

Auto Recovery

Hunter's Auto Recovery feature meets the ENERGY STAR® guidelines for energy efficiency by allowing the heating or cooling system to recover gradually from an energy-saving setpoint temperature to a comfort setpoint temperature.

Auto Recovery calculates how early to turn your system back On, so that the room temperature is already comfortable by the start of the comfort temperature program period. Auto Recovery works in both Heat and Cool modes.

■ When the thermostat is in Auto Recovery mode, the display will alternate "RECO" with time, and the program indicator will flash.

■ Auto Recovery can be disabled by sliding the Recovery switch on the circuit board to disable.

■ Auto Recovery will not operate if Permanent hold or Temporary hold is in operation.

■ Auto Recovery can be cancelled manually if HOLD / RETURN is pressed during the recovery process.

■ Auto Recovery will be cancelled and change to Temporary Manual Override mode if the setpoint is adjusted during the recovery process.

Error Mode

If the thermostat is unable to control your system due to an unexpected battery problem, the thermostat will enter Error Mode. In this condition, the thermostat flashes "Err" on the LCD display, and shuts off your system. To correct this problem, replace the batteries with 2 new AA alkaline batteries, even if you have recently replaced them. Next, use a paper clip to press the RESET button next to the keypad. You will need to reprogram your thermostat and confirm normal operation.

If Error Mode returns, please call Hunter Technical support at 1-888-830-1326 for further information.

Auto Cut Off

your thermostat will automatically cut-off in Heat mode if the room temperature rises above 95°F (35°C). It will cut-off in Cool mode if the room temperature drops below 40°F (4°C).

Note that if your system has malfunctioned and no longer responds to thermostat controls, the Auto Cut-Off will have no effect.
