Humanity's Dark Side: Evil, Destructive Experience And Psychotherapy:

Humanity's Dark Side Arthur C. Bohart, 2013 The human capacity for destructiveness is often referred to as humanity's dark side. In this book prominent writers share different, sometimes opposing views on humanity's dark side and consider how these views impact their clinical practice. *The Handbook of Person-Centred Psychotherapy and Counselling*, 2024-09-05 Written by a diverse range of expert contributors unified by a relational ethics based reading of person-centred theory and practice, this seminal text is the most in-depth and comprehensive guide to person-centred therapy. Divided into four parts, it examines the theoretical, philosophical and historical foundations of the person-centred approach, the fundamental principles of person-centred practice as well as new developments in and applications of person-centred clinical work, explorations of how person-centred conceptualisations and practices can be applied to groups of clients who bring particular issues to therapy such as bereavement or trauma, and professional issues for person-centred therapists such as ethics, supervision and training. 10 years after it was last published, this third edition includes new content on the climate crisis, intersectionality and working with racism and anti-racism. It includes new dedicated chapters on the Non-directive Attitude, Relational Depth, Experiential Practices, Working with Trauma, Online PCA and Person-Centred approaches around the Globe. International and interdisciplinary in conception, this is a cutting-edge resource for students of psychotherapy and counselling on a range of programmes as well as professional practitioners working in the field. **Counseling and Psychotherapy** David

Capuzzi, Mark D. Stauffer, 2022-03-29 This foundational text offers dynamic and fresh perspectives on theories across the helping professions to help guide client case conceptualization and therapeutic transformation. A diverse group of topical experts provides contemporary insight on the following theories: relational, cultural, psychodynamic, Jungian, Adlerian, existential, person-centered, Gestalt, cognitive-behavioral, third-wave cognitive-behavioral, rational-emotive, reality therapy, choice family, feminist, constructivist, and emotion-focused theories, as well as creative approaches to counseling used in a variety of theoretical models. Each theory is discussed in terms of historical background, human nature and development, major constructs, applications including goals, the process of change, traditional and brief interventions, and serious mental health issues, supporting research and limitations, and the case of Clarita. The use of a consistent case study across chapters reinforces the differences between theories and demonstrates how each theory influences the counseling and treatment plan. A complimentary test manual and PowerPoints for instructor use are available by request. Requests for digital versions from ACA can be found on www.wiley.com. Profiles of Personality (Second Edition) Eugene DeRobertis, 2021-06-14 Profiles of Personality offers a refreshingly different approach to learning personality Designed to serve as a primary or supplementary textbook for courses on personality theory Profiles of Personality gently guides the reader to go beyond learning about the theories of personality to encouraging critical thought about them Drawing on many years of teaching experience DeRobertis writes in an accessible engaging manner that keeps the reader engaged The second edition of this text has been expanded and updated with over 100 pages of new content Personality textbooks come in two forms each with their own style of organizing content They will either be organized in terms of historical affiliation e g Freud and those theories that are historically affiliated with Freud etc or they will offer a series of disparate research foci Both approaches make it difficult for students to attain a coherent synoptic grasp of the subject matter Profiles of Personality offers an alternative It presents personality theories on the basis of a meta narrative that guides the student through an unfolding story of personality and personal becoming The meta narrative of the text reflects the whole person emphasis that gave rise to the study of personality in the first place As Walter Mischel once noted the study of personality was intended to become the meta discipline for integrating the findings and general principles

of psychology as a whole as they speak to the person as a whole In contrast to the most contemporary texts take a more restrictive approach the current text returns to the macro integrative orientation of those early 20th Century personality theorists who helped to bring about the emerging humanistic revolution in psychology The macro integrative orientation has always been guided by the deeply held belief that the personality psychologist should not conflate objectivity with the objectification of the person or the personality The aim of the approach is to be theoretically open inclusive and capable of speaking to the fullness of human existence its drama far beyond the aims of adaptation to given biosocial conditions Macro integrative investigations target the full range of human experience from highly conflicted forms of pathology to highly self transcendent forms of personal fulfillment Beginning with the contributions of the micro integrative tradition Profiles of Personality moves progressively deeper into the world of macro integrative theorizing increasingly exposing the role of paradox in the differential integrative process of personality formation Highlights of this new edition include brief discussions of gerotranscendence gender and education additions to the analysis of narrative and an expanded section on multiculturalism and the ecopsychological culture of place
