A History of China Wolfram Eberhard, 1969 [A History of China, by Wolfram Eberhard](#) Wolfram Eberhard, 1960 **A History of China** Wolfram Eberhard, 1950 This is a pre 1923 historical reproduction that was curated for quality. Quality assurance was conducted on each of these books in an attempt to remove books with imperfections introduced by the digitization process. Though we have made best efforts, the books may have occasional errors that do not impede the reading experience. We believe this work is culturally important and have elected to bring the book back into print as part of our continuing commitment to the preservation of printed works worldwide. *History of China* Wolfram Eberhard, 2014-10-12 Great information about one of the oldest and greatest civilizations China **A history of china, by wolfram eberhard** Wolfram Eberhard, 1948 [A History of China.](#) Wolfram Eberhard, 2017-06-03 Chapter One PREHISTORY 1 Sources for the earliest history Until recently we were dependent for the beginnings of Chinese history on the written Chinese tradition. According to these sources China's history began either about 4000 B.C. or about 2700 B.C. with a succession of wise emperors who invented the elements of a civilization such as clothing, the preparation of food, marriage, and a state system; they instructed their people in these things and so brought China as early as in the third millennium B.C. to an astonishingly high cultural level. However, all we know of the origin of civilizations makes this of itself entirely improbable; no other civilization in the world originated in any such way. As time went on, Chinese historians found more and more to say about primeval times. All these narratives were collected in the great imperial history that appeared at the beginning of the Manchu epoch. That book was translated into French, and all the works written in Western languages until recent years on Chinese history and civilization have been based in the last resort on that translation. Modern research has not only demonstrated that all these accounts are inventions of a much later period but has also shown why such narratives were composed. The older historical sources make no mention of any rulers before 2200 B.C.; no mention even of their names. The names of earlier rulers first appear in documents of about 400 B.C.; the deeds attributed to them, and the dates assigned to them, often do not appear until much later. Secondly, it was shown that the traditional chronology is wrong and another must be adopted, reducing all the dates for the more ancient history before 900 B.C. Finally, all narratives and reports from China's earliest period have been dealt a mortal blow by modern archaeology with the excavations of recent years. There was no trace of any high civilization in the third millennium B.C. and indeed we can only speak of a real Chinese civilization from 1300 B.C. onward. The peoples of the China of that time had come from the most varied sources; from 1300 B.C. they underwent a common process of development that welded them into a new unity. In this sense, and emphasizing the cultural aspects, we are justified in using from then on a new name, Chinese, for the peoples of China. Those sections, however, of their ancestral populations who played no part in the subsequent cultural and racial fusion we may fairly call non-Chinese. This distinction answers the question that continually crops up: whether the Chinese are autochthonous. They are autochthonous in the sense that they formed a unit in

History of China Wolfram Eberhard,2017-03-26 The official dynastic histories apply to the course of Chinese history the criterion of Confucian ethics for them history is a textbook of ethics designed to show by means of examples how the man of high character should behave or not behave We have to go deeper and try to extract the historic truth from these records Many specialized studies by Chinese Japanese and Western scholars on problems of Chinese history are now available and of assistance in this task **On the Causes of Economic Growth** Carlos Sabillon,2008 What s the secret Can policies grow the economy How do leaders make their countries prosper Since the earliest of times humans have endeavored to uncover the causes of prosperity Step by step Sabillon tests the principal theories on the causes of economic growth against the facts of history Here for the first time the economic statistics of the world are presented in a rationalized format that allows for an easy comparison across countries and through time with a challenge to those who study them What do the statistics show and what are the trends beyond cherished theories that suit various political purposes Tested against the historical data textbook ideas and theories consistently come up short Such analyses are highly troubling because they reveal an absence of correlation between theory and reality The data statistics illustrating the development of the world economy during the last several centuries was extracted from economic history and economic history books from publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish Only decisive intervention in support of manufacturing and technological advancement can provide growth This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today s politically correct debates A History of China Wolfram Eberhard,2019-11-20 In A History of China Wolfram Eberhard offers a

History of China Various, 2021-06-23 This 11-volume set gathers together some key older titles on China's history. Encompassing China's political, economic, and cultural development, the books gathered here also deal with contacts with the West, both ancient and modern. **Demystifying China** Naomi Standen, 2013 For westerners, China's history is often reduced to a choice between timeless Confucian ideals or incomprehensible barbarisms such as footbinding or mass

slaughter fueled by generalizations such as China has five thousand years of history China was a Confucian society Chinese women were victims China is a communist country and many more But China is now too globally important to allow such oversimplifications to continue unchallenged and this engaging and deeply knowledgeable volume counters them vigorously In concise and accessible style the contributors scrutinize a range of historical misconceptions that have ramifications for the present and future of China and its relations with the rest of the world They consider how misunderstandings have arisen and present more sophisticated and nuanced interpretations Readers will learn how numerous popular beliefs about China's history are mistaken and what new interpretations can help build the more accurate understandings of present day China that we so badly need By explicitly addressing common misconceptions the book persuades readers to reexamine their assumptions about China's history and thus China in general and begin to see it as a real rather than largely imagined place Contributions by Elif Ak etin Bridie Andrews Tim Barrett Felix Boecking Michael C Brose Marjorie Dryburgh Imre Galambos Stanley E Henning Christian Hess Clara Wing chung Ho Judd Kinzley Fabio Lanza Peter Lorge Julia Lovell Rana Mitter Barbara Mittler Ruth Mostern Peter C Perdue Hai Ren Andres Rodriguez Tansen Sen Elliot Sperling Naomi Standen Wasana Wongsurawat and Ling Zhang
