**Question:** How do the mouths of hominids compare?

1. **Measure:** As shown at right, place one of the protractor's circles on the top of the zygomatic process. Place the vertex of the protractor at the top of the nasal opening (Hint: You may have to look at the **Front view** in order to see where the top of the nasal opening is in relation to the **orbit**). Place the other circle on the edge of the **maxilla**. The resulting angle is the **maxillary angle**. Complete the table. (Note: You will not be able to do this measurement on incomplete skulls.)
