An Enquiry concerning Human Understanding David Hume, 2011-08-26 Over a series of elegantly written engaging essays the Enquiry examines the experiential and psychological sources of meaning and knowledge the foundations of reasoning about matters that lie beyond the scope of our sensory experience and memory the nature of belief and the limitations of our knowledge The positions Hume takes on these topics have been described as paradigmatically empiricist sceptical and naturalist and have been widely influential and even more widely decried The introduction to this edition discusses the Enquiry's origin evolution and critical reception while appendices provide examples of contemporary responses to Hume

An Enquiry Concerning Human Understanding David Hume, 1991-01-01 Moral philosophy or the science of human nature may be treated after two different manners each of which has its peculiar merit and may contribute to the entertainment instruction and reformation of mankind The one considers man chiefly as born for action and as influenced in his measures by taste and sentiment pursuing one object and avoiding another according to the value which these objects seem to possess and according to the light in which they present themselves As virtue of all objects is allowed to be the most valuable this species of philosophers paint her in the most amiable colours borrowing all helps from poetry and eloquence and treating their subject in an easy and obvious manner and such as is best fitted to please the imagination and engage the affections They select the most striking observations and instances from common life place opposite characters in a proper contrast and alluring us into the paths of virtue by the views of glory and happiness direct our steps in these paths by the soundest precepts and most illustrious examples They make us feel the difference between vice and virtue they excite and regulate our sentiments and so they can but bend our hearts to the love of probity and true honour they think that they have fully attained the end of all their labours The other species of philosophers consider man in the light of a reasonable rather than an active being and endeavour to form his understanding more than cultivate his manners They regard human nature as a subject of speculation and with a narrow scrutiny examine it in order to find those principles which regulate our understanding excite our sentiments and make us approve or blame any particular object action or behaviour They think it a reproach to all literature that philosophy should not yet have fixed beyond controversy the foundation of morals reasoning and criticism and should for ever talk of truth and falsehood vice and virtue beauty and deformity without being able to determine the source of these distinctions While they attempt this arduous task they are deterred by no difficulties but proceeding from particular instances to general principles they still push on their enquiries to principles more general and rest not satisfied till they arrive at those original principles by which in every science all human curiosity must be bounded Though their speculations seem abstract and even unintelligible to common readers they aim at the approbation

David Hume, 2011-10-02 After his three volume Treatise of Human Nature dropped like a rock to the bottom of the pool of British philosophic writing Hume set out to write a briefer more accessible version the Enquiry concerning Human Understanding One of the early points it makes is that most endeavors to write about the nature of thought are hopeless and nearly impossible to understand With that disclaimer Hume sets out to contradict himself by writing lucidly about while candidly acknowledging the severe limits of this topic He uses logic to show that most human understanding falls into two categories a very small group of innate truths deducible by logic like every triangle has three sides and a much larger group nearly everything we know which is based on reality based observation This latter group always has at a fundamental level an element of probabilistic assumption Things customarily happened this way before so they probably will again Thus almost everything we think we know about the world is based on empirical experience not pure logic A must read for anyone with even a passing interest in philosophy or modern thought An Enquiry Concerning Human Understanding is primarily concerned with the psychological question of the origin of our concepts About the answer to this question the empiricists were all agreed our concepts are furnished by experience which includes both sensory experience and introspection i e the experience of our own mental states The empiricists also agreed about the way we can justify our beliefs Some beliefs are true or false in virtue of the ideas they contained and we can know their truth or falsity simply by thinking about them other beliefs are true or false in virtue of how the external world is and we can know their truth or falsity only by drawing on our experiences of the world According to Hume all substantial conclusions about the world fall into this second category That is the truth or falsity of all substantial claims about the existence and nature of things in the external world can be discovered only by checking those claims against the evidence of our senses Hume's Enlightenment Tract Stephen

the thesis of a thinker who was a scientist psychologist metaphysician and skeptic who continues to fascinate contemporary minds The product of both youthful fire and mature consideration the Enquiry contains everything of consequence relating to the understanding In the face of skepticism the Enquiry offered progress based on experience In a time of dogmatism the Enquiry dissected the basis of religious faith and delivered a still powerful critique It endeavors to be nothing less than the construction of an anatomy of human nature **An Enquiry Concerning Human Understanding** David Hume, 2019-08-16
