Education in Eastern Europe and Eurasia Nadiya

Ivanenko, 2014-05-16 Education in Eastern Europe and Eurasia provides an essential reference resource to education development and key education issues in the region. Academics and researchers working closely in the field cover education and educational development in Belarus, Moldova, Russia, Turkey, Ukraine, Armenia, Azerbaijan, Georgia, and Israel. Each chapter provides an overview of the development of education in the particular country, focusing on contemporary education policies and some of the problems these countries face in implementing educational reform. The book also covers the social and political issues which impact on the education system and schooling, and governments' responses to recent local, regional, and global events. Human Development D. A. Louw, 1998 **Handbook of Child Psychology and Developmental Science, Socioemotional Processes**, 2015-03-31 The essential reference for human development theory, updated and reconceptualized. The Handbook of Child Psychology and Developmental Science, a four-volume reference in the field defining work to which all others are compared. First published in 1946 and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 3: Social, Emotional, and Personality Development presents up-to-date knowledge and theoretical understanding of these several facets of social, emotional, and personality processes. The volume emphasizes that any specific processes, functions, or behaviors discussed in the volume occur alongside and are inextricably affected by the dozens of other processes, functions, or behaviors that are the focus of other researchers' work. As a result, the volume underscores the importance of a focus on the whole developing child and his or her sociocultural and historical environment. Understand the multiple processes that are interrelated in personality development. Discover the individual, cultural, social, and economic processes that contribute to the social, emotional, and personality development of individuals. Learn about the several individual and contextual contributions to the development of such facets of the individual as morality, spirituality, or aggressive/violent behavior. Study the processes that contribute to the development of gender, sexuality, motivation, and social engagement. The scholarship within this volume and as well across the four volumes of this edition illustrates that developmental science is in the midst of a very exciting period. There is a paradigm shift that involves increasingly greater understanding of how to describe, explain, and optimize the course of human life for diverse individuals living within diverse contexts. This Handbook is the definitive reference for educators, policy makers, researchers, students, and practitioners in human development, psychology, sociology, anthropology, and neuroscience. **The Study of Human Development** Richard A. Settersten Jr., Megan M. McClelland, 2018-10-18 If you had just one wish for the study of human development, what would it be? How would it advance the field? And what would it take for your vision to be realized? This was the charge given to twenty-eight scholars coming from different disciplines and fields and who study different periods of the life course. This book compiles provocative contributions from a wide range of established scholars organized into seven thematic areas: conceptual advances, systems, levels, and contexts; individual differences; methodological advances; harnessing science for human welfare and social justice; underexplored life course dynamics; and interdisciplinary

collaboration and playing well with others This book was originally published as a special issue of Research in Human Development
