American Artists Engage the Built Environment, 1960-1979 Susanneh Bieber, 2023-07-31 This volume reframes the development of US American avant garde art of the long 1960s from minimal and pop art to land art conceptual art site specific practices and feminist art in the context of contemporary architectural discourses Susanneh Bieber analyzes the work of seven major artists Donald Judd Robert Grosvenor Claes Oldenburg Robert Smithson Lawrence Weiner Gordon Matta Clark and Mary Miss who were closely associated with the formal aesthetic innovations of the period While these individual artists came to represent diverse movements Bieber argues that all of them were attracted to the field of architecture the work of architects engineers preservationists landscape designers and urban planners because they believed these practices more directly shaped the social and material spaces of everyday life This book's contribution to the field of art history is thus twofold First it shows that the avant garde of the long 1960s did not simply develop according to an internal logic of art but also as part of broader sociocultural discourses about buildings and cities Second it exemplifies a methodological synthesis between social art history and poststructural formalism that is foundational to understanding the role of art in the construction of a more just and egalitarian society The book will be of interest to scholars working in art history architecture urbanism and environmental humanism **The Making of Urban America** John William

Stern, David Fishman, Jacob Tilove, 2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb a phenomenon that

originated in England in the late eighteenth century was quickly adopted in the United States and northern Europe and gradually proliferated throughout the world. These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar, train, and automobile. Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning. Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature.

Paradise Planned is the comprehensive encyclopedic record of this movement, a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape. **American Architecture** Leland M. Roth, 2018-05-04. More than fifteen years after the success of the first edition, this sweeping introduction to the history of architecture in the United States is now a fully revised guide to the major developments that shaped the environment from the first Americans to the present, from the everyday vernacular to the high style of aspiration. Eleven chronologically organized chapters chart the social, cultural, and political forces that shaped the growth and development of American towns, cities, and suburbs while providing full description, analysis, and interpretation of buildings and their architects. The second edition features an entirely new chapter detailing the green architecture movement and architectural trends in the 21st century. Further updates include an expanded section on Native American architecture and contemporary design by Native American architects, new discussions on architectural education and training, more examples of women architects and designers, and a thoroughly expanded glossary to help today's readers. The art program is expanded, including 640 black and white images and 62 new color images. Accessible and engaging, **American Architecture** continues to set the standard as a guide, study, and reference for those seeking to better understand the rich history of architecture in the United States.

Latin American Modern Architectures Patricio del Real, Helen Gyger, 2013-06-03. **Latin American Modern Architectures: Ambiguous Territories** has thirteen new essays from a range of distinguished architectural historians to help you understand the region's rich and varied architecture. Covering urban and territorial histories from the nineteenth and twentieth centuries along with detailed building analyses, this book is your best source for historical and critical essays on a sampling of Latin America's diverse architecture, providing much-needed information on key case studies. Flaherty, María González, Pend's Cristina López Uribe, Hugo Mondragón, López Jorge Nudelman, Blejwas, Hugo Palmarola, Sagredo, Gaia Piccarolo, Claudia Schmidt, Daniel Talesnik, and Paulo Tavares.
