orator and politician from Nebraska 1860 1925 **The Presbyterian Controversy** Bradley J. Longfield, 1993-11-25 From 1922 to 1936 the Presbyterian Church in the U S A was torn by conflict Fundamentalists led by Clarence E Macartney William Jennings Bryan and J Gresham Machen modernists guided by Henry Sloane Coffin and moderates directed by Charles R Erdman and Robert E Speer struggled over theological questions and their implications for such issues as ordination requirements the role of Princeton Theological Seminary and foreign missions The church managed to maintain its institutional unity at the height of the conflict in the mid 1920s but the struggle resulted in a loosening of the church s doctrinal standards the reorganization of Princeton Seminary the founding of Westminster Theological Seminary and the eventual birth of the Presbyterian Church of America Weaving together the history of this ecclesiastical conflict with biographies of the six leaders Longfield shows that theological concerns though primary were not the only issues in the struggle He demonstrates that social and cultural considerations profoundly contributed to the roles of the leaders and to the outcome of the conflict Finally Longfield traces the current decline of the Presbyterian Church and other mainline

denominations back to this period arguing that by embracing doctrinal pluralism they undermined the very foundations of their mission to the world He concludes that renewal can only be based on a biblical and creedal faith distinct from the values and norms of the surrounding culture Summer for the Gods Edward J Larson,2020-06-16 The Pulitzer Prize winning history of the Scopes Trial and the battle over evolution and creation in America s schools In the summer of 1925 the sleepy hamlet of Dayton Tennessee became the setting for one of the twentieth century s most contentious courtroom dramas pitting William Jennings Bryan and the anti Darwinists against a teacher named John Scopes represented by Clarence Darrow and the ACLU in a famous debate over science religion and their place in public education That trial marked the start of a battle that continues to this day in cities and states throughout the country Edward Larson s classic Summer for the Gods winner of the Pulitzer Prize in History is the single most authoritative account of this pivotal event An afterword assesses the state of the battle between creationism and evolution and points the way to how it might potentially be resolved **The Scopes "Monkey Trial"** Randy Moore,2022-11-07 This book introduces readers to the Trial of the Century revealing how the trial originated what caused and happened during and after the trial what happened to the trial s participants and why the trial still matters nearly 100 years later Ongoing controversies about school curricula such as the teaching of Critical Race Theory and the role of parents in public education can all be traced to the Scopes Trial Today the question remains who controls the school curriculum This was a foundational issue in the Scopes Trial and we have been debating this question ever since This book will help readers understand where these controversies originated and how courts politicians and the public handled these issues nearly a century ago Featuring new information from previously untapped sources and providing an in depth study of John Scopes himself this book interrogates the facts fictions and legend of the Scopes Trial which historians rank as one of the defining events of the 20th century It is an ideal resource for anyone interested in the ongoing controversy about evolution science and religion in education and American life **Avenues of Faith** Samuel Claude Shepherd,2001-05-15 The first thorough study of organized mainline churches in a major southern American city during the early 20th century **A Dangerous Idea** Debbie Levy,2025-01-14 One hundred years ago a small town science teacher ignited a nationwide debate over what students should learn in school and who should decide Compelling School Library Journal starred review Timely Booklist starred review Insightful Horn Book starred review A Junior Library Guild Gold Standard Selection In 1925 when Tennessee lawmakers banned the teaching of evolution in public schools teacher John Scopes challenged the law and set off a gripping circus of a legal battle Two masterminds faced off in a blistering courtroom debate over creationism and natural selection each armed with the books they believed belonged in classrooms Celebrity politician William Jennings Bryan relied on the Bible to make his case while legal luminary Clarence Darrow defended Charles Darwin s groundbreaking books On the Origin of Species and The Descent of Man Their clash would go down in history as the Scopes Monkey Trial A century later here is the riveting truth of what happened and why it matters For a

nation still arguing about the books and ideas that young people should encounter award winning author Debbie Levy delivers an important insightful and expertly researched account of our history that illuminates the challenges we face today

Disfellowshipped Gerald W. King, 2011-08-05 Employing studies in population ecology as a framework for understanding the growth of religious movements Disfellowshipped traces the growth of the Pentecostal movement The author explores how the Pentecostal movement developed in relationship to Fundamentalism from its roots in the Holiness movement to the formation of the National Association of Evangelicals Particular attention is given to the various critiques and rebuttals exchanged between Fundamentalists and Pentecostals exploring how these two movements influenced and shaped one another This book shows how despite their mutual antagonism these two movements held far more in common than in contrast This book will be of great importance to all those interested in the history of Fundamentalism and the rise of Pentecostalism

The Emergence of the New South, 1913-1945 George Brown Tindall, 1967-11-01 The history of the South in this century has been obscured in the ever growing mass of information about the region s rapid change and turbulent development In this book Volume X of A History of the South the historical image of the modern South is brought into full focus for the first time George Brown Tindall presents a thorough and well balanced historical narrative of the region during the years 1913 1945 when the South underwent a transformation from a predominantly agricultural area to one of growing industrialization The inauguration of President Woodrow Wilson ended a half century of political isolation for the South and ushered in an era of agrarian reforms prohibition woman suffrage industrial growth and recurring crises for Southern farmers During the 1920 s the South was caught in a contrast of urban booms and farm distress There were flareups of racial violence and the Ku Klux Klan was revived Mr Tindall devotes considerable attention to the Southern literary renaissance which produced William Faulkner Thomas Wolfe and many other notable writers and critics The Emergence of the New South provides a new understanding of the changing political and social climate in the South under the stresses of depression the New Deal the labor movement Negro unrest and two world wars

Trying Biology Adam R. Shapiro, 2013-05-21 In Trying Biology Adam R Shapiro convincingly dispels many conventional assumptions about the 1925 Scopes monkey trial Most view it as an event driven primarily by a conflict between science and religion Countering this Shapiro shows the importance of timing the Scopes trial occurred at a crucial moment in the history of biology textbook publishing education reform in Tennessee and progressive school reform across the country He places the trial in this broad context alongside American Protestant antievolution sentiment and in doing so sheds new light on the trial and the historical relationship of science and religion in America For the first time we see how religious objections to evolution became a prevailing concern to the American textbook industry even before the Scopes trial began Shapiro explores both the development of biology textbooks leading up to the trial and the ways in which the textbook industry created new books and presented them as responses to the trial Today the controversy continues over textbook warning labels making Shapiro s

study particularly as it plays out in one of America's most famous trials an original contribution to a timely discussion

Interior, 1922 **In the Beginning** Michael Lienesch, 2007-04-23 The current controversy over teaching evolution in the public schools has grabbed front page headlines and topped news broadcasts all across the United States In the Beginning investigates the movement that has ignited debate in state legislatures and at school board meetings Reaching back to the origins of antievolutionism in the 1920s and continuing to the promotion of intelligent design today Michael Lienesch skillfully analyzes one of the most formidable political movements of the twentieth century Applying extensive original sources and social movement theory Lienesch begins with fundamentalism describing how early twentieth century fundamentalists worked to form a collective identity to develop their own institutions and to turn evolution from an idea into an issue He traces the emerging antievolution movement through the 1920s examining debates over Darwinism that took place on college campuses and in state legislatures throughout the country With fresh insights and analysis Lienesch retells the story of the 1925 Scopes monkey trial and reinterprets its meaning In tracking the movement from that time to today he explores the rise of creation science in the 1960s the alliance with the New Christian Right in the 1980s and the development of the theory of intelligent design in our own time He concludes by speculating on its place in the politics of the twenty first century In the Beginning is essential for understanding the past present and future debates over the teaching of evolution

The Other Side of the Scopes Monkey Trial Jerry Bergman, 2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin's theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution's philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and Nebraska man Scopes was not a biology teacher but rather taught math His college degree was not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals
