Love At Goon Park Harry Harlow And The Science Of Affection:

Love at Goon Park Deborah Blum, 2011-07-05 In this meticulously researched and masterfully written book Pulitzer Prize winner Deborah Blum examines the history of love through the lens of its strangest unsung hero a brilliant fearless alcoholic psychologist named Harry Frederick Harlow Pursuing the idea that human affection could be understood studied even measured Harlow 1905 1981 arrived at his conclusions by conducting research sometimes beautiful sometimes horrible on the primates in his University of Wisconsin laboratory Paradoxically his darkest experiments may have the brightest legacy for by studying neglect and its life altering consequences Harlow confirmed love s central role in shaping not only how we feel but also how we think His work sparked a psychological revolution The more children experience affection he discovered the more curious they become about the world Love makes people smarter The biography of both a man and an idea The Measure of Love is a powerful and at times disturbing narrative that will forever alter our understanding of human relationships

Love at Goon Park Deborah L. Blum, 2003 Deborah Blum examines the history of love through the lens of its strangest unsung hero a brilliant fearless alcoholic psychologist named Harry Frederick Harlow Pursuing the idea that human affection could be understood studied even measured Harlow 1905 1981 arrived at his conclusions by conducting research sometimes beautiful sometimes horrible on the primates in his University of Wisconsin laboratory Paradoxically his darkest experiments may have the brightest legacy for by studying neglect and its life altering consequences Harlow confirmed love s central role in shaping not only how we feel but also how we think

The Nature & Nurture of Love Marga Vicedo, 2022-12-22 The notion that maternal care and love will determine a child s emotional well being and future personality has become ubiquitous In countless stories and movies we find that the problems of the protagonists anything from the fear of romantic commitment to serial killing stem from their troubled relationships with their mothers during childhood How did we come to hold these views about the determinant power of mother love over an individual s emotional development And what does this vision of mother love entail for children and mothers In The Nature and Nurture of Love Marga Vicedo examines scientific views about children s emotional needs and mother love from World War II until the 1970s paying particular attention to John Bowlby s ethological theory of attachment behavior Vicedo tracks the development of Bowlby s work as well as the interdisciplinary research that he used to support his theory including Konrad Lorenz s studies of imprinting in geese Harry Harlow s experiments with monkeys and Mary Ainsworth s observations of children and mothers in Uganda and the United States Vicedo s historical analysis reveals that important psychoanalysts and animal researchers opposed the project of turning emotions into biological instincts Despite those substantial criticisms she argues that attachment theory was paramount in turning mother love into a biological need This shift introduced a new justification for the prescriptive role of biology in human affairs and had profound and negative consequences for mothers and for the valuation of mother love

Untethered Doug Bolton, Ph.D., 2025-03-18 An essential guide to restoring our children s

behavioral health and wellbeing Over the past decade children's mental health challenges have reached epidemic levels stress anxiety childhood depression and suicide are at unprecedented high rates Amid high stakes pressure for kids to succeed parents and teachers have never needed a road map to healthy child development more urgently And as psychologist and educator Doug Bolton explains in this eye opening and powerful guide underlying our modern day stresses is an even more pervasive problem We're relying on practices that are not in line with what science tells us about how to truly motivate children and help them thrive As Bolton persuasively argues we need to step away from parenting and teaching based on controlling our children with incentives and punishments they focus on short term compliance at the cost of health development Instead creating healthy and strongly bonded communities for our children both in our own families and in our schools is key to their emotional well being and their success in life Untethered offers tools to help us create these communities so our kids develop healthy attachments and learn emotional regulation helping them feel more connected less anxious more included less shamed and more securely grounded The power of communities is not only that they enhance our wellness they buffer us from the impact of trauma and can be a guiding force in helping kids develop resilience Weaving in Bolton's own experiences as a former principal at a therapeutic school and as a father Untethered is a deeply empathetic and powerful guide to combating the isolation we see in this generation today leading them toward a healthier more interconnected future

The Celluloid Specimen Benjamin Schultz-Figueroa, 2023-02-28 The Celluloid Specimen examines twentieth century behaviorist films that captured animal experiments revealing the central role of cinema in generating psychosocial definitions of species race identity and culture that continue to shape our contemporary political and scientific discourses Benjami 1n Schultz Figueroa analyzes rarely seen archival films made by Robert Yerkes in the 1930s at the first experimental primate colonies in North America the rat films made to simulate human society at Yale University in the 1930s and 1940s and the promotional films made by B F Skinner to sell the U S military on his design for a pigeon guided

missile during World War II These laboratory films have long been categorized as passive recordings of scientific research but when examined in their own right they become rich historical political and aesthetic texts that played a crucial role in the history of science

Defining Love Thomas Jay Oord,2010-06 Engages cutting edge scientific research on love and altruism to offer a definition of love that is scientifically theologically and philosophically adequate

Understanding Others Dominick LaCapra,2018-09-15 To what extent do we and can we understand others other peoples species times and places What is the role of others within ourselves epitomized in the notion of unconscious forces Can we come to terms with our internalized others in ways that foster mutual understanding and counteract the tendency to scapegoat project victimize and indulge in prejudicial and narcissistic impulses How do various fields or disciplines address or avoid such questions And have these questions become particularly pressing and not in the least confined to other peoples times and places Making selective and critical use of the thought of such important figures as Sigmund Freud Jacques Derrida and Mikhail Bakhtin in Understanding Others Dominick LaCapra investigates a series of crucial topics from the current state of deconstruction trauma studies and the humanities to newer fields such as animal studies and posthumanist scholarship LaCapra adroitly brings critical historical thought into a provocative engagement with politics and our current political climate This is LaCapra at his best critically rethinking major currents and exploring the old and the new in combination often suggesting what this means in the age of Trump

Opening Skinner's Box Lauren Slater,2013-04-08 Through ten examples of ingenious experiments by some of psychology s most innovative thinkers Lauren Slater traces the evolution of the century s most pressing concerns free will authoritarianism conformity and morality Beginning with B F Skinner and the legend of a child raised in a box Slater takes us from a deep empathy with Stanley Milgram s obedience subjects to a funny and disturbing re creation of an experiment questioning the validity of psychiatric diagnosis Previously described only in academic journals and textbooks these often daring experiments have never before been narrated as stories chock full of plot wit personality and theme

For the Love of a Dog Patricia McConnell, Ph.D.,2009-07-22 The renowned author of The Other End of the Leash sheds new light on the emotional lives of animals The Washington Post in this thoughtful and engaging exploration of man s best friend Compelling a wonderful blend of scientific knowledge stories about real dogs and their behavior and scenes from the author s life with her own dogs For the Love of a Dog will make you think but it will also touch your heart Associated Press For those of us who deeply cherish our dogs but are often baffled by their behavior For the

Love of a Dog is a revelation offering dog owners everywhere a new understanding of the complex web of emotions that sometimes bind and other times damage our relationship with dogs As animal behaviorist and zoologist Dr Patricia McConnell tells us in this remarkable book more and more scientists accept the premise that dogs have rich emotional lives exhibiting a wide range of feelings including fear anger surprise sadness and love McConnell suggests that dogs express emotions in ways similar to humans and shows us how to read the more subtle expressions hidden behind fuzzy faces and floppy ears Those who consider their dogs part of the family will find For the Love of a Dog engaging enlightening and utterly engrossing Packed with informed speculation and intriguing accounts of man s best friend at his worst and at his very best this book is a treasure trove that will teach us how to have a richer more rewarding relationship with our dogs Curious Kin in Fictions of Posthuman Care Amelia DeFalco, 2023-08-27 Over the past decade cultural theory has seen a number of turns the materialist turn the animal turn the affective turn that address the human as an affective embodied and ultimately vulnerable animal embedded in dense webs of more than human relations in short as a posthuman phenomenon Care philosophy shares this focus on embodiment and vulnerability in its insistence on interdependence as the defining condition of human life making it well positioned for a posthuman turn To this end Curious Kin in Fictions of Posthuman Care draws together contemporary narrative fictions that challenge humanist conceptions of care in their imaginative depiction of more than human affective bonds arguing for an expansion care philosophy s central figure the embodied embedded and encumbered human Fictional narratives of care between humans and robots bioengineered creatures clones nonhuman animals aliens or inanimate things highlight the limits of humanist ethical models capacity to register and accommodate posthuman relational intimacies while gesturing towards a model of care able to accommodate networked interdependencies that extend beyond the human realm Texts by Margaret Atwood Louise Erdrich Louisa Hall Eva Hornung Kazuo Ishiguro Bhanu Kapil and Jesmyn Ward along with films and television programmes like Robot and Frank Under the Skin and Real Humans depict a range of scenarios in which more than human care relations not only supersede human human relationships but suggest new human animal machine ways of being that offer novel insights into the possible presents and futures of posthuman care Curious Kin in Fictions of Posthuman Care reveals how these fictions do their own theorizing imagining the politics ethics and aesthetics of specific contextualized scenarios of posthuman contact and companionship Interweaving posthuman theory care philosophy and contemporary fiction Curious Kin in Fictions of Posthuman Care offers generative visions of care that make room for the incredible range of affects energies behaviours attachments and dependencies that produce and sustain life in more than human worlds **How to Feel** Sushma Subramanian, 2021-02-02 We are out of touch Many people fear that we are trapped inside our screens becoming less in tune with our bodies and losing our connection to the physical world But the sense of touch has been undervalued since long before the days of digital isolation Because of deeply rooted beliefs that favor the cerebral over the corporeal touch is maligned as dirty or sentimental in contrast with

supposedly more elevated modes of perceiving the world How to Feel explores the scientific physical emotional and cultural aspects of touch reconnecting us to what is arguably our most important sense Sushma Subramanian introduces readers to the scientists whose groundbreaking research is underscoring the role of touch in our lives Through vivid individual stories a man who lost his sense of touch in his late teens a woman who experiences touch emotion synesthesia her own efforts to become less touch averse Subramanian explains the science of the somatosensory system and our philosophical beliefs about it She visits labs that are shaping the textures of objects we use every day from cereal to synthetic fabrics The book highlights the growing field of haptics which is trying to incorporate tactile interactions into devices such as phones that touch us back and prosthetic limbs that can feel How to Feel offers a new appreciation for a vital but misunderstood sense and how we can use it to live more fully

History and Its Limits Dominick LaCapra, 2011-02-23 Dominick LaCapra's History and Its Limits articulates the relations among intellectual history cultural history and critical theory examining the recent rise of Practice Theory and probing the limitations of prevalent forms of humanism LaCapra focuses on the problem of understanding extreme cases specifically events and experiences involving violence and victimization He asks how historians treat and are simultaneously implicated in the traumatic processes they attempt to represent In addressing these questions he also investigates violence's impact on various types of writing and establishes a distinctive role for critical theory in the face of an insufficiently discriminating aesthetic of the sublime often unreflectively amalgamated with the uncanny In History and Its Limits LaCapra inquires into the related phenomenon of a turn to the postsecular even the messianic or the miraculous in recent theoretical discussions of extreme events by such prominent figures as Giorgio Agamben Eric L Santner and Slavoj Žižek In a related vein he discusses Martin Heidegger's evocative if not enchanting understanding of The Origin of the Work of Art LaCapra subjects to critical scrutiny the sometimes internally divided way in which violence has been valorized in sacrificial regenerative or redemptive terms by a series of important modern intellectuals on both the far right and the far left including Georges Sorel the early Walter Benjamin Georges Bataille Frantz Fanon and Ernst Jünger Violence and victimization are prominent in the relation between the human and the animal LaCapra questions prevalent anthropocentrism evident even in theorists of the posthuman and the long standing quest for a decisive criterion separating or dividing the human from the animal LaCapra regards this attempt to fix the difference as misguided and potentially dangerous because it renders insufficiently problematic the manner in which humans treat other animals and interact with the environment In raising the issue of desirable transformations in modernity History and Its Limits examines the legitimacy of normative limits necessary for life in common and explores the disconcerting role of transgressive initiatives beyond limits including limits blocking the recognition that humans are themselves animals

Seek You Kristen Radtke, 2021-07-13 From the acclaimed author of Imagine Wanting Only This a timely and moving meditation on isolation and longing both as individuals and as a society There is a silent epidemic in America loneliness Shameful to talk about and often misunderstood

loneliness is everywhere from the most major of metropolises to the smallest of towns In Seek You Kristen Radtke's wide ranging exploration of our inner lives and public selves Radtke digs into the ways in which we attempt to feel closer to one another and the distance that remains Through the lenses of gender and violence technology and art Radtke ushers us through a history of loneliness and longing and shares what feels impossible to share Ranging from the invention of the laugh track to the rise of Instagram the bootstrap pulling cowboy to the brutal experiments of Harry Harlow Radtke investigates why we engage with each other and what we risk when we turn away With her distinctive emotionally charged drawings and deeply empathetic prose Kristen Radtke masterfully shines a light on some of our most vulnerable and sublime moments and asks how we might keep the spaces between us from splitting entirely *Observing Primate Caregivers* Maria Botero, 2025-02-17 This book aims to advance our understanding of the caregiver infant interaction in primates and its effect on the development of social cognition working from an interdisciplinary approach i.e psychology philosophy and anthropology challenging the dominant cognitivist perspectives and methodologies This book is important because it contributes to understanding how primate parent and infant interaction works and how it affects the infant's development Understanding this parent and infant interaction contributes to finding better ways to support human parents and provide better care for non human primate mothers and infants in captivity Empathetic Marketing M.
