Rural Development in Transitional China Jacob Eyferth, Peter Ho, Eduard Vermeer, 2004-08-02 This book offers an authoritative and in depth analysis of the social and economic changes that have swept through the Chinese countryside in the last twenty years

China's Frontier Regions Doug Smith, Michael E. Clarke, 2016-03-08 China has traditionally viewed her frontier regions Xinjiang Tibet Inner Mongolia and Yunnan as buffer zones Yet their importance as commercial and cosmopolitan hubs intimately involved in the transmission of goods peoples and ideas between China and its west and southwest has meant they are crucial for China's ongoing development The resurgence of China under Deng Xiaoping's policy of reform and opening has therefore led to a focus on integrating these regions into the PRC People's Republic of China This has important implications not only for the frontier regions themselves but also for the neighbouring states with which they have strong cultural religious linguistic and economic ties China's Frontier Regions explores the challenges presented by this integrationist policy both for domestic relations and for diplomatic and foreign policy relations with the countries abutting their frontier regions

China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions This book responds to this challenge by looking at the development of China's regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the

Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the role of China's regions in the globally focused belt and road initiative launched by the Chinese government in late 2013 The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations **Emerging Forest Associations in Yunnan, China** Horst Weyerhaeuser, Shao Wen, Fredrich Kahrl, 2006 **Energy Market and Energy Transition: Dynamics and Prospects** Xunpeng (Roc) Shi, Phoumin Han, Qiang Ji, Farhad Taghizadeh-Hesary, Dayong Zhang, 2021-06-04 *China Rising* David Goodman, Gerald Segal, 2013-07-23 China's dramatic economic growth since the 1970s has seemed inexorable The resulting rise in international profile has provoked a lively argument regarding the fundamental economic and strategic challenges to the rest of the world that China now presents China Rising examines the extent to which that country's future foreign policy stance may be shaped by its own agendas and constrained through interdependence and interaction with the outside world In the process it also questions the extent to which the rest of the world can attempt to shape that future to non Chinese interests with any chance of success Most debates regarding China's future international position tend to be polarised between those advocating containment and those wishing to see Beijing given a much freer hand China Rising provides a refreshing alternative to both *China Deconstructs* David S.G. Goodman, Gerald Segal, 2002-03-11 China has experienced the world's fastest economic growth for over a decade It is likely that within a generation China will have the world's largest economy Yet at the moment when China looks set to regain its former power serious questions have to be asked about the continuing integrity of China The challenges posed by economic reform succession politics and new forces of political liberalism are compounded by boundary uncertainties as China adopts a strategy of greater interdependence with the regional and global economy The writers of this book analyse the factors that might lead to and that might prevent the break up of China They provide key data about economic activity and external connections of the major regional forces Their analysis provides essential reading for those concerned with the prospects for China and the future stability of East Asia **Local Environmental Politics in China** Genia Kostka, 2017-07-05 Knowledge and insight in national environmental governance in China is widespread However increasingly it has been acknowledged that the major problems in guiding the Chinese economy and society towards sustainability are to be found at the local level This book illuminates the fast changing dynamics of local environmental politics in China a topic only marginally addressed in the literature In the course of building up an institutional framework for environmental governance over the last decade local actors have generated a variety of policy innovations and experiments In large measure these are creative responses to two main challenges associated with translating national environmental policies into local realities The first such challenge is a policy implementation gap stemming from the absence of the state capacity necessary to the implementation of environmental measures The second challenge refers to the need for local non state actors to engage in environmental management oftentimes such a participation gap contributes to implementation

failures In recent years we have seen a multitude of initiatives within China at the provincial level and below designed to bridge both gaps Hence the central aim of this book is to assess these experiments and innovations in local environmental politics This book was originally published as a special issue of the Journal of Environmental Policy and Planning *Water Law* Joseph W. Dellapenna, Joyeeta Gupta, 2021-08-31 This volume of the Elgar Encyclopedia of Environmental Law provides thorough and detailed coverage of the changing meanings and roles of water law from the local to the global It examines the rules of ownership rights of use and dispute resolution that address access allocation and protection of water resources Written by leading scholars and practitioners from across the globe this authoritative volume will be a vital resource for all scholars and students of environmental law

A Study of Prehistoric Settlement Patterns in China Anping Pei,2020-04-07 This book is the first ever monograph on clustering patterns in prehistoric settlements It not only theoretically explains the difference between natural settlement communities and organizational forms for the first time but

also demonstrates the importance of understanding this difference in practical research Based on extensive archaeological data from China and focusing on the evolution of prehistoric settlements and changing social relations the book completely breaks with the globally popular research mode which is based on the assumption that settlement archaeology has nothing to do with prehistoric social organization In terms of research methods the book also abandons the globally popular method of measuring the grade and importance of settlements according to their size and the value of the unearthed objects Instead it focuses on understanding settlements attributes from the combined perspective of the group and individuals On the one hand the book proves that the clustering patterns in prehistoric settlement sites reflect the organizational forms of the time on the other it demonstrates that historical research focusing on the organizational forms of prehistoric societies is closer to the historical reality and of more scientific value The intended readership includes graduates and researchers in the field of archaeology or those who are interested in cultural relics and prehistoric settlements
