Human And Environmental Security An Agenda For Change:

Human and Environmental Security Felix Dodds, Tim Pippard, 2013-06-17 Security has tended to be seen as based on military force yet this illusion is crumbling literally and figuratively before our eyes in the conflict zones of Iraq Afghanistan and Africa It is now clear that real human security defined by the Commission on Human Security as protecting vital freedoms can only be achieved if the full range of issues that underpin human security including environmental integrity are addressed This ground breaking book authored by prominent international decision makers tackles the global human security problem across the range of core issues including terrorism nuclear proliferation access to water food security loss of biodiversity and climate change The authors identify the causes of insecurity articulate the linkages between the different elements of human security and outline an agenda for engaging stakeholders from across the globe in building the foundations of genuine and lasting human security for all nations and all people This is powerful necessary solution focused reading in these times of peril global conflict mass inequity and rampant environmental degradation

Environmental Change and Human Security: Recognizing and Acting on Hazard Impacts Peter H. Liotta, David A. Mouat, W.G. Kepner, Judith Lancaster, 2008-07-31 Environmental and Human Security Then and Now 1 2 ALAN D HECHT AND P H LIOTTA 1 U S Environmental Protection Agency Office of Research and Development 2 Pell Center for International Relations and Public Policy Salve Regina University 1 Nontraditional Threats to Security The events of September 11 2001 have sharpened the debate over the meaning of being secure Before 9 11 there were warnings in all parts of the world that social and environmental changes were occurring While there was prosperity in North America and Western Europe there was also

increasing recognition that local and global effects of ecosystem degradation posed a serious threat Trekking from Cairo to Cape Town thirty years after living in Africa as a young teacher for example travel writer Paul Theroux concluded that development in sub Saharan Africa had failed to improve the quality of life for 300 million people Africa is materially more decrepit than it was when I first knew it hungrier poorer less educated more pessimistic more corrupt and you can't tell the politicians from the witch doctors 2002 While scholars and historians will debate the causes of 9 11 for some time one message is clear An often dizzying array of nontraditional threats and complex vulnerabilities define security today We must understand them and deal with them or suffer the consequences Environmental security has always required attention to nontraditional threats linked closely with social and economic well being *Climate Change and the Bay of Bengal* Sanjay Chaturvedi, Vijay Sakhuja, 2015-10-16 *Climate Change and the Bay of Bengal* argues that in the era of climate change radically different understandings of security and sovereignty are at work It questions the geopolitics of fear and the manner in which metanarratives of climate change tend to privilege the global and national scales over other scales especially the regional and the local The authors argue in favour of a new imagination of the Bay of Bengal space as a semi enclosed sea embedded in a large marine ecosystem under the relevant provisions of the UNCLOS that impose various obligations upon its signatories to cooperate at a regional level Such an imagination anchored in geographies of hope should not remain confined to official domains and discourses but become a part of popular socio spatial consciousness through a regional public diplomacy reaching out to the grassroots level A Bay of Bengal regional seas programme under the auspices of UNEP should be conceptualized and operationalized in a manner that explicitly factors in climate change consequences into the existing understandings and approaches to environmental human security in the region **Security and Environmental Change** Simon Dalby, 2009-07-27 Simon Dalby provides an accessible and engaging account of the challenges we face in responding to security and environmental change He traces the historical roots of current thinking about security and climate change to show the roots of the contemporary concern **Environmental Security and Gender** Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security

discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

Environmental Security in the Anthropocene Judith Nora Hardt, 2017-09-22 This book provides a critical assessment of the theories and practice of environmental security in the context of the Anthropocene The work analyses the intellectual foundations the evolution and different interpretations strengths and potential of the link between environment and security but also its weaknesses incoherencies and distortions To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene Furthermore the book examines the practice theory divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities This book will be of great interest to students and academic scholars of Environmental Security Critical Security Studies Green Political Theory Global Governance and International Relations in general

The Gender and Security Agenda Chantal de Jonge Oudraat, Michael E. Brown, 2020-05-27 This book examines the gender dimensions of a wide array of national and international security challenges The volume examines gender dynamics in ten issue areas in both the traditional and human security sub fields armed conflict post conflict terrorism military organizations movement of people development environment humanitarian emergencies human rights governance The contributions show how gender affects security and how security problems affect gender issues Each chapter also examines a common set of key factors across the issue areas obstacles to progress drivers of progress and long term strategies for progress in the 21st century The volume develops key scholarship on the gender dimensions of security challenges and thereby provides a foundation for improved strategies and policy directions going forward The lesson to be drawn from this study is clear if scholars policymakers and citizens care about these issues then they need to think about both security and gender This will be of much interest to students of gender studies security studies human security and International Relations in general The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Climate Change, Human Security and Violent Conflict Jürgen

Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures But how severe are the security risks and conflict potentials of climate change Could global warming trigger a sequence of events leading to economic decline social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and cooperative approaches to stabilize the climate society interaction **Environmental Change and Human Security in**

Africa and the Middle East Mohamed Behnassi, Katriona McGlade, 2017-01-17 This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa These regions face particular challenges in relation to environmental degradation the decline of natural resources and consequent risks to current and future human security The chapters provide topical analysis from a range of disciplines on the theory discourse policy and practice of responding to global environmental change and threats to human security Case studies from Morocco Tunisia Egypt Turkey Iraq and Syria provide empirical evidence with a focus section dedicated to the critical issue of water resources and water security in the region The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales The complexity of these processes requires new ways of thinking and intervening As a contribution the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change Environmental Security of

the European Cross-Border Energy Supply Infrastructure M.G. Culshaw, V.I. Osipov, S.J. Booth, A.S. Victorov, 2015-01-05 The current volume provides examples of how environmental hazards such as landslides earthquakes mountain processes cold climate processes and tidal flows and currents can affect the energy supply infrastructure In times of uncertainty the security of the European cross border energy supply infrastructure such as pipelines has great importance Whilst the potential effects of political disagreement economic inequalities and social differences are relatively well understood the impact of environmental change is often poorly appreciated by decision makers New approaches have been examined for monitoring of hazardous landslide processes including early warning systems and near real time 3D data processing and visualization The scientific problems of environmental systems design have been discussed and approaches for their implementation have been suggested New integrated remote sensing techniques consisting mainly of hyperspectral and radar imagery are presented together with the processing of monitoring data using GIS techniques and in particular dynamic visualization Attention is also given to conceptual issues of environmental and energy security and the role of education to help resolve environmental problems through cooperation in the development of the European energy supply infrastructure The Securitization of
Climate Change: Australian and United States' Military Responses (2003 - 2013) Michael Durant Thomas, 2017-07-25 This

book examines how the armed forces of the United States and Australia have responded to the threat posed by climate change to national security Drawing on established securitisation frameworks Copenhagen and Paris Schools the author uses a combination of quantitative and qualitative techniques to systematically examine more than 3 500 speeches policies and doctrinal articles since 2003 Importantly the author undertakes an examination of the intersection between the political and the military spheres probing the question of how ideology has influenced the military's uptake on the issue In this context the author identifies the difficulty of an ostensibly apolitical institution responding to what has become both a hyper political issue and an unprecedented security threat A close examination of the key political actors their intent outlook and political mandate for broader climate action is therefore crucial to understanding the policy freedom and constraints within which military leaders operate The book consists of eight chapters divided into four parts focusing on perspectives and methodological insights empirical case studies case study comparison and concluding observations Offers a rare and systematic examination of military climate policy by a military officer from Australia Identifies a divergence of Australian military climate policy from that of the US military during the Obama Administration Develops a unique method that quantifies climate security enabling a graphical representation for quick and ready reference ideally suited to policy makers

Environmental Change and Security Project Report ,2002 **Global and Regional Problems** Vilho Harle,2016-04-22

Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies Environmental Security Peter Hough,2021-06-29 This textbook offers a student friendly survey of the global politics of the environment through the prism of security studies This book is divided into three thematic sections The first part sets out the key theoretical and practical arguments for and against bringing together environmental and security issues The second part examines why environmental issues have been framed by some as national security concerns in the context of the effects of overpopulation resource depletion climate change and the role of the military as both a cause and a solution to problems of pollution and natural disasters Finally the third section explores the case for treating the key issues of environmental change as matters of human security The chapters have been updated to include the 2015 Paris Climate

Change Accords the Trump and Sendai Framework for Disaster Risk Reduction and there is a new chapter on environmental history Overall the book provides a clear systematic and thorough overview of an area of great academic and real world political interest This book will be essential reading for students of environmental studies critical and human security human geography development studies and International Relations in general Debating Security in Turkey Ebru
