Industrial Hygiene Control of Airborne Chemical Hazards, Second Edition William Popendorf, 2019-06-26 Are you a practicing occupational hygienist wondering how to find a substitute organic solvent that is safer to use than the hazardous one your company is using Chapter 6 is your resource Are you a new hygienist looking for an alternative technology as a nonventilation substitute for an existing hazard Chapter 8 is your resource Are you looking for an overview of ventilation Chapters 10 and 11 are your resource Are you an industrial hygiene student wanting to learn about local exhaust ventilation Chapters 13 through 16 are your resource Are you needing to learn about personal protective equipment and respirators Chapters 21 and 22 are your resources This new edition brings all of these topics and more right up to date with new material in each chapter including new governmental regulations While many of the controls of airborne hazards have their origins in engineering this author has been diligent in explaining concepts writing equations in understandable terms and covering the topics of non ventilation controls both local

exhaust and general ventilation and receiver controls at the level needed by most IHs without getting too advanced Taken as a whole this book provides a unique comprehensive tool to learn the challenging yet rewarding role that industrial hygiene can play in controlling airborne chemical hazards at work Most chapters contain a set of practice problems with the solutions available to instructors Features Written for the novice industrial hygienist but useful to prepare for ABIH certification Explains engineering concepts but requires no prior engineering background Includes specific learning goals that differentiate the depth of learning appropriate to each topic within the fuller information and explanations provided for each chapter Contains updated governmental regulations and abundant references Presents a consistent teaching philosophy and approach throughout the book Deals with both ventilation and non ventilation controls Recommended Industrial Ventilation Guidelines Arthur D. Little, Inc, John H. Hagopian, 1976 Industrial Ventilation ACGIH, 2013 NEW Now with both Imperial and Metric Values Since its first edition in 1951 Industrial Ventilation A Manual of Recommended Practice has been used by engineers and industrial hygienists to design and evaluate industrial ventilation systems The 28th edition of this Manual continues this tradition Renamed Industrial Ventilation A Manual of Recommended Practice for Design the Design Manual in 2007 this new edition now includes metric table and problem solutions and addresses design aspects of industrial ventilation systems **Building Services Design Methodology** David Bownass, D. Bownass, 2002-09-11 Building Services Design Methodology clearly sets out and defines the building services design process from concept to post construction phase By providing a step by step methodology for students and practitioners of service engineering the book will encourage improved efficiency both in environmental terms and in terms of profit enhancement through better project management Generic advice and guidance is set in the current legal and contractual context ensuring that this will be required reading for professionals The book's practical style is reinforced by a number of case studies **NUREG/CR.** U.S. Nuclear Regulatory Commission, 1979 **Information Resources in Toxicology** P.J. Industrial Hygiene, 4 Volume Set Vernon E. Rose, Barbara Cohrssen, 2011-02-14 Since the first edition in 1948 Patty's Industrial Hygiene and Toxicology has become a flagship publication for Wiley In the course of its nearly six decades in print it has evolved into a standard reference for the fields of occupational health and toxicology The volumes on Industrial Hygiene are cornerstone reference works for chemists engineers toxicologists and occupational safety personnel Since the 5th edition was published the field of IH has changed with personnel often working for multinational firms self employed at small consulting firms Their environment has changed and expanded and thus also the types of information and resources required have changed The traditional areas of interest to occupational health and safety professionals include anticipation recognition evaluation and control of potential hazards In addition to these the 6th edition provides information and reliable resources to prepare for natural disasters exposures to biological agents and potential acts of terrorism

Industrial Hygiene Control of Airborne Chemical Hazards William Popendorf, 2006-05-15 Do you need guidelines for choosing a substitute organic solvent that is safer to use Do you need an effective cheap but perhaps temporary way to reduce exposures before you can convince your employer to spend money on a long term or more reliable solution Do you need information about local exhaust ventilation or personal protective equipment like respirators and gloves Industrial Hygiene Control of Airborne Chemical Hazards provides the answers to these questions and more Science based and quantitative the book introduces methods for controlling exposures in diverse settings focusing squarely on airborne chemical hazards It bridges the gap between existing knowledge of physical principles and their modern application with a wealth of recommendations techniques and tools accumulated by generations of IH practitioners to control chemical hazards Provides a unique comprehensive tool for facing the challenges of controlling chemical hazards in the workplace Although William Popendorf has written the book at a fundamental level he assumes the reader has some experience in science and math as well as in manufacturing or other work settings with chemical hazards but is inexperienced in the selection design implementation or management of chemical exposure control systems Where the book is quantitative of course there are lots of formulae but in general the author avoids vague notation and long derivations
