and balance This book considers globalization and terrorism not only from the perspective of the major powers but also introduces the views of those dominated by forces beyond their control Yet even as the author offers a profound critique of Western hegemony he conveys respect and hope for an enlightened global interdependence embracing the power of the dream over the nightmare
