**International Relations in France** Henrik Breitenbauch, 2013-06-19 Why is the French International Relations IR discipline different from the transnational American discipline By analysing argument structures in research articles across time this book shows how the discipline in France is caught between the American character of the discipline and the French state as regulator of legitimate forms of expression Concretely French research arguments are less explicit about what their propositions are and what academic discussions they draw on and add to than their transnational American counterparts Based on a comparative case study of French and American IR research from 1950 to 2011 the book is a major contribution to the meta IR literature on global regional and national traditions of IR The challenge to the French discipline of whether and how to position itself in relation to the evolving American discipline is in many ways exemplary for other non American national IR disciplines and the choices as well as the structural conditions underlying the French case are relevant to all non Western disciplines The comparative analysis moreover reveals that the modern American discipline what is considered as recognisable social science takes shape only during the 1970s The book thus offers new knowledge about the discipline s international development as such Both case and methodology are interesting to larger audiences outside IR in the history and sociology of social science contrastive rhetoric as well as French and cultural studies *Maestri of Political Science*

Donatella Campus, Gianfranco Pasquino, Martin Bull, 2011-06-01 This book continues the editors work started in the volume *Masters of Political Science* of highlighting and re evaluating the contributions of the most important political scientists who have gone before Its basis is the belief that the future development and sophistication of the discipline will benefit from a critical understanding of the works of early political giants whose contributions are presented and analysed Gabriel A Almond Raymond Aron Philip Converse Maurice Duverger Stanley Hoffmann Paul Lazarsfeld Arend Lijphart Elinor Ostrom William H Riker Stein Rokkan and Susan Strange The editors review and consider the contributions of these maestri to the study of contemporary democracy political culture electoral systems political communication the transformation of capitalism and state formation in Europe *Maestri of Political Science* is aimed not only at a new generation of political scientists but is a valuable opportunity for established scholars to see new light through old windows **Continuity and Change in France**

Vincent Wright, 2024-09-02 First published in 1984 *Continuity and Change in France* sets out to explore questions by examining the many features of the Giscard presidency which have endured under Socialist rule Few people predicted the election victory of Francois Mitterrand over Giscard d Estaing in May 1981 It was greeted by his supporters at least as the first remarkable event in a chain of far reaching changes which would transform France However it has gradually become clear that political change does not come easily to modern France and that continuity is at least as important This book is at once a valuable review of the 1974 81 period as well as a revealing account of what has changed since then and what despite the rhetoric has not The contributors cover a number of areas important to French presidency and demonstrate the existence

of a surprising degree of continuity in terms of both policy and personnel They will be welcomed by all students of French politics as providing the basis for a fuller assessment of the successes and shortcomings of the Mitterrand years

Economy Isabelle Jonveaux, 2023-06-02 This book examines the economy of contemporary Catholic monasticism from a sociological perspective considering the ways in which monasteries engage with the capitalist world economy via a model which aims less at performance per se than at the fulfilment of human and religious values Based on fieldwork across several countries in Europe Africa and South America it explores not only the daily work and economy in monastic communities in their tensions with religious life but also the new interest from society in monastic products or monastic management With attention to present trends in monastic economy including the growth of ecology and the role of monasteries in the social and economic development of their localities the author demonstrates that monastic economy consists not solely in the subsistence of religious communities outside the world but in economic activity that has a real impact on its local or even more global environment in part through transnational networks of monasteries As such Contemporary Monastic Economy A Sociological Perspective will appeal to scholars of religious studies and sociology with interests in contemporary monasticism

**Democracy and International Trade** Daniel Verdier, 1995-07-23 In this ambitious exploration of how foreign trade policy is made in democratic regimes Daniel Verdier casts doubt on theories that neglect voters Bringing the voters back in Verdier shows that special interests party ideologues and state officials and diplomats act as agents of the voters Constructing a general theory in which existing theories rent seeking median voting state autonomy function as partial explanations he shows that trade institutions are not fixed entities but products of political competition Verdier then offers a thorough analysis of how foreign trade policy was made in France Britain and the United States during the period from 1860 through 1990 He discloses a reality startlingly different from previous understandings of American and French trade policies Challenging the conventional view that special interests have dominated American trade policy he argues that sectoral economic weight has not been a good predictor of political power in the United States since 1888 Conversely against the prevailing belief that French industry is controlled by an autonomous state he reveals the existence of a privileged collusive relationship between French industry and state

officials from the 1892 Meline Tariff through the Socialist victory of 1981 The standard opinion is confirmed only in the case of Britain where an arm s length relationship has historically been maintained between industry and government The book s findings make it essential reading for political scientists political economists and historians alike Bibliographie Internationale de Sociologie 1980 ,1982 Each Bibliography lists and annotates the most important works published during the year They are arranged by topic and indexed by author subject and geographic location Politics and the European Commission Andy Smith,2004-08-02 The European Commission is an organization which has come to fascinate or repulse a range of national politicians journalists and social scientists This book investigates this organization s relationship to politics
