Ecotourism Programme Planning David A. Fennell, 2002-01-01. Tourism is the world's largest industry. In the past decade it is the natural resource based sector that has experienced the greatest growth. In particular, adventure, cultural and ecotourism. ACE tourism, for example, skiing, white water rafting, whale watching, festivals and fairs. This book provides an in depth overview of the different operations of ACE tourism. It draws on theory from recreation and leisure studies, tourism marketing and environmental management to demonstrate the importance of effective program planning. This is especially significant as industry competition becomes more intense in this growth sector.

A Systems Approach to Recreation Programming Frederick Coleman Patterson, 1991. The text provides students in professional preparation programs with an effective, efficient method of recreation program planning.

Planning Programs in Recreation Ruth V. Russell, 1982. Ecotourism David A. Fennell, 2014-09-08. Ecotourism continues to be embraced as the antithesis of mass tourism because of its promise of achieving sustainability through conservation-mindedness, community development, education and learning and the promotion of nature-based activities that were sensitive to both ecological and social systems. The extent to which this promise has been realised is open to debate. Focusing on an array of economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, the volume examines ecotourism in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance and the ethical imperative of ecotourism as these apply to the world's greenest form of tourism. Ecotourism is a growing field attracting increasing attention from students and academics. Fennell provides an authoritative and comprehensive review of the most important issues that continue to both plague ecotourism and make it one of the most dynamic sectors in the tourism industry. It covers a comprehensive range of themes and geographical regions. Building on the success of prior editions, *Ecotourism* has been revised throughout to incorporate recent research and benefits from the introduction of real life case studies and summaries of recent literature. An essential reference for those interested in Ecotourism, the book is accessible to students but retains the depth required for use by researchers and practitioners in the

field New chapters on the theory and application of animal ethics community development in sustainable tourism and education and learning in the field have added further value to an already very comprehensive volume This book will be of interest to students across a range of disciplines including geography economics business ethics biology and environmental studies *Leisure Education Program Planning* John Dattilo,2008 **Recreation Program Planning Today** Richard G.
