Information Security Risk Assessment: Practices of Leading Organizations: a Supplement to GAO's May 1998 Executive Guide to Information Security Management, 1999 Managing the security risks associated with our government's growing reliance on information technology is a continuing challenge. In particular, federal agencies like many private organizations have struggled to find efficient ways to ensure that they fully understand the information security risks affecting their operations and implement appropriate controls to mitigate these risks. This guide, which we are initially issuing as an exposure draft, is intended to help federal managers implement an ongoing information security risk assessment process by providing examples or case studies of practical risk assessment procedures that have been successfully adopted by four organizations known for their efforts to implement good risk assessment practices. More importantly, it identifies, based on the case studies, factors that are important to the success of any risk assessment program regardless of the specific methodology employed.

Information Security Risk Assessment U.S. Government Accountability Office (G.U.S. Government Accountability Office), 2013-06 The U.S. Government Accountability Office (GAO) is an independent agency that works for Congress. The GAO watches over Congress and investigates how the federal government spends taxpayers' dollars. The Comptroller General of the United States is the leader of the GAO and is appointed to a 15-year term by the U.S. President. The GAO wants to support Congress while at the same time doing right by the citizens of the United States. They audit, investigate, perform analyses, issue legal decisions, and report anything that the government is doing. This is one of their reports.

The Security Risk Assessment Handbook Douglas Landoll, 2021-09-27 Conducted properly, information security risk assessments provide managers with the feedback needed to manage risk through the understanding of threats to corporate assets, determination of current control vulnerabilities, and appropriate safeguards selection.
