Sample Syllabus with a suggested course schedule *Human Behavior Theory and Social Work Practice* Roberta Greene, 2017-09-08 This new edition of *Human Behavior Theory and Social Work Practice* provides a broadly synthetic approach to selecting theoretical concepts crucial to one's activities in casework. Centered on the notion of the client as an individual, Roberta Greene and the contributing authors examine the biological, psychological, and social aspects of development and evaluate their utility for social work practice. Social work is characterized by a dynamic helping process and a diversity of roles and functions. The aims of social work to improve societal conditions for individuals, families, and groups are put into action across all fields of practice and realized through a variety of methods in a range of settings. To work in the field, it is important to acquire conceptual frameworks that help one understand the complexities of contemporary practice. This volume is concerned with the application of knowledge about behavior in the social environment that serves as the theoretical underpinning for direct practice in social work. The chapters explore the ways in which specific theories have contributed to understanding the person in the environment, construct and examine the idea that all clinical social work intervention is anchored in reshaping the context of the person in the environment, and configuration. The book explores the challenges and limitations of the various theories in use and addresses many relevant questions: What does the theory offer for understanding development across the lifecycle? What does each theory suggest about the interaction among biological, psychological, and sociocultural factors of human development and functioning? What does the theory suggest about healthy, functional, and unhealthy/dysfunctional behaviors or wellness? Is theory universal in its application, and may it lend itself to cross-cultural social work practice? What role does theory propose for the social worker as an agent of change? *Human Behavior Theory and Social Work Practice* is an original contribution to social work theory and will be mandatory reading for anyone pursuing a career in the field.

Human Behavior theory and Social Work Practice, Second Edition Roberta Rubin Greene, Families and Health Care Kathleen Obier Ell, Focuses on methods for enhancing family participation in medical care and for reducing the adverse effects of illness on family functioning. Serves as an aid for practicing social workers presenting methods of assessing the individual case and a framework for working with families during the planning of services, intervention, and evaluation. From Child Abuse to Permanency Planning, 1994 More than two million child abuse reports are filed annually on behalf of children in the United States. Each of the reported children becomes a concern at least temporarily of the professional who files the report, and each family is assessed by additional professionals. A substantial number of children in these families will subsequently enter foster care. Until now, the relationships between the performance of our child welfare system and the growth and outcomes of foster care have not been understood. In an effort to clarify them, Barth and his colleagues have synthesized the results of their longitudinal study in California of the paths taken by children after the initial abuse report: foster care, a return to their homes, or placement for adoption. Because the outcomes of child welfare services in California have national

significance this is far more than a regional study It provides a comprehensive picture of children s experiences in the child welfare system and a gauge of the effectiveness of that system The policy implications of the California study have bearing on major federal and state initiatives to prevent child abuse and reduce unnecessary foster and group home care **From**

Vourlekis,2017-07-05 This new practice text provides a series of readings focusing on case management in a number of fields and in a variety of settings with different client populations Each chapter examines a major component of case management practice by presenting information about an innovative program from a different location around the country In conjunction these readings provide a road map to social work case management In addition to offering up to date practice approaches and examining the functions and skills of case management in depth the authors provide the policy information needed for putting this traditional form of social work practice into today s service delivery context **Person-Environment Practice**

Susan P, Kemp,James K. Whittaker,Elizabeth M. Tracy,2024-11-01 Person Environment Practice addresses a core but long neglected dimension in social work and human services practice accurate environmental assessment and strategic environmental intervention Despite the centrality of person environment as a key construct in direct practice the domain of environmental assessment intervention has received relatively little systematic attention in the practice literature For a variety of reasons the core focus of direct practice assessment and change strategies has centered more on person than environment This book seeks to redress that imbalance Ironically the relative lack of attention to environmentally oriented practice persists even as current demands of practice fall increasingly under the rubric of what we here call environmental intervention defined as both action in the environment and the process of transforming individual and collective perspectives through critical analysis of the impact of environmental conditions The authors argue that the ability to understand environment from the client s perspective and to function effectively in the environmental domain is central to many emergent areas of practice such as practice with extended families and personal networks practice from a strengths perspective and culturally competent practice In Person Environment Practice the authors offer a coherent critique and overview of environmental assessment and intervention congruent with the demands of both newly emerging and established interpersonal helping approaches within social work s domain Robert Halpern of the Erikson Institute for Advanced Studies

in Child Development described the book as as clear thoughtful and subtle a discussion of how to consider the environment in interpersonal helping as I have seen in the literature and Anthony Maluccio of Boston College called the book a timely and exciting contribution with appreciation and respect for social work practices and qualities of inspiration as well as intellectual stimulation Susan P Kemp is assistant professor School of Social Work The University of Washington Seattle James K Whittaker is professor School of Social Work The University of Washington Seattle Elizabeth M Tracy is associate professor Mandel School of Applied Social Sciences Case Western Reserve University Cleveland Ohio
