Analytical Chemistry-4 Mitsugi Senda, 2016-04-19 Analytical Chemistry 4 is a collection of plenary lectures presented at the International Congress on Analytical Chemistry held in Kyoto Japan on April 3-7 1972 This book contains 11 chapters and begins with a summary of the kinetics of complex formation of metals with organic ligands in analytical chemistry The subsequent chapters deal with the chelate compounds the concepts of trace analysis the developments in quantitative organic ultramicro elementary analysis and the status of radiochemistry and its application to activation analysis These topics are followed by presentation of precipitation based ion selective electrodes with a particular emphasis on their most important analytical and physicochemical applications A chapter briefly highlights the progress of analytical chemistry in Japan The remaining chapters explore the direct metal and alloy analysis based on the selective modulation and resonance detection of conventional atomic absorption spectroscopy These chapters also look into the status of analytical chemistry studies of air and water pollution This text will be of great benefit to analytical chemists and researchers

Lectures on Electrochemical Corrosion Marcel Pourbaix, 2012-12-06 Workers in the field of corrosion and their students are most fortunate that a happy set of circumstances brought Dr Marcel Pourbaix into their field in 1949 First he was invited while in the USA to demonstrate at a two week visit to the National Bureau of Standards the usefulness of his electro chemical concepts to the study of corrosion Secondly also around the same time Prof H H Uhlig made a speech before the United Nations which pointed out the tremendous economic consequences of corrosion Because of these circumstances Dr Pourbaix has reminisced he chose to devote most of his efforts to corrosion rather than to electrolysis batteries geology or any of the other fields where one might add they were equally valuable This decision resulted in his establishing CEBELCOR Centre Belge d Etude de la Corrosion and in his development of a course at the Free University of Brussels entitled Lectures on Electrochemical Corrosion This book is the collection of these lectures translated into English
