Sons of Gomer or Cymri the first Inhabitants of Britain While Alexander was overrunning the world by his arms and Greece was enlightening it with her arts Scotland lay hidden beneath the cloud of barbarism and had neither name nor place among the nations of the earth Its isolation however was not complete and absolute Centuries before the great Macedonian had commenced his victorious career the adventurous navigators of the Phoenician seaboard had explored the darkness of the hyperborean ocean The first to steer by the pole star they boldly adventured where less skillful mariners would have feared to penetrate Within the hazy confine of the North Sea they descried an island swathed in a mild if humid air and disclosing to the eye behind its frontier screen of chalk cliffs the pleasing prospect of wooded hills and far expanding meadows roamed over by numerous herds and inhabitants The Phoenicians oft revisited this remote and to all but themselves unknown shore but the enriching trade which they carried on with it they retained for centuries in their own hands Their ships might be seen passing out at the Pillars of Hercules on voyages of unknown destination and after the lapse of months they would return laden with the products of regions which had found as yet no name on the chart of geographer 3 But the source of this trade they kept a secret from the rest of the nations By and by however it began to be rumoured that the fleets seen going and returning on these mysterious voyages traded with an island that lay far to the north and which was rich in a metal so white and lustrous that it had begun to be used as a substitute for silver In this capacity it was employed now to lend a meretricious glitter to the robe of the courtesan and now to impart a more legitimate splendour to the mantle of the magistrate

Animal Genocide and its Aftermath Nicholas Chare, 2025-09-01 In this exacting assessment of the bounty policies enacted against the Tasmanian Tiger and the Newfoundland Wolf Animal Genocide and its Aftermath provides a much needed reappraisal of the legal political and social definition of animal killing Analyzing natural history collections and cultural representations this book advances a compelling case for viewing the bounty schemes as a form of genocide that requires its own historical reckoning Ethical issues regarding the evocation of animal genocide in film literature photography and museum exhibitions are also explored
