A huge amount of research has been devoted to this topic and there are numerous methods used from simple morphological assessment to molecular biological techniques to assess the genome and metabolism of the newly fertilized embryo. For many of these techniques an adequate evidence base is lacking and expert opinion is valuable. Clinical imperatives require ranking all embryos in a cohort according to their viability thereby enabling the selection of the best embryo to optimize live birth outcome, a key indicator used to measure and rate IVF Clinics worldwide. This clear and informative manual will provide embryologists and clinicians with an overview of the tools now available to assist in embryo selection as well as evidence for their efficacy and safety and the broader considerations that must underlie these important clinical decisions. *Profiling Humans from their Voice* Rita Singh, 2019-06-18 This book is about recent research in the area of profiling humans from their voice which seeks to deduce and describe the speaker's entire persona and their surroundings from voice alone. It covers several key aspects of this technology describing how the human voice is unique in its ability to both capture and influence the human persona, how in some ways voice is more potent and valuable than DNA and fingerprints as a metric since it not only carries information about the speaker but also about their current state and their surroundings at the time of speaking. It provides a comprehensive review of advances made in multiple scientific fields that now contribute to its foundations. It describes how artificial intelligence enables mechanisms of discovery that were not possible before in this context driving the field forward in unprecedented ways. It also touches upon related and relevant challenges posed by voice disguise and other mechanisms of voice manipulation. The book acts as a good resource for academic researchers and for professional agencies in many areas such as law enforcement, healthcare, social services, entertainment, etc. **Fundamentals of Microbiology** Jeffrey C.
