Histopathology Reporting Guidelines For Surgical Cancer:

Histopathology Reporting Derek C Allen, 2013-06-29 Histopathology Reporting Guidelines for Surgical Cancer provides an easily comprehensible and practicable framework for standardised histopathology reports in surgical cancer. The book details the gross description, histological classification, tumour differentiation, extent of local tumour spread, involvement of lymphovascular channels, lymph nodes and excision margins of the common carcinomas and also summarises non carcinomatous malignancies. The 5th edition TNM classification of cancers is incorporated with comments on any associated pathology, diagnostic clues and prognostic criteria. Staging information is supplemented visually by line diagrams. The aim of Histopathology Reporting Guidelines for Surgical Cancer is to be educative and applied. The book emphasises those gross and histological features that are relevant to clinical management and prognosis, uses a systematic and analytical approach to the description of surgical pathology specimens, resulting in focused histopathology reports, acts as a companion or aide memoire for routine reporting of the common cancers and also lists diagnostic options and summary features of rarer cancers, facilitates audit of specimen type and quality and gives guidance for pathological, surgical and oncological practice. Derek Allen is Honorary Senior Lecturer and Consultant in Histopathology and Cytology at the Belfast City Hospital, Belfast, UK.

Histopathology Reporting David P. Boyle, Derek C. Allen, 2020-03-23 This book is an easily comprehensible and practicable framework for standardised histopathology reports in surgical cancer. The pathological features of the common carcinomas are detailed and non carcinomatous malignancies are also summarised. 8th edition TNM and WHO classifications of cancers are incorporated with comments on any associated pathology, diagnostic clues and prognostic criteria, supplemented visually by line diagrams. Each chapter's introduction gives epidemiological, clinical, investigative and treatment summary details. Other pathology includes updated immunophenotypic expression and molecular techniques. The impact of these ancillary investigations on diagnosis and as biomarkers of prognosis and prediction of response to treatment is summarised, as is the effect of adjuvant treatments on cancers. Experience-based clues are given throughout as aids to tumour typing, grading, staging and gauging prognosis and response to treatment. Histopathology Reporting Guidelines for Surgical Cancer, Fourth Edition, is invaluable for trainee and consultant diagnostic histopathologists all over the world, equipping the reader to produce high quality, clinically appropriate histopathology reports and to participate in contemporary multidisciplinary team management of patients with surgical cancer.

Histopathology Specimens Derek C Allen, R. Iain Cameron, 2007-06-21 Covering anatomical, clinical, pathological and laboratory aspects of surgical histopathology specimens, this book relates specimen dissection and its clinical context to relevant histopathology reports and therefore a more comprehensive patient prognosis and management is possible. Histopathology Specimens: Clinical, Pathological and Laboratory Aspects explains pathological and clinical terminology, including a glossary of clinical request form abbreviations. It offers a standardised step-wise approach to specimen handling, illustrated by simple line diagrams and highlights essentials.

of the histopathology report relating them to appropriate specimen dissection This book will act as a reference tool for the medical trainee in histopathology and the biomedical scientist and as a useful aide memoire for the histopathology consultant
