ABSTRACT

In this paper we provide a global description, in quantitative terms, of the developments in road safety research from the early 1900s until 2010. To this end, electronic databases have been searched and papers matching search criteria were selected for analysis. Word and co-word frequencies of key-words in all the titles and abstracts of these publications were collected and analysed. In this study, we explored the possibility to identify historical trends in road safety research topics. Furthermore we explored whether the important paradigms concerning the history of road safety research as presented in the literature can be confirmed on quantitative grounds. It is concluded that the first results are promising: varying trends over time could be identified in the selected topics, which are generally in line with the different road safety paradigms. Finally, a number of limitations of the present study are listed, including the incompleteness of the currently used dataset.

1. Introduction

Over time, a number of authors have provided overviews of road safety research. However, these reviews generally focused on either a limited time period, or on specific areas of interest. None of these covered the history of road safety research in a comprehensive and quantitative way.

Early reviews of road safety and traffic research are provided by [Glanville \(1955\)](#) and [Haight \(1964\)](#). Glanville described the increase in numbers of vehicles and an increasing traffic flow, accompanied by a growth of road casualties between 1910 and 1953, and summarized several lines of research in the area of speeds and stopping times at intersections, pedestrian crossings, motorcycle helmets, and slippery roads. [Haight \(1964\)](#) compiled an annotated bibliography of scientific research in road traffic and safety, containing about 250 publications on road safety published between 1915 and 1964 on various topics but with a focus on mathematical modeling and methodologically and statistically oriented papers. Finally, [Morm \(2007\)](#) has looked into road safety issues that had been topics in PIARC (Permanent International Association of Road Congresses) conferences in the period 1908–1938.

The more general history of transport has been the topic of a number of reviews published during the past ten years. These include various transportation modes and automobility ([Armstrong, 1998](#); [Morm, 2003](#)), but none of these overviews included road safety issues or the development of road safety research.

In [OECD \(1997, pp. 90–92\)](#) it is mentioned that “a review of past developments reveals that road safety work has mainly been practical in nature. Indeed, the need for theories, models and research methodologies originated from practice, where

[☆] Editor's Note: This paper was invited and peer-reviewed for a special section on History of Traffic Psychology. The special section included a wide range of manuscript styles, from those typical of this journal to other styles just as important for sharing the discipline's history. Authors contributed reasoned viewpoints from experience and literature on where the discipline has come from and where it may be heading, to an investigation of trends and topics in the discipline since the early 20th century.

Generally outside of the academic word nomads are not considered as the part of the civilization process Most of the times due to the Eurocentric thoughts that were developed in the 19th century scientific and technological improvements of the humanity were considered unique to Europe Therefore other people that were conquered by European armies were thought that they were completely out of the civilization process and the lived as barbarians because they did not live or think like Europeans According to this view if they will civilize or they can be considered as developed nation they had to live like Europeans at least they had to have same cultural attitudes or they must mimic This bias made hard to understand how other cultures lived and what they developed in their material culture However during the 20th century this linear and positivist understanding of history have been changed In this book first of all intellectual process on scientific progress was evaluated and then the place where the Turks could be placed in this progress was examined *Lessons of History* Klas-Göran Karlsson,Maria Karlsson,2025-07-01 Historical lessons are useful or even necessary for our guidance and orientation in time These lessons however have often been overlooked in historical reflections on watershed moments such as genocides treaties and global movements Focusing on how cataclysmic events primarily within Central and Eastern Europe have been transmitted across borders and generations this volume interrogates how the theory of historical lessons has evolved ultimately providing a useful framework for understanding contemporary conflicts and issues Spanning topics from the mediation of history within film to the influence of historical oppression on student activism this volume re evaluates historiography s potential for analyzing the past and engaging with the present *The Routledge Companion to Management and Organizational History* Patricia Genoe McLaren,Albert J.
