Four Winds Barbara Madrid,2014-06-13 If a person commits a crime against another people and they are someday sorrowful of this crime they will ask forgiveness from the person we may or may not be forgiven if we are not forgiven either way we need to let it go They will forgive you in their time when it is right for them that is the Creator s job not yours In asking forgiveness from the Creator you need to let it go The Creator immediately will forgive us once we ask it of Him It is our human nature to think sometimes our crimes are too horrific in nature The human in us tells us Creator can t forgive those it is the human in us that makes us think it is the human in us we need to turn off Only then is when we listen to our heart The Creator does not have a court with a judge jury or prosecutor there is only One Him He does not have a scale or measure to determine or compare one crime to another to Him a crime is a crime if the crime is being an adulterer a liar or a murderer to Him they are all the same the punishment is the same What matters is not the crime but that you were spiritual enough to ask forgiveness from our Creator Don t let the human in you think you cannot be forgiven that is Satan influencing you Satan will want you to think you are no good and can t possibly be forgiven DO NOT listen to that one Let your heart your spirit take over with the understanding it is done The Creator wants you to know you do not repeatedly need to be forgiven for the same crime You have been forgiven so you are to go on as He intended He created us to be happy so that is what you will do And you are to be sure you forgive others for their crimes against you That is just how it works **Living**

ethics is a field that addresses a range of moral and existential issues that are not easily treated. Many of these issues may be said to belong to the philosophical context in which eternal questions are gathered and reflected upon. The first chapters highlight the concepts of ethical competence and critical thinking. In the following chapters the concept of ethical competence is analyzed with regard to teachers' objectives and to students' texts respectively. These chapters pursue a more practice-related approach and highlight specific challenges identified from both teacher and student perspectives. Next, the book raises the issue of global responsibility. What kind of critical issues arise when handling such matters at school? Further, can contemporary moral philosophers contribute to such a discussion? In turn, the book discusses the role of statistical analyses with regard to national tests while the closing chapters present international perspectives on the book's main themes and concluding remarks. The book's critical yet constructive approach to issues regarding assessment in ethics education makes a valuable contribution to an ongoing debate among researchers as well as to the everyday communication on testing in schools and classrooms. As such, it will appeal to scholars in ethics education and researchers in the field of assessment as well as educators and teachers interested and engaged in the task of testing ethics in school contexts where curricular demands for valid and authoritative evaluation may provide important guidelines but may also pose challenges of their own.
