Selling With Heart and Soul Leow Chee Seng, Samsinar Md. Sidin, Vincent Leong Wing Sum, Humanology, 2015-06-02

This book *Selling With Heart and Soul* is part of the Body Language Series which focuses on the selling process and how a sales people could benefit from the cues and signals shown by customers in order to close sales. The uniqueness of this book that we have pointed out the totally misleading and wrong concept in selling and marketing the Caveat Emptor. In any transaction sales people cannot shed off their responsibilities by passing the act of discovery to the buyers; sales people must declare according to what they know. If the sellers do not believe in their products, do not sell it until they understand and internalize the products. In addition, this book suggests that marketers and sales people cannot be the tool to create unnecessary demand. One of the extremely wrong concepts of marketing is to push to consumers good service beyond their needs. We have identified that create unnecessary demand creating bad identity brand to the organisation. Culture and Islamic Adaptation Psychology Malik Badri,Humanology,2018-03-15 The indiscriminate exportation of Western psychology to Muslim and third world countries can pose serious cultural and ideological dilemmas When the exported commodity from North to South is physical in nature the harm done can easily be identified for example the quick detection of the life threatening birth defects caused by the drug thalidomide when taken during pregnancy or the flaws in the breaking system of a Japanese car However when the exported product is ideas and beliefs and ways of life the indirect and sneaky damage is often much more malevolent and long lasting because it attacks the worldview of the recipients and it shakes their cherished beliefs Because of its technological supremacy Islamic and developing countries got used to wholeheartedly accepting any information coming from the West if it is under the tag of science By presenting itself under this prestigious mantra of science students in Muslim countries swallow the kernel of psychology with its nutshell the baby with its filthy water The danger of this approach is greatly augmented by the shortcomings of our educational systems that discourages critical thinking and encourages the submissive acceptance of the words of the teacher and that of printed material
