about the new booming generation of healthy older people and this book asks what it is really like to be old at the beginning of the 21st century in the United Kingdom analysing leisure in older people in the context of the subtle politics of the day to day Throughout the chapters the author highlights the often missing depictions of older people who enjoy and enact bold informed agency as part of their everyday lives Drawing upon secondary data from the Mass Observation Archive a social thesis of leisure and ageing emerges that challenges the individualism inherent in active ageing It is proposed that the idea of active ageing creates complex constraints to leisure as people strive to measure up to cultural expectations The stories in this book advocate for an appreciation and re evaluation of passive leisure in later life and the enjoyment and freedom it can bring The project is therefore useful to students and researchers of leisure studies gerontology and sociology of ageing

Invitation to the Life Course Richard Settersten, 2018-02-06 Invitation to the Life Course Toward New Understandings of Later Life discusses in depth the challenges of age time and social contexts for the study of aging and later life Understanding aging as a process and later life as a period must be accompanied by serious attention to the life course This brings significant challenges related to time as gerontologists must describe and explain life patterns over many decades It also brings significant challenges related to place as gerontologists must examine how social contexts structure pathways into and through later life and how those contexts affect the nature and meaning of experiences along the way This book is a natural extension of the editor's previous work Lives in Time and Place The Problems and Promises of Developmental Science Baywood 1999
