Materialisms and Environmental Education David A. G. Clarke, Jamie McPhie, 2023-07-24 New materialisms refers to a broad contemporary and significant movement of thought across the social sciences and cultural studies which attempts to return to renew or create alternative philosophies of matter. Such philosophies spring from multiple sources but are in general an attempt to bring the indissolubility of the social and environmental more forcefully into our analytical frames and modes of inquiry and tackle a perceived over reliance on discourse and language in the so called post modern era of philosophy and social science. This movement in thought is underlaid by and meets up with the climate and biodiversity crises and the nature of the human condition and modes of learning or becoming within the field of environmental education. This volume brings together academics working at differing intersections of environmental education and new materialisms highlighting tensions, knots and lines of flight across and for research practice and theory. As such, this collection draws on multiple interpretations and streams of thought within new materialisms and demonstrates their significance for those engaging with environmental education policy practice and research. This book was originally published as a special issue of the journal *Environmental Education Research*.
