Historical Ecology Of Malaria In Ethiopia Depositing The Spirits Ecology History:

The Historical Ecology of Malaria in Ethiopia James C. McCann, 2015-07-15 Malaria is an infectious disease like no other it is a dynamic force of nature and Africa's most deadly and debilitating malady James C McCann tells the story of malaria in human narrative terms and explains the history and ecology of the disease through the science of landscape change All malaria is local Instead of examining the disease at global or continental scale McCann investigates malaria's adaptation and persistence in a single region Ethiopia over time and at several contrasting sites Malaria has evolved along with humankind and has adapted to even modern day technological efforts to eradicate it or to control its movement Insecticides such as DDT drug prophylaxis development of experimental vaccines and even molecular level genetic manipulation have proven to be only temporary fixes The failure of each stand alone solution suggests the necessity of a comprehensive ecological understanding of malaria its transmission and its persistence one that accepts its complexity and its local dynamism as fundamental features The story of this disease in Ethiopia includes heroes heroines witches spirits and a very clever insect as well as the efforts of scientists in entomology agroecology parasitology and epidemiology Ethiopia is an ideal case for studying the historical human culture of illness the dynamism of nature's disease ecology and its complexity within malaria

The Palgrave Handbook of African Colonial and Postcolonial History Martin S. Shanguhya, Toyin Falola, 2018-01-28 This wide ranging volume presents the most complete appraisal of modern African history to date It assembles dozens of new and established scholars to tackle the questions and subjects that define the field ranging from the economy the two world wars nationalism decolonization and postcolonial politics to religion development sexuality and the African youth experience Contributors are drawn from numerous fields in African studies including art music literature education and anthropology The themes they cover illustrate the depth of modern African history and the diversity and originality of lenses available for examining it Older themes in the field have been treated to an engaging re assessment while new and emerging themes are situated as the book's core strength The result is a comprehensive vital picture of where the field of modern African history stands today *A Primer for Teaching Indian Ocean World History* Edward A. Alpers, Thomas F. McDow, 2024-04-05 A Primer for Teaching Indian Ocean World History is a guide for college and high school teachers who are teaching Indian Ocean histories for the first time or for experienced teachers who want to reinvigorate their courses **Malaria on the Move** Kundai Manamere, 2025-04-01 Malaria on the Move explores the socioeconomic aspects of endemic malaria in the southeastern lowveld of Zimbabwe The book provides a historical analysis of malaria control and eradication programs in Rhodesia and independent Zimbabwe from the late nineteenth century to 2015 Kundai Manamere draws connections between malaria epidemiology and human mobility relating to large and small scale farming labor migration colonial displacement war and rural to urban movements She examines how circular labor migration and rural travel influence the risk of malaria for individuals and communities and shows how migration and travel

have spread the disease and impeded control efforts More importantly the book demonstrates that the need to travel for work is an indicator of a local hierarchy of priorities It reaffirms the urgent need for partners in malaria control to consider local socioeconomic factors in the design and implementation of intervention programs The inclusion of local contexts perspectives and voices in formulating national and global public health policies and interventions is critical to addressing public noncooperation To date biomedical studies of malaria outnumber socioeconomic and political studies of the disease Manamere advocates for a multipronged approach that goes beyond standard scientific research methods Her approach incorporates how socioeconomic considerations of recipient communities influence malaria epidemiology local perceptions of the disease and responses to interventions This context is particularly important for understanding why malaria has remained a global health challenge and why so many interventions have failed Scientifically malaria is a disease of the landscape and its ecological complexity poses challenges to its eradication Yet biological and ecological landscapes are not exclusive factors in the spread of disease as Manamere demonstrates the socioeconomic environment is equally important

Social and Ecological System Dynamics Krystyna Stave, Goraw Goshu, Shimelis Aynalem, 2017-04-06 This book is a social ecological system description and feedback analysis of the Lake Tana Basin the headwater catchment of the Upper Blue Nile River This basin is an important local national and international resource and concern about its sustainable development is growing at many levels Lake Tana Basin outflows of water sediments nutrients and contaminants affect water that flows downstream in the Blue Nile across international boundaries into the Nile River the lake and surrounding land have recently been proposed as a UNESCO Biosphere Reserve the basin has been designated as a key national economic growth corridor in the Ethiopian Growth and Transformation Plan In spite of the Lake Tana Basin s importance there is no comprehensive integrated system wide description of its characteristics and dynamics that can serve as a basis for its sustainable development This book presents both the social and ecological characteristics of the region and an integrated system wide perspective of the feedback links that shape social and ecological change in the basin Finally it summarizes key research needs for sustainable development

Challenging Malaria Byron B. Carson, III, 2023-09-27 Five years after Ronald Ross discovered the link between malaria and mosquitos American entomologist Leland Howard wrote of the mosquito evil that occurs when everybody s business is nobody s business Howard s insight was largely ignored but it captures what social scientists now refer to as the problem of collective action When this problem persists in the context of malaria individuals under provide prevention and suffer from a higher prevalence of malaria Imagine a group of people trying to drain a pond where mosquitoes breed Everyone in the group faces an incentive to free ride which can hinder their drainage efforts Thus when people fail to resolve issues related to collective action they submit to the mosquito evil and potentially to malaria This book explores Howard s logic the economics of collective action and the history epidemiology and public health of malaria to analyze the conditions under which people privately resolve collective action problems associated with mosquito abatement

and malaria prevention Generally people are more likely to resolve these problems when the benefits of abatement and prevention outweigh the costs This logic is developed into a framework and applied to historical and modern day issues related to malaria including the lack or abundance of private prevention in the United States and in developing areas malaria's resurgence in countries like China Venezuela and Bangladesh and the difficulties of large scale insecticide treated bed net campaigns Given this framework we should develop a greater appreciation for entrepreneurial responses civil society market processes and private forms of collective action

Outbreak! Beth Skwarecki, 2016-10-01 From ancient scourges to modern day pandemics Throughout history even recent history highly contagious deadly and truly horrible epidemics have swept through cities countryside and even entire countries Outbreak catalogs fifty of those incidents in gruesome detail including The Sweating Sickness that killed 15 000 including Henry VIII's older brother Syphilis the French Disease which spread throughout Europe in the late fifteenth century The romantic disease tuberculosis featured in La Bohème La Traviata and Les Misérables The worldwide outbreak of influenza in 1918 which killed 3 percent of the population The mysterious appearance of HIV in the 1980s The devastating spread of Ebola in West Africa in 2014 From ancient outbreaks of smallpox and plague to modern epidemics such as SARS and Ebola the stories capture the mystery and devastation brought on by these diseases It's a sickeningly fun read that confirms the true definition of going viral

Medizin und Herrschaft Manuela Bauche, 2017-06-08 Malaria fand um 1900 eine enorme Beachtung durch europäische Kolonialmächte und Mediziner galt sie doch als Bedrohung für den weißen Mann und sein koloniales Projekt Malaria kam damals aber auch in Teilen Deutschlands vor Manuela Bauche zeichnet nach wie die Behörden in drei Gebieten des Deutschen Kaiserreichs in Kamerun Deutsch Ostafrika und Ostfriesland versuchten gegen lokalen Widerstand Maßnahmen zur Malariabekämpfung durchzusetzen Sie kann dabei zeigen dass das medizinische Vorgehen sowohl in den Kolonien als auch in Deutschland mit dem Ausbau staatlicher Herrschaft mit Rassismus und Trennung entlang von Klasse verbunden war

Deposing the Malevolent Spirit James McCann, 2011

Malaria and Rome Robert Sallares, 2002-09-05 Malaria and Rome is the first comprehensive study of malaria in ancient Italy since the research of the distinguished Italian malariologist Angelo Celli in the early twentieth century It demonstrates the importance of disease patterns and history in understanding the demography of ancient populations Robert Sallares argues that malaria became increasingly prevalent in Roman times in central Italy as a result of ecological change and alterations to the physical landscapes such as deforestation Making full use of contemporary sources and comparative material from other periods he shows that malaria had a significant effect on mortality rates in certain regions of Roman Italy Robert Sallares incorporates all the important advances made in many relevant fields since Celli's time These include recent geomorphological research on the evolution of the coastal environments of Italy that were notorious for malaria in the past biomolecular research on the evolution of malaria ancient DNA as a new source of evidence for malaria in antiquity the differentiation of mosquito species that permits understanding of the phenomenon of anophelism

without malaria where the climate is optimal for malaria and Anopheles mosquitoes are present but there is no malaria and recent medical research on the interactions between malaria and other diseases The argument develops with a careful interplay between the modern microbiology of the disease and the Greek and Latin literary texts Both contemporary sources and comparative material from other periods are used to interpret the ancient sources In addition to the medical and demographic effects on the Roman population Malaria and Rome considers the social and economic effects of malaria for example on settlement patterns and on agricultural systems Robert Sallares also examines the varied human responses to and interpretations of malaria in antiquity ranging from the attempts at rational understanding made by the Hippocratic authors and Galen to the demons described in the magical papyri
