Hiroshima The Story Of The First Atom Bomb:

Hiroshima Clive Lawton, 2004 Provides an historical account of the events surrounding the bombings of Hiroshima and Nagasaki in 1945 during World War II discussing the long term repercussions and the overall results from a military standpoint Hiroshima John Hersey, 2020-06-23 Pulitzer Prize winning journalist and bestselling author John Hersey's seminal work of narrative nonfiction which has defined the way we think about nuclear warfare One of the great classics of the war The New Republic that tells what happened in Hiroshima during World War II through the memories of the survivors of the first atomic bomb ever dropped on a city The perspective Hiroshima offers from the bomb's actual victims is the mandatory counterpart to any Oppenheimer viewing GQ Magazine Nothing can be said about this book that can equal what the book has to say It speaks for itself and in an unforgettable way for humanity The New York Times Hiroshima is the story of six human beings who lived through the greatest single manmade disaster in history John Hersey tells what these six a clerk a widowed seamstress a physician a Methodist minister a young surgeon and a German Catholic priest were doing at 8 15 a.m. on August 6 1945 when Hiroshima was destroyed by the first atomic bomb ever dropped on a city Then he follows the course of their lives hour by hour day by day The New Yorker of August 31 1946 devoted all its space to this story The immediate repercussions were vast newspapers here and abroad reprinted it during evening half hours it was read over the network of the American Broadcasting Company leading editorials were devoted to it in uncounted newspapers Almost four decades after the original publication of this celebrated book John Hersey went back to Hiroshima in search of the people whose stories he had told His account of what he discovered about them the variety of ways in which they responded to the past and went on with their lives is now the eloquent and moving final chapter of Hiroshima **Trinity: A Graphic History of the First Atomic Bomb** Jonathan Fetter-Vorm, 2012 An illustrated history of the making of the atomic bomb **The First Atomic Bomb** Jim Mangi, 2022-06-20 While German and Japanese scientists also labored unsuccessfully to create an atomic bomb by the summer of 1945 the American led team was ready to test its first weapon As the clock ticked down to the detonation time of 05 30 hours on 16 July 1945 the nervous team of technicians and scientists waited ten miles away from Ground Zero deep in the New Mexico desert No one knew how powerful the explosion would be or whether even at such a distance they would be safe from the blast Even so some chose to observe the detonation from a point four miles nearer at the control bunker but then no one was even sure that the bomb would work What if that is actually what happened Under schedule pressure from the White House the scientists assembled the device in part with tape and tissue paper knowing some components were flawed These are verifiable facts It means that as many of those who gathered in the New Mexico desert feared at the time the bomb might not have worked during that first test In The First Atomic Bomb Jim Mangi explores what might happened in the event that the world's first atomic bomb had not been ready for use when it was How would this have affected the end of the war in the Pacific and indeed the Second World War as a whole Would Emperor Hirohito's armed

forces have battled on When might Colonel Paul W Tibbets at the controls of his Boeing B 29 Superfortress Enola Gay have then made his historic flight over Hiroshima and would that city even have remained the target How would Stalin and the Soviets have reacted to such developments and how would this have played out in the post war world **Bulletin of the Atomic Scientists** ,1987-11 **The Story of the Atomic Bomb** Natalie M. Atomic Bomb Island Don A. Farrell, 2021-01-15 Atomic Bomb Island tells the story of an elite top secret team of sailors airmen scientists technicians and engineers who came to Tinian in the Marianas in the middle of 1945 to prepare the island for delivery of the atomic bombs then being developed in New Mexico to finalize the designs of the bombs themselves and to launch the missions that would unleash hell on Japan Almost exactly a year before the atomic bombs were dropped strategically important Tinian was captured by Marines because it was only 1 500 miles from Japan and its terrain afforded ideal runways from which the new B 29 bombers could pound Japan In the months that followed the U S turned virtually all of Tinian into a giant airbase with streets named after those of Manhattan Island a Marianas city where the bombs could be assembled the heavily laden B 29s could be launched and the Manhattan Project scientists could do their last work Don

Farrell has done this story incredible justice for the 75th anniversary The book is a thoroughly researched beautifully illustrated mosaic of the final phase of the Manhattan Project from the Battle of Tinian and the USS Indianapolis to Hiroshima and Nagasaki *Our First Atom Bomb* Borsch Frederick Borsch, Frederick Borsch, 2009-11 What could it have been like to press the switch that dropped the world's first atomic bomb What might have been going through the head of the All American young man who had that responsibility on the Enola Gay Complete with interviews with people like Colonel Paul Tibbets and those who knew Curtis LeMay and Tokyo Rose this re-creation tells of the entire six hours that the mission took from take off at Tinian to that awesome moment over Hiroshima From an interview with Dr Theodore McCluskey S J I try to imagine being in his front seat position Can you imagine putting anyone into that position Making any human being responsible for that Such power over death and life No wonder he was mixed up No wonder he wanted to think up a plan B or how did he put it to try to reshuffle the cards I can understand why you and he would want to imagine things differently Imagination is needed if we are going to see other possibilities in time of war *The Age of Hiroshima* Michael D. Gordin, G. John Ikenberry, 2020-01-14 A multifaceted portrait of the Hiroshima bombing and its many legacies On August 6 1945 in the waning days of World War II the United States dropped an atomic bomb on the Japanese city of Hiroshima The city's destruction stands as a powerful symbol of nuclear annihilation but it has also shaped how we think about war and peace the past and the present and science and ethics The Age of Hiroshima traces these complex legacies exploring how the meanings of Hiroshima have reverberated across the decades and around the world Michael D Gordin and G John Ikenberry bring together leading scholars from disciplines ranging from international relations and political theory to cultural history and science and technology studies who together provide new perspectives on Hiroshima as both a historical event and a cultural phenomenon As an event Hiroshima emerges in the flow of decisions and hard choices surrounding the bombing and its aftermath As a phenomenon it marked a revolution in science politics and the human imagination the end of one age and the dawn of another The Age of Hiroshima reveals how the bombing of Hiroshima gave rise to new conceptions of our world and its precarious interconnectedness and how we continue to live in its dangerous shadow today **Hiroshima Nagasaki** Paul Ham, 2014-08-05 In this harrowing history of the Hiroshima and Nagasaki bombings Paul Ham argues against the use of nuclear weapons drawing on extensive research and hundreds of interviews to prove that the bombings had little impact on the eventual outcome of the Pacific War More than 100 000 people were killed instantly by the atomic bombs mostly women children and the elderly Many hundreds of thousands more succumbed to their horrific injuries later or slowly perished of radiation related sickness Yet American leaders claimed the bombs were our least abhorrent choice and still today most people believe they ended the Pacific War and saved millions of American and Japanese lives In this gripping narrative Ham demonstrates convincingly that misunderstandings and nationalist fury on both sides led to the use of the bombs Ham also gives powerful witness to its destruction through the eyes of eighty survivors from twelve year olds forced to work in war
