Inequality Reexamined Amartya Sen, 1995-03-15 The noted economist and philosopher Amartya Sen argues that the dictum all people are created equal serves largely to deflect attention from the fact that we differ in age gender talents and physical abilities as well as in material advantages and social background He argues for concentrating on higher and more basic values individual capabilities and freedom to achieve objectives By concentrating on the equity and efficiency of social arrangements in promoting freedoms and capabilities of individuals Sen adds an important new angle to arguments about such vital issues as gender inequalities welfare policies affirmative action and public provision of health care and education

Hirschmann,2009-01-10 This book reconsiders the dominant Western understandings of freedom through the lens of women s real life experiences of domestic violence welfare and Islamic veiling Nancy Hirschmann argues that the typical approach to freedom found in political philosophy severely reduces the concept s complexity which is more fully revealed by taking such practical issues into account Hirschmann begins by arguing that the dominant Western understanding of freedom does not provide a conceptual vocabulary for accurately characterizing women s experiences Often free choice is assumed when women are in fact coerced as when a battered woman who stays with her abuser out of fear or economic necessity is said to make this choice because it must not be so bad and coercion is assumed when free choices are made such as when Westerners assume that all veiled women are oppressed even though many Islamic women view veiling as an important symbol of cultural identity Understanding the contexts in which choices arise and are made is central to understanding that freedom is socially constructed through systems of power such as patriarchy capitalism and race privilege Social norms practices and language

set the conditions within which choices are made determine what options are available and shape our individual subjectivity desires and self understandings Attending to the ways in which contexts construct us as subjects of liberty Hirschmann argues provides a firmer empirical and theoretical footing for understanding what freedom means and entails politically intellectually and socially Applicative Justice Naomi Zack,2016-03-04 Naomi Zack pioneers a new theory of justice starting from a correction of current injustices While the present justice paradigm in political philosophy and related fields begins from John Rawls s 1970 Theory of Justice Zack insists that what people in reality care about is not justice as an ideal but injustice as a correctable ill For a way to describe real injustice and the society in which it occurs Zack resurrect Arthur Bentley s key insight that government and law or political life is a constant process of contending interest groups throughout society Bentley s main idea allows for a resolution of the contradiction between formal legal equality for U S minorities and post civil rights practical inequality Just law and unjust practice co exist as a fact of political life The correction of injustice in reality requires applicative justice in a comparison between those who are treated unjustly with those who are treated justly and the design of effective measures to equalize such treatment Zack s theory of applicative justice offers a revolutionary reorientation of society s pursuit of justice seeking to undo injustice in a practical and fully achievable way

A Humanistic Approach to Health Promotion David R.

Buchanan,2020-11-25 This book presents a distinct ethically robust framework for improving population health when the major causes of disease death and disability are closely associated with human behaviors Rather than relying on a scientific technological strategy aimed at developing ever more powerful and effective techniques for changing behaviors a humanistic approach recognizes the unique human capacity for dignity and moral decision making As an essential alternative to the scientific assumption of determinism a humanistic framework is based on the equally viable assumption that human beings have the capacity to exercise autonomy in pursuing their life plans If people can choose how they want to live their lives then it is imperative to respect and cultivate their autonomy in making health promoting decisions A scientific approach is unsurpassed at identifying effective means for stopping and killing bacteria the same methods are not appropriate however when the objective is to alter human behavior In a humanistic framework it is important to acknowledge that autonomous choices are not completely unrestrained the human condition has significant physical and social limitations and that certain readily identifiable social groups face much greater constraints than others most significantly due to poverty and racism As explained and justified in this book the most important task for health promotion is to promote autonomy and to do this by redressing the hugely disparate yet corrigible barriers faced by people occupying distinct social positions This project is a matter of social justice not a scientific and technological problem to be solved but a moral and political endeavor to engage fellow citizens in strengthening our social institutions to enable everyone to realize their innate capacities to the fullest extent possible The book provides ethical standards case studies and concrete practical analogies to demonstrate the feasibility and benefits of moving the field of health promotion in a new humanistic direction Gender and Chinese Development
