

**Audience Description:** This lesson has been designed for my average level 8<sup>th</sup> grade math class. There are 23 students in this class. Their desks are arranged into rows and columns. At this point, the students will have limited knowledge of exponents and their properties. They will have had lessons on the Product of Powers and Quotient of Powers rules.

**Lesson Title:** Exponent Properties: Power to a Power

**Length of Lesson:** 47 minutes (8:10-8:57)

**Objectives:**

- Students will be able to explain the Power to a Power rule. (Bloom's Taxonomy: Understand)
- Students will be able to write exponents as repeated multiplication in order to simplify expressions. (Bloom's taxonomy: Apply)
- Students will be able to simplify expressions applying the power to a power property. (Bloom's Taxonomy: Apply)

**Standards:**

- Domain: Expressions and Equations 8.EE  
Cluster: Work with radicals and integer exponents.  
Standard: 1. Know and apply the properties of integer exponents to generate equivalent numerical expressions. For example,  $3^2 \times 3^{-5} = 3^{-3} = \frac{1}{3^3} = \frac{1}{27}$ .

**Anticipatory Set (10 minutes):** Bellwork will be written on the board for students to work on as soon as class begins. They will be asked to simplify the following:

1)  $\frac{a^5}{a^2}$       **Answer:  $a^3$**

2)  $\frac{7^5}{7}$       **Answer:  $7^4$**

3)  $\frac{10m^3}{2m^2}$       **Answer:  $5m$**

Students will have time to work on these problems on their own. When it appears that mostly everyone has finished, we will go over the problems as a class. This is content that the students should already know how to do. I will walk around the room to assess how the students did and whether or not one of the problems needs further explaining.
