History Of The Middle East Core Knowledge Foundation

History Of The Middle East Core Knowledge Foundation:

The Oxford Handbook of Contemporary Middle Eastern and North African History Jens Hanssen, Amal N. Ghazal, 2020-11-30 The Oxford Handbook of Contemporary Middle Eastern and North African History critically examines the defining processes and structures of historical developments in North Africa and the Middle East over the past two centuries. The Handbook pays particular attention to countries that have leapt out of the political shadows of dominant and better studied neighbours in the course of the unfolding uprisings in the Middle East and North Africa. These dramatic and interconnected developments have exposed the dearth of informative analysis available in surveys and textbooks particularly on Tunisia, Libya, Yemen, Bahrain and Syria.

Educational Leadership Pat Williams-Boyd, 2002-04-03 An objective discussion of educational leadership from both inside and outside the school system focusing on ethical issues, dominant models and today's unprecedented commitment to community involvement. During the last decade of the 20th century, the United States entered a new era of educational leadership. The seat of educational authority shifted from the district office to the individual school from the principal as manager to the stakeholders: students, teachers, families, community members, school boards, politicians and corporate and philanthropic foundations. In *Educational Leadership*, educator Pat Williams Boyd traces these changes from their roots in the 19th century to the present day. She shows readers what leadership looks like when it is distributed throughout a community and explains how collaborative relationships can be forged. She also examines techniques for effective leadership during the hazardous process of school reform and presents a critical discussion of 20 leading school reform models.

[Taking Religion Seriously Across the Curriculum](#) Warren A. Nord, Charles C. Haynes, 1998-08-15 The authors chart a middle course in our war over religion and public education: one that builds on a developing national consensus among educational and religious leaders. While it is not proper for schools to practice religion or proselytize, neither is it permissible to make them religion-free zones. Schools do not take religion seriously as the authors' review of textbooks and the new national content standards makes clear. In Part One, they outline the civic, constitutional and educational frameworks that should shape the treatment of religion in the curriculum and classroom. In Part Two, they explore major issues relating to religion in different domains of the curriculum in elementary education and in middle and high school courses in history, civics, economics, literature and the sciences. They also discuss Bible courses and world religions courses and explore the relationship of religion to moral education and sex education.
