complex spaces which make up our social media should be conceptualised as important terrains upon which neoliberal and postfeminist subjectivities can be both reproduced and subverted In doing so the book explores many key issues underpinning current debates around gender politics and digital media including gendered spatial politics visibility surveillance and regulation beauty politics and civic and political engagement and activism Over the last decade the position of girls and young women within the digital landscape of social media has been a topic of much debate On the one hand girls social media practices are presented as a key site of concern wherein new digital technologies are said to have produced an intensification of individualised neoliberal and postfeminist identities Conversely others have championed access to social media for young people as a potentially useful political tool enabling previously marginalised political subjects such as girls to access and participate within new and exciting political cultures Locating itself at the intersection of these two approaches this book offers a fresh contribution to these debates Based upon the findings from focus groups with girls and young women aged between 12 and 18 in England the book offers an in depth analysis of the digital cultures that emerged from the study This timely book will be essential reading for anyone interested in contemporary femininity and feminism and the role of digital media in the production of cultural political and gendered identities
