## **Information Hiding In Speech Signals For Secure Communication:**

Information Hiding in Speech Signals for Secure Communication Zhijun Wu, 2014-08-27 In the digital world the need to protect communications increases every day While traditional digital encryption methods are useful there are many other options for hiding your information Information Hiding in Speech Signals for Secure Communication provides a number of methods to hide secret speech information using a variety of digital speech coding standards Professor Zhijun Wu has conducted years of research in the field of speech information hiding and brings his state of the art techniques to readers of this book including a mathematical model for information hiding the core concepts of secure speech communication the ABS based information hiding algorithm and much more This book shows how to implement a secure speech communication system including applications to various network security states Readers will find information hiding algorithms and techniques embedding and extracting that are capable of withstanding the advanced forms of attack The book presents concepts and applications for all of the most widely used speech coding standards including G 711 G 721 G 728 G 729 and GSM along with corresponding hiding and extraction algorithms Readers will also learn how to use a speech covert communication system over an IP network as well as a speech secure communication system applied in PSTN Presents information hiding theory and the mathematical model used for information hiding in speech Provides a number of methods to hide secret speech information using the most common digital speech coding standards A combination of practice and theory enables programmers and system designers not only to implement tried and true encryption procedures but also to consider probable future developments in their designs Computer Vision: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-02-02 The fields of computer vision and image processing are constantly evolving as new research and applications in these areas emerge Staying abreast of the most up to date developments in this field is necessary in order to promote further research and apply these developments in real world settings Computer Vision Concepts Methodologies Tools and Applications is an innovative reference source for the latest academic material on development of computers for gaining understanding about videos and digital images Highlighting a range of topics such as computational models machine learning and image processing this multi volume book is ideally designed for academicians technology professionals students and researchers interested in uncovering the latest innovations in the field *Frontiers in Cyber Security* Guangquan Xu, Kaitai Liang, Chunhua Su, 2020-11-05 This book constitutes the proceedings of the Third International Conference on Frontiers in Cyber Security FCS 2020 held in Tianjin China in November 2020 The 39 full papers along with the 10 short papers presented were carefully reviewed and selected from 143 submissions The papers are organized in topical sections on IoT security artificial intelligence blockchain cyber physical systems security cryptography database security depth estimation mobile security network security privacy program analysis quantum cryptography steganography web security The conference was held virtually due to the COVID 19 pandemic

**Intelligent Multidimensional Data Clustering and Analysis** Bhattacharyya, Siddhartha, De, Sourav, Pan, Indrajit, Dutta, Paramartha, 2016-11-29 Data mining analysis techniques have undergone significant developments in recent years. This has led to improved uses throughout numerous functions and applications. Intelligent Multidimensional Data Clustering and Analysis is an authoritative reference source for the latest scholarly research on the advantages and challenges presented by the use of cluster analysis techniques. Highlighting theoretical foundations, computing paradigms, and real world applications, this book is ideally designed for researchers, practitioners, upper level students, and professionals interested in the latest developments in cluster analysis for large data sets. **Application of Wavelets in Speech**

**Processing** Mohamed Hesham Farouk, 2017-11-29 This new edition provides an updated and enhanced survey on employing wavelets analysis in an array of applications of speech processing. The author presents updated developments in topics such as speech enhancement, noise suppression, spectral analysis of speech signal, speech quality assessment, speech recognition, forensics by speech, and emotion recognition from speech. The new edition also features a new chapter on scalogram analysis of speech. Moreover, in this edition, each chapter is restructured as such that it becomes self-contained and can be read separately. Each chapter surveys the literature in a topic such that the use of wavelets in the work is explained, and experimental results of proposed methods are then discussed. Illustrative figures are also added to explain the methodology of each work. Advanced Intelligent Computing Theories and Applications - With Aspects of Theoretical and Methodological Issues

De-Shuang Huang, Laurent Heutte, Marco Loog, 2007-07-31 This volume, in conjunction with the two volumes CICS 0002 and LNAI 4682, constitutes the refereed proceedings of the Third International Conference on Intelligent Computing held in Qingdao, China, in August 2007. The 139 full papers published here were carefully reviewed and selected from among 2,875 submissions. Collectively, these papers represent some of the most important findings and insights into the field of intelligent computing. **Informatics Engineering and Information Science**

Azizah Abd Manaf, Akram Zeki, Mazdak Zamani, Suriyati Chuprat, Eyas El-Qawasmeh, 2011-10-28 This 4 Volume Set CCIS 0251, CCIS 0254 constitutes the refereed proceedings of the International Conference on Informatics Engineering and Information Science ICIEIS 2011 held in Kuala Lumpur, Malaysia, in November 2011. The 210 revised full papers presented together with invited papers in the 4 volumes were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on e-learning, information security, software engineering, image processing, algorithms, artificial intelligence, and soft computing, e-commerce, data mining, neural networks, social networks, grid computing, biometric technologies, networks, distributed and parallel computing, wireless networks, information and data management, web applications, and software systems, multimedia, ad hoc networks, mobile computing, as well as miscellaneous topics in digital information and communications. **Advances in**

**Multimedia Information Processing - PCM 2007** Horace H. S. Ip, Oscar C. Au, Howard Leung, Ming-Ting Sun, Wei-Ying Ma, Shi-Min Hu, 2007-12-03 This book constitutes the refereed proceedings of the 8th Pacific Rim Conference on Multimedia

PCM 2007 held in Hong Kong China in December 2007 The 73 revised full papers and 21 revised posters presented were carefully reviewed and selected from 247 submissions The papers are organized in topical sections on image classification and retrieval the AVS china national standard technology applications and products human face and action recognition and many more topics **Technology Systems and Management** Ketan Shah,V.
