

THE THROAT, AND THE MUSCLES OF THE LEG

FOL. 38

The inscription at the head of the page states that Leonardo intended to deal with the musculature of the superficial veins. In fact no drawing on the page deals with that subject. The smaller ones there is evidence of Leonardo's thoughts about the organization of his material, expressing his intention to begin his book on anatomy simply called *anatomia* at the head and end it at the feet. The leg was presumably the first drawing to be made, but again none of the notes describes that drawing, and the remainder of the page is devoted to the throat, with studies of the pharynx, larynx and trachea and their functions in breathing, speaking and swallowing.

The large drawing at upper left displays many of the features seen in the subsequent, less extensive studies (see key diagram). The mouth and throat have many small arteries, ridges and recesses, and dissection of any specimen can be confusing without an atlas or guidebook to reference. Leonardo, of course, had none. In addition, some of the structures shown here may have been based upon animal dissection, which would explain the odd form of the palatopharyngeus and palatopharyngeus muscles (the "throat") attached to the posterior of the hyoid bone and thyroid cartilage and arching over the top of the uvula, roof of the epiglottis and laryngeal ventricle. Leonardo has shown the uvula, the soft organ that droops in the back of the mouth; the wishbone-shaped hyoid bone; the thyroid gland; and the thyroid, cricoid and tracheal cartilages. But his understanding of the function of these structures was merely speculative: the thyroid gland, for instance, is "made to fill in where the muscles are missing, and . . . hold the trachea apart from the base of the cricoid".

Leonardo Da Vinci The Mechanics Of Man:

Leonardo Da Vinci Martin Clayton, Ronald Philo, 2010 Leonardo da Vinci was not only one of the leading artists of the Renaissance he was also one of the greatest anatomists ever to have lived He combined to a unique degree manual skill in dissection analytical skill in understanding the structures he uncovered and artistic skill in recording his results His extraordinary campaign of dissection conducted during the winter of 1510 11 and concentrating on the muscles and bones of the human skeleton was recorded on the pages of a manuscript now in the Print Room of the Royal Library at Windsor Castle These are arguably the finest anatomical drawings ever made and are extensively annotated in Leonardo s distinctive mirror writing with explanations of the drawings notes on related anatomical matters memoranda and so on This publication reproduces the entire manuscript and for the first time translates all of Leonardo s copious notes on the page so that the unfolding of his thoughts may readily be followed Leonardo Da Vinci Martin Clayton, Ronald Philo, 2010 Overview

Leonardo da Vinci 1452 1519 spent over twenty five years investigating the workings of the human body While his paintings were widely known in his day only a few friends and associates had any intimation of the extent of his medical research Leonardo s Anatomical Manuscript A created over the winter of 1510 11 is the only group of such drawings in which he approached complete coverage of the human form and it represents his finest work in this area This fascinating book presents a complete discussion of all the drawings in Manuscript A not only as evidence of Leonardo s artistic genius but also as the product of the sophisticated scientific investigations they represent Each drawing records a meticulous human dissection and is extensively annotated with Leonardo s notes questions and memoranda to himself in mirror writing backward writing legible only when held up to a mirror the motivations for which have been the subject of much speculation Each drawing is reproduced twice once in its original form and once with a new English translation in place of Leonardo s original notes The authors comment on the accuracy of the anatomical renderings and the conclusions Leonardo draws from them **Leonardo Da Vinci** Martin Clayton, 2010 **A History of Medicine in 50 Discoveries (History in 50)**
