**Napoleonic Governance in the Netherlands and Northwest Germany** Martijn van der Burg, 2021-03-29 Van der Burg presents an innovative transregional study of Napoleonic governance in the often overlooked northern periphery of the Empire This book carefully examines the Empire's administrative structure in the north focusing on the heterogeneous community of prefects and subprefects as tools of incorporation binding the regions to the central state His rich comparative analysis highlights the incomplete integration of the north and makes important contributions to our understanding of the Empire and its legacy of state building Katherine Aaslestad West Virginia University Morgantown USA Martijn van der Burg makes a vital contribution to the burgeoning scholarly literature on Napoleonic Europe in this well researched carefully constructed volume His analysis of this somewhat neglected but important part of Napoleon's hegemony will become essential reading for all students and specialists of Napoleonic Europe Van der Burg brings the riches of recent Dutch and German scholarship on the Napoleonic period hitherto denied to an Anglophone readership to say nothing of his own insight into Napoleonic rule in these complex regions He delineates the course of Napoleonic rule here with clarity and acute attention to detail This is a worthy addition to the Napoleonic renaissance in historiography Michael Broers University of Oxford UK A thorough transparent and important comparative study into the content dynamics limits and results of Napoleonic governance and the role of the sub prefects here within in the Netherlands and Northwest Germany Original well written and a very welcome contribution to the historiography of these still understudied areas in the Napoleonic years as well as to Napoleonic historiography in general Johan Joor International Institute of Social History Amsterdam the Netherlands This open access Palgrave Pivot explores the ways in which French Emperor Napoleon tried to integrate the present day Netherlands and Northwest Germany into his Empire by replacing traditional institutions and governing practices with French ones Napoleonic governance The northern periphery of the Napoleonic Empire continues to be overlooked by the bulk of historians this study shows that a transregional approach can yield important findings In a broader sense the study does not deal with these regions alone but also with the difficulties that are inherent to European integration

The Napoleonic Empire and the New European Political Culture M. Broers, P. Hicks, A. Guimera, 2012-10-10 Napoleon's conquests were spectacular but behind his wars is an enduring legacy A new generation of historians have re evaluated the Napoleonic era

and found that his real achievement was the creation of modern Europe as we know it      **Strijd tegen de stilte** Maria Grever, 1994 De positie van vrouwen binnen de geschiedwetenschap aan het begin van de twintigste eeuw beschouwd aan de hand van het leven en werk van de historica en feministe Johanna Naber 1859-1941      **At Spes non Fracta** Marten Gerbertus Buist, 2012-12-06 The setting for this study is reflected in the sub title Merchant bankers and diplomats at work The aim is to follow the partners in their many and diverse activities in their relationship towards each other in their contacts with other houses and in their attitudes towards government officials Moreover the author has attempted to show the motives for their commercial and financial actions where these were discernible A point of departure such as this implies that the surviving correspondence constitutes the principal source of information Quantitative data are included but within this framework their role is subsidiary Because this book is intended for various categories of readers it has been divided into three parts The introductory chapter which contains an abridged history of Hope Co up to 1815 is intended for those whose interest in the subject is of a more general nature In the same chapter a number of main themes such as the growth of foreign loans in the Netherlands and the technique per se of issuing loans are discussed and attention is devoted to some of the problems of trade and to the question whether Hope Co should be viewed as merchants or as bankers In conclusion an impression is given of the part played by Amsterdam as a financial centre during the Napoleonic era and of the very exceptional position which Hope Co occupied at that time      **Rijks geschiedkundige publicatiën. Unspoken Allies Nigel John Ashton, Duco Hellema, 2001 This study brings together the expertise of an international group of scholars to survey the development of political and economic relations between Britain and the Netherlands from the Napoleonic era to the present day It illuminates both the underlying refrain of harmony in international outlook ideology and interests that often made for close co operation between the two countries and also their episodic instances of conflict The contributors address topics ranging from Anglo Dutch relations in the era of imperialism the tensions created by Dutch neutrality in the First World War the challenges of the inter war years the role of the Dutch in British strategy during the Second World War colonialism and decolonisation and most recently bilateral relations in the European framework Based on detailed research in British and Dutch archives Unspoken Allies provides new insights into relations between two of the principal amphibious powers of Europe across the last two centuries      **Netherlands India** J. S. Furnivall, John Sydenham Furnivall, 2010-06-17 A reissue of the classic history of Dutch colonial rule in Indonesia describing its economic and social development until 1939      Myth in History, History in Myth, 2009-08-31 In 1975 a group of Dutch and British scholars published a conference volume of collected essays entitled Some Political Mythologies That conference sought to examine the political myth as an object of historical study particularly in the context of the tumultuous and exceptional history of the Low Countries Thirty years later a more diverse group of scholars gathered to re examine the history of Dutch myth making in light of developments in theoretical and methodological approaches to understanding the role of myths in national identity

moral geography and community formation The results of their efforts appear in this volume Myth in History History in Myth The essays cover developments in history anthropology cartography philosophy art history and literature as they pertain to how the Dutch historically perceived these myths and how the myths have been treated by previous generations of historians

Vestiging van het koninkrijk (1813-1815) Herman Theodoor Colenbrander,1927      The Netherlands and the United States J.C. Westermann,2012-12-06 It is perhaps the most laborious and difficult part of the duties of the State Department to hold at once the threads of our different relations with all the European powers This reflection was made by John Quincy Adams while he was Secretary of State 1 but it applies to the duties of every Minister of Foreign Affairs The stress of the sentence is in the centre at once writes Adams the threads come together in his hand at the same time in order to preserve the system of his foreign policy he must hold them all in one grasp That he is occupied with one power is no reason for neglecting the others To put it more strongly the threads are twisted when one is pulled it must needs affect the others as well Often beyond his reach a knot unites several threads in mutual dependence and they cannot be untied or handled separately Foreign policy is not a single line of action It means the direction of a whole system of connections along many and different trails The system may have one general trend but each connection must follow a separate path Such being the nature of diplomacy and foreign politics it is not for the science of history to treat them otherwise      *Revisiting Napoleon's Continental System* K. Aaslestad,J. Joor,2014-10-29 Economic warfare during the Napoleonic era transformed international commerce redirecting trade and generating illicit commerce This volume re evaluates the Continental System through urban and regional case studies that analyze the power triangle of the French British and neutral powers and their strategies to adapt to trade restrictions      **Fighting for a Living** Erik-Jan Zürcher,2025-10-01 Fighting for a Living investigates the circumstances that have produced starkly different systems of recruiting and employing soldiers in different parts of the globe over the last 500 years It does so on the basis of a wide range of case studies taken from Europe Africa America the Middle East and Asia The novelty of Fighting for a Living is that it is not military history in the traditional sense concentrating at wars and battles or on military technology but that it looks at military service and warfare as forms of labour and at the soldiers as workers Military employment offers excellent opportunities for this kind of international comparison Where many forms of human activity are restricted by the conditions of nature or the stage of development of a given society organized violence is ubiquitous Soldiers in one form or another are always part of the picture in any period and in every region Nevertheless Fighting for a Living is the first study to undertake a systematic comparative analysis of military labour It therefore speaks to two distinct and normally quite separate communities that of labour historians and that of military historians      *Jaarsverslag* Netherlands.
