not only classifies audiobooks as artworks to all intents and purposes but also generates the criteria and parameters for evaluating their merit Since the proof of the proverbial pudding is purportedly in the eating in surveying a series of concrete case studies each highlighting different degrees of complexities this study mainly examines first person narratives as the most natural medium for the aesthetics of the audiobook As such the investigation herein provides one with comparative close listenings appropriately analyzing and debating their aesthetic properties Finally in exploring what this study identifies as one's informed intuition and its role in the craft of casting audiobooks this study also proposes a new understating of how aesthetic appreciation works in action
