Multilingualism and Creativity Anatoliy V. Kharkhurin,2012-09-03 In this monograph Anatoliy V Kharkhurin presents the results of his empirical investigation into the impact of multilingual practice on an individual s creative potential Until now the relationship between these two activities has received little attention in the academic community The book makes an attempt to resuscitate this theme and provides a solid theoretical framework supported by contemporary empirical research conducted in a variety of geographic linguistic and sociocultural locations This study demonstrates that several factors such as the multilinguals age of language acquisition proficiency in these languages and experience with cultural settings in which these languages were acquired have a positive impact on selective attention and language mediated

concept activation mechanisms Together these facilitate generative and innovative capacities of creative thinking This book will be of great interest not only to scholars in the fields of multilingualism and creativity but also to educators and all those interested in enhancing foreign language learning and fostering creativity Appendices, indices, maps Herodotus,1895

Girls on Fire Sarah Hentges,2018-04-04 Under the threat of climate change corruption inequality and injustice Americans may feel they are living in a dystopian novel come to life Like many American narratives dystopian stories often focus on males as the agents of social change With a focus on the intersections of race gender class sexuality and power the author analyzes the themes issues and characters in young adult YA dystopian fiction featuring female protagonists the Girls on Fire who inspire progressive transformation for the future *Computer Assisted Learning '83* P. R. Smith,2014-06-28

CAL 83 was organised by the Council for Educational Technology in conjunction with Pergamon Press The selected proceedings include papers from four broad themes fundamental aspects of CAL case studies in CAL hardware for CAL and future developments and also two keynote papers by Professors Bork and Alty respectively The increasing interest in CAL applications in schools is evident from the number of related papers *The State of the European Union Vol. 7* Nicolas Jabko,Craig Parsons,2005-08-04

Twenty first century Europeans are suddenly confronting new choices about their place in the world The most immediate challenges reflect tensions in the transatlantic partnership long the keystone of European worldviews In the Iraqi conflict President Bush posed a blunt general question to the world Are you with us or against us and much of Europe chose the latter More than at any time since 1945 Europeans are uncertain about the future of transatlantic cooperation Internal European developments combine with this external shift to create the impression of a continental turning point The fifty year project of the European Union is entering a new phase The Single Market program and monetary union realized the most ambitious visions of the EU s founding fathers Most thinking about further integration is exceedingly vague Simultaneous EU enlargement to the east and beyond to Turkey may create opportunities to reopen the Union s basic bargains This book proposes to help students and scholars understand the many trends of change that have brought Europe to these crossroads Its approach is novel in two ways First most similar scholarship either seeks a single grand theory of European change or implies that European politics is too complex to map change broadly This book takes a middle ground position positing several distinct mechanisms of change and tracing them across policies and institutional settings Second it uses the United States as a reference point to chart European change The aim is not comparative the focus remains on Europe but the volume maps out EU trends against American policy positions and institutional patterns thus providing a useful comparative anchor for complex patterns This is the seventh volume in the biennial series *State of the European Union* launched in 1991 and produced under the auspices of the European Union Studies Association EUSA **The State of the**

European Union, 6 Tanja A. Börzel, Rachel A. Cichowski, 2005-08-04 Law Politics and Society is the sixth and latest addition to the European Union Studies Association series State of the European Union The contributors of this volume take the dynamic interaction between law politics and society as a starting point to think critically about recent developments and future innovations in European integration and EU studies The book provides an overview of key events between 2000 and 2002 in the European Union while illuminating how these institutional formal legal developments impact ordinary individuals and EU politics For example the European Convention with the possibility of an EU constitution is viewed not only as a new institutional development but we examine what impact the creation of judicially enforceable rights has for Europeans and European integration How does the opportunity for new rights claims alter the balance of power between individuals and EU organizations such as the European Court of Justice vis vis national governments in EU policy expansion Importantly the volume also seeks to provide a unique and interdisciplinary approach to studying the European Union by bringing together both legal scholars and political scientists Chapter contributors offer readers both sophisticated theoretical and empirical accounts of these new developments Issues such as enlargement immigration reform and monetary union require not only a precise understanding of an increasingly complex set of formal legal rules the domain of legal scholars but equally important are the effects on ordinary citizens and political participation the very power struggles that concern political scientists This volume seeks to integrate these two approaches not only by including the scholarship in a single volume but by asking individual contributors to think outside their respective disciplines The division between the legal and political as many would argue is often both artificial and unproductive Our volume seeks to bridge this divide
