

Chapter 8 The Play Years: Biosocial Development

Corpus callosum -the process by which axons and dendrites become insulated with a coating of myelin, a fatty substance that speeds transmission of nerve impulses from neuron to neuron in the brain.

Myelination - the process by which axons and dendrites become insulated with a coating of myelin, a fatty substance that speeds transmission of nerve impulses from neuron-to-neuron in the brain.

Differences between gross

Gross Motor Skills

1. Involve large body movements such as running, climbing, jumping, and throwing.
2. Generally children learn motor skills from other children, rather than through adult instruction.
3. According to sociocultural theory, learning from peers is the best way for children to master skills they will need.

fine motor skills

Fine Motor Skills

1. Involve small body movements (especially those of hands and fingers), are much harder to master than gross motor skills.
2. Pouring juice into a glass, cutting food with a knife and fork and achieving anything more artful than a scribble with a pencil are difficult for young children, even with great concentration and effort.

Childhood accidents - Except in times of famine, more of the world's children die of accidents than any other cause. Worldwide, unintended injuries cause millions of premature deaths each year. Neurological immaturity makes young children unlikely to think things through, so they plunge into dangerous places and activities.

At about what age does formal instruction in reading, writing, and math begin around the world?

Child maltreatment - includes all intentional harm to, or avoidable endangerment of, anyone under 18 years of age.

Abuse - deliberate action that is harmful to the child's physical, emotional, or sexual well-being.

Neglect - failure to appropriately meet a child's basic physical or emotional needs.

intergenerational transmission

What 2 factors seem universally conducive to maltreatment?

foster care - legally sanctioned, publicly supported arrangement in which children are officially removed from their parents' custody and entrusted to another adult or family who is paid to nurture them.

permanency planning -legally sanctioned, publicly supported arrangement in which children are officially removed from their parents' custody and entrusted to another adult or family who is paid to nurture them.

kinship care - when a relative of the maltreated child becomes the approved caregiver, and issued for about one fourth of all foster children in the U.S.

primary - to keep all maltreatment of children from ever beginning.

secondary - spotting warning signs and intervening to keep a problematic situation from getting worse.

tertiary prevention of maltreatment - intervention done to reduce the harm done by actual abuse—which sometimes comes too late.

Chapter 9 The Play Years: Cognitive Development

Egocentrism - Piaget's term for a type of centration in which the young child contemplates the world exclusively from his or her personal perspective.

symbolic thinking

Piaget's preoperational thought - Piaget's term for cognitive development between the ages of about 2 and 6; characterized by centration (including egocentrism), focus on appearance, static reasoning, and irreversibility.

Centration - a characteristic of preoperational thought in which the young child focuses on one aspect of a situation to the exclusion of all others.

Irreversibility - a characteristic of preoperational thought in which the young child fails to recognize that reversing a process can sometimes restore whatever existed before the transformation occurred.

Conservation -the principle that the amount of a substance is unaffected by changes in its appearance.

Static reasoning

Vygotsky's guided participation - the adult or other mentor's aid in guiding the next step of learning, motivated by the learner's need for social interaction, the process by which young children, with the help of mentors, learn to think by having social experiences and by exploring their universe

apprenticeship in thinking - the preschooler's tendency to look to others for insight and guidance, particularly in the cognitive realm. Vygotsky's term for the young child whose intellectual growth is stimulated and directed by older and more skilled members of society.

scaffolding - the building blocks for learning put in place by a "teacher" (a more knowledgeable child or adult) or a culture. Learners use scaffolds and then discard them when they are no longer needed. - sensitive structuring of the young child's participation in learning encounters

zone of proximal development - Vygotsky's term for a range of skills that a person can exercise with assistance but is not quite able to perform independently.

Private speech- Vygotsky's term for the internal dialogue that occurs when people talk to themselves and through which new ideas are developed and reinforced.

What are some guidelines for interview child witnesses to a crime?

Theories of Human Development Barbara M. Newman, Philip R. Newman, 2022-07-29 This bestselling textbook provides an engaging introduction to 11 major theories about human development that continue to guide research, intervention, and practice. The theories are grouped into three families: those that emphasize biological systems, those that focus on environmental factors, and those that reflect the interaction between the two. This organization encourages readers to evaluate, compare, and contrast key theoretical ideas both within and across families. Pedagogical features foster critical thinking and an active approach to learning. Each family of theories is introduced with a brief overview of their unique perspectives and the rationale for grouping them together. Discussion of each theory includes the cultural/historical context within which the theory developed, key concepts and ideas, extensions of the theory in new directions, a research example, an illustration of how the theory is applied in contemporary practice, and an analysis of how the theory answers six basic questions that a theory of human development should address. Each chapter begins with a case example and related application. There is expanded visual material throughout to enhance and extend key concepts. The third edition also features a new chapter, *Social Justice Theory*, which addresses definitions of social justice, the development of social justice reasoning, emotional foundations, and behaviors related to activism, with particular focus on societal conditions of privilege and disadvantage that create social inequities and impact developmental outcomes. Consideration of social justice themes as they emerge across theories and

increased focus on how theories account for and characterize individual differences and the value of diversity for human adaptation a new emphasis on gender and sexual identities across theories greater attention to the role of culture as it is featured within each theory as a component of the macro environment and as it is internalized through socialization processes a revised epilogue focusing on implications for family dynamics and links from theory to practice By focusing on theories that have had a major impact on development science this book is ideal for advanced undergraduate and graduate courses in theories of development lifespan or child development taught in the fields of psychology human development family studies education and social work

Creating Human Development Theories R. Murray Thomas, 2014-05-12 How and why do humans develop as they do This book clearly explains the key components of human development theories and describes how to compose novel theories regarding this age old puzzle As college students progress through bachelor s degree programs and then advance to their master s degree theses and doctoral dissertations they are bombarded with studies of countless theories often adopting some author s theory for interpreting information about human development even when the theory does not precisely meet their needs One way to solve the problem a way especially tuned to the current classroom push for creative critical thinking is for the student to create his or her own theory Unfortunately even students as high as the doctoral level often don t understand how to create a well ordered workable theory of their own a crucial gap in their critical thinking skillsets This book is the solution to that specific problem In these pages in clear and detailed steps is a complete explanation for developing a theory The book addresses key topics such as attention to need population basic assumptions key terms causes and stages interpreting evidence and applications Author R Murray Thomas a well known and highly respected elder in the social sciences also details five illustrative theories covering their history and providing insights about how they were developed This work will be valuable to students of psychology human development child development and theory as well as those in other disciplines seeking an understanding of theory building
