enliven their timetables and promotional brochures Schwantes traces the evolution of railroad commercial art from drab black and white broadsides and text only advertisements that the early railroads placed in local newspapers to the riotous maelstrom of color graphics in the early twentieth century when the visual appeal of public timetables and their thousands of different brochures enticed settlers to create farms ranches and towns alongside newly laid tracks *Railroad Nation* offers readers an unparalleled look at the ephemera of the railroad industry highlighting the vibrant history of railroading in America through its rich tapestry of visual materials

Down to Earth Theodore Steinberg, 2019 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of the United States a history that places the environment at the very center of the narrative Now in a new edition *Down to Earth* reenvisions the story of America from the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists attempts to impose order on the land to modern

efforts to sell the wilderness as a consumer good he reminds readers that many critical episodes in U S history were in fact environmental events The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson s surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities *Childhood and Children's Books in Early Modern Europe, 1550-1800* Andrea Immel, Michael Witmore, 2013-11-05 This volume of 14 original essays by historians and literary scholars explores childhood and children s books in Early Modern Europe 1550 1800 The collection aims to reposition childhood as a compelling presence in early modern imagination a ready emblem of innocence mischief and playfulness The essays offer a wide ranging basis for reconceptualizing the development of a separate literature for children as central to evolving early modern concepts of human development and socialization Among the topics covered are constructs of literacy as revealed by the figure of Goody Two Shoes notions of pedagogy and academic standards a reception study of children s reading based on book purchases made by Rugby school boys in the late eighteenth century an analysis of the first international best seller for children the abbe Pluche s *Spectacle de la nature* and the commodification of child performers in Jacobean comedies **The Week** David M Henkin, 2021-11-16 An investigation into the evolution of the seven day week and how our attachment to its rhythms influences how we live We take the seven day week for granted rarely asking what anchors it or what it does to us Yet weeks are not dictated by the natural order They are in fact an artificial construction of the modern world With meticulous archival research that draws on a wide array of sources including newspapers restaurant menus theater schedules marriage records school curricula folklore housekeeping guides courtroom testimony and diaries David Henkin reveals how our current devotion to weekly rhythms emerged in the United States during the first half of the nineteenth century Reconstructing how weekly patterns insinuated themselves into the social practices and mental habits of Americans Henkin argues that the week is more than just a regimen of rest days or breaks from work but a dominant organizational principle of modern society Ultimately the seven day week shapes our understanding and experience of time *The Holiday Makers* Richard K. Popp, 2012-05-16 In mid twentieth century America mass tourism became emblematic of the expanding horizons associated with an affluent industrial society Nowhere was the image of leisurely travel more visible than in the parade of glossy articles and advertisements that beckoned readers from the pages of popular magazines In Richard K Popp s *The Holiday Makers* the magazine industry serves as a window into postwar media and consumer society showing how the dynamics of market research and commercial print culture helped shape ideas about place mobility and leisure Magazine publishers saw travel content as a way to connect audiences to a booming ad sector while middlebrow editors believed sightseeing travel was a means of fostering a classless society at home and harmony abroad Expanding transportation networks and free time lay at the heart of this idealized vision Holiday magazine heralded nothing less than the dawn of a new era calling it the age of Mobile Man Man gifted for the first time in history with leisure and the means to enjoy distance

on a global scale For their part advertisers understood that selling tourism meant turning dreams into action as ad executive David Ogilvy put it Doing so involved everything from countering ugly stereotypes to tapping into desires for authentic places and self actualization Though tourism was publicly touted in egalitarian terms publishers and advertisers privately came to see it as an easy way to segment the elite free spenders from the penny pinching masses Just as importantly marketers identified correlations between an interest in travel and other consumer behavior Ultimately Popp contends the selling of tourism in postwar America played an early integral role in the shift toward lifestyle marketing an experiential service economy and contributed to escalating levels of social inequality

Communication in Eastern Europe Fred L. Casmir, 2012-12-06 This volume represents a clear attempt to learn something from the events in Eastern European countries It does not start with simplistic or old assumptions based on convenient Western communication models but instead takes a new approach If chaos theory could fundamentally change how physicists looked at order in the universe then it may be of value for communication scholars to attempt to understand the diversity of chaos or order in the human universe rather than attempt to force existing models on it for their own explanatory purposes This book is not merely based on the study of select groups of university students or on laboratory settings created in the minds of social scientists It seeks to understand some of the real world including the historical backgrounds and the theoretical assumptions brought to studies of intercultural conflicts Using personal and professional insights developed during firsthand contacts with existing situations chapter authors illustrate some of the realities by using the complexity of changes in Eastern European states during the final decade of the 20th century From education to business from the role of women to the role of mass media from the impact of political systems to the impact of history communication between those who are culturally diverse though they may have been arbitrarily forced to live under the same political roof is the theme of these scholarly studies The editor's reason for developing this volume of original essays is his belief that diversity rather than assumed similarity or even sameness based on the use of inadequate terminology is necessary for learning from contemporary human experiences He further believes that diversity and the significant roles of cultural values as well as of history need to become key concepts in the model with which to begin when it comes to the study of various aspects of intercultural communication It is therefore vital that scholars who represent various points of view and backgrounds contribute to that process After all understanding what is happening in the world is centrally anchored in or related to effective and successful intercultural communication between scholars who have different academic and personal backgrounds
