*Sex, Time, and Power* Leonard Shlain, 2004-08-03 As in the

bestselling *The Alphabet Versus the Goddess* Leonard Shlain's provocative new book promises to change the way readers view themselves and where they came from *Sex Time and Power* offers a tantalizing answer to an age old question Why did big brained Homo sapiens suddenly emerge some 150 000 years ago The key according to Shlain is female sexuality Drawing on an awesome breadth of research he shows how long ago the narrowness of the newly bipedal human female's pelvis and the increasing size of infants heads precipitated a crisis for the species Natural selection allowed for the adaptation of the human female to this environmental stress by reconfiguring her hormonal cycles entraining them with the periodicity of the moon The results however did much more than ensure our existence they imbued women with the concept of time and gave them control over sex a power that males sought to reclaim And the possibility of achieving immortality through heirs drove men to construct patriarchal cultures that went on to dominate so much of human history From the nature of courtship to the evolution of language Shlain's brilliant and wide ranging exploration stimulates new thinking about very old matters

Divergent Paths Richard A. Posner, 2016-01-04 Judges and legal scholars talk past one another if they have any conversation at all Academics criticize judicial decisions in theoretical terms which leads many judges to dismiss academic discourse as divorced from reality Richard Posner reflects on the causes and consequences of this widening gap and what can be done to close it

**The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2)** Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within

**The Unknown Genius Creative Abilities of Leonardo Da Vinci** Dr. Rudy A. Magnan, 2020-10-01 This publication was written in the belief that Leonardo's study of his natural surroundings his advanced perceptual skills and his continued interest in learning all played a significant

role in developing his creativity He challenged established mindsets with the conviction that all earthly things are connected He spent years observing nature s secrets documenting his observations and the creative thinking that resulted While much has been written about Leonardo s incredible scientific discoveries his futuristic inventions and his great works of art we fail to realize that Leonardo da Vinci developed incredible creative thinking that needs to be understood and applied in this new creative paradigm where creative ideas are the currency of the future      *Mastering Creativity in Organizations* Andrés Hatum,2017-10-27 This book identifies best practices leadership styles and organizational structures for the stimulation of organizational creativity with an aim to help any company not just companies in creative fields or industries become an organization in which new ideas flow new processes are developed and new products are brought to market Managers will find case studies describing exceptional organizational creativity and practical takeaways that can be applied in their own firms Students will find concrete analytical frameworks for thinking about creativity in organizations and academics will find a different approach to the study of creativity one that is grounded in practice      **Learning With Leonardo: Unfinished Perfection: Making children cleverer: what does Da Vinci tell us?** Ian Warwick,Ray Speakman,2019-03-11 What are the seven key concepts that drove Da Vinci s inventive thinking and how can we still use them to improve our own creativity 500 years after his death In pursuit of the unified learning principles that sit at the heart of his work Ian Warwick and Ray Speakman brilliantly explore the approaches that we need to take to make our own learning more original and thoughtful

**Collaborative Intelligence** Dawna Markova,Angie McArthur,2015-08-11 A breakthrough book on the transformative power of collaborative thinking Collaborative intelligence or CQ is a measure of our ability to think with others on behalf of what matters to us all It is emerging as a new professional currency at a time when the way we think interact and innovate is shifting In the past market share companies ruled by hierarchy and topdown leadership Today the new market leaders are mind share companies where influence is more important than power and success relies on collaboration and the ability to inspire Collaborative Intelligence is the culmination of more than fifty years of original research that draws on Dawna Markova s background in cognitive neuroscience and her most recent work with Angie McArthur as a Professional Thinking Partner to some of the world s top CEOs and creative professionals Markova and McArthur are experts at getting brilliant yet difficult people to think together They have been brought in to troubleshoot for Fortune 500 leaders in crisis and managers struggling to inspire their teams When asked about their biggest challenges at work Markova and McArthur s clients all cite a common problem other people This response reflects the way we have been taught to focus on the gulfs between us rather than valuing our intellectual diversity that is the ways in which each of us is uniquely gifted how we process information and frame questions what kind of things deplete us and what engages and inspires us Through a series of practices and strategies the authors teach us how to recognize our own mind patterns and map the talents of our teams with the goal of embarking together on an aligned course of action and influence In Markova and McArthur s experience managers who appreciate

intellectual diversity will lead their teams to innovation employees who understand it will thrive because they are in touch with their strengths and an entire team who understands it will come together to do their best work in a symphony of collaboration their individual strengths working in harmony like an orchestra or a high performing sports team Praise for Collaborative Intelligence Rooted in the latest neuroscience on the nature of collaboration Collaborative Intelligence celebrates the power of working and thinking together at the highest levels of business and politics and in the smallest aspects of our everyday lives Dawna Markova and Angie McArthur show us that our ability to collaborate is not only a measure of intelligence but essential to solving the world's problems and seeing the possibilities in ourselves and others Arianna Huffington This inspiring book teaches you how to align your intention with the intention of others and how through shared strengths and talents you have every right to expect greatness and set the highest goals and expectations Deepak Chopra Everyone talks about collaboration today but the rhetoric typically outweighs the reality Collaborative Intelligence offers tangible tools for those serious about becoming system leaders who can close the gap and make collaboration real Peter M Senge author of The Fifth Discipline I have worked with Markova and McArthur for several years focusing on achieving better results through intellectual diversity Their approach has encouraged more candid debate and collaborative behavior within the team The team not individuals becomes the hero Al Carey CEO PepsiCo
