Human Nature After Darwin A Philosophical Introduction:

Human Nature After Darwin Janet Radcliffe Richards, 2005-07-05 A clear introduction to the implications of the Darwinian revolution for our understanding of human nature Fosters skills in thinking about human nature and critical discussion of Darwin's arguments and those of his key commentators

Human Nature After Darwin Janet Radcliffe Richards, 2005-07-05 Human Nature After Darwin is an original investigation of the implications of Darwinism for our understanding of ourselves and our situation It casts new light on current Darwinian controversies also providing an introduction to philosophical reasoning and a range of philosophical problems Janet Radcliffe Richards claims that many current battles about Darwinism are based on mistaken assumptions about the implications of the rival views Her analysis of these implications provides a much needed guide to the fundamentals of Darwinism and the so called Darwin wars as well as providing a set of philosophical techniques relevant to wide areas of moral and political debate The lucid presentation makes the book an ideal introduction to both philosophy and Darwinism as well as a substantive contribution to topics of intense current controversy It will be of interest to students of philosophy science and the social sciences and critical thinking

The Evolution of Psychopathology Todd K. Shackelford, Virgil Zeigler-Hill, 2017-08-01 This review of recent evolutionary theories on psychopathology takes on controversies and contradictions both with established psychological thought and within the evolutionary field itself Opening with the ancestral origins of the familiar biopsychosocial model of psychological conditions the book traces distinctive biological and cultural pathways shaping human development and their critical impact on psychiatric and medical disorders Analyses of disparate phenomena such as jealousy social anxiety depressive symptoms and antisocial behavior describe adaptive functions that have far outlasted their usefulness or that require further study and perhaps new directions for treatment In addition the book's compelling explorations of violence greed addiction and suicide challenge us to revisit many of our assumptions regarding what it means to be human Included in the coverage Evolutionary foundations of psychiatric compared to non psychiatric disorders Evolutionary psychopathology uncomplicated depression and the distinction between normal and disordered sadness Depression is rumination really adaptive A CBT approach to coping with sexual betrayal and the green eyed monster Criminology's modern synthesis remaking the science of crime with Darwinian insight Anthro-pathology the abiding malady of the species With its wealth of interdisciplinary viewpoints The Evolution of Psychopathology makes an appropriate supplementary text for advanced graduate courses in the evolutionary sciences particularly in psychology biology anthropology sociology and philosophy

Media and Science-Religion Conflict Thomas Aechtner, 2020-01-22 This book examines why the religion science skirmishes known as the Evolution Wars have persisted into the 21st century It does so by considering the influences of mass media in relation to decision making research and the Elaboration Likelihood Model one of the most authoritative persuasion theories The book's analysis concentrates on the expression of cues or cognitive mental shortcuts in Darwin sceptic and

counter creationist broadcasts A multiyear collection of media generated by the most prominent Darwin sceptic organizations is surveyed along with rival publications from supporters of evolutionary theory described as the pro evolutionists The analysed materials include works produced by Young Earth Creationist and Intelligent Design media makers New Atheist pacesetters as well as both agnostic and religious supporters of evolution These cues are shown to function as subtle but effective means of shaping public opinion including appeals to expertise claims that ideas are being censored and the tactical use of statistics and technical jargon Contending that persuasive mass media is a decisive component of science religion controversies this book will be of keen interest to scholars of Religion Science and Religion interactions as well as researchers of Media and Communication Studies more generally

The Biology of Human Behavior Thomas Rowland, 2020-01-17 Why do human beings behave the way they do What governs how they act out their daily lives It is not difficult to provide the traditional argument that it s largely a matter of the culture in which we live a product of the influences of family peers teachers religious leaders the movies we see the books we read and so forth Such behavior often contradicts the independent nature of the human spirit demanding a certain compromise we depend on others for our needs and to obtain these we must behave accordingly Evidence grows however that in addition much of our behavior has its roots in biological processes Such information indicates that whether we like to accept it or not our conduct is often governed by biochemical agents within in the brain an expression of our animalistic ancestral past governed by our genetic inheritance and all beyond the level of our conscious decision making This book addresses a series of such behaviors love jealousy travel suicide etc and examines new found perspectives that speak to a biological component in explaining just why we behave as we do Certainly such scientific insights are limited and currently provide only a narrow insight into human behavior However this information clearly forecasts the coming of a greater appreciation that as members of the animal kingdom we remain biological beings as well as members of a cooperative society

Evolutionary and Interpretive Archaeologies Andrew Gardner, 2011-06 This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions

An Invitation to Anthropology Josep R. Llobera, 2003-10-01 Synthesizing British French and American traditions this stimulating and accessible text presents a comprehensive and fascinating introduction to social and cultural anthropology It offers an original approach through integrating knowledge produced from a variety of perspectives placing cultural and social anthropology in a wider context including macro

sociological concepts and reference to biological evolution Written in a clear and concise style it conveys to the student the complexities of a discipline focusing on the structure evolution and cultural identity of human societies up to the present day The text consists of four major parts the scope and method of anthropology a conceptual and institutional overview the evolution of the structure of human societies and the cultural politics of race ethnicity nationalism and multiculturalism

The Universal Mind Xiphias Press,2016-09-01 The Universal Mind The Evolution of Machine Intelligence and Human Psychology There is the perception of being totally omniscient where one has access to all knowledge having a complete understanding of everything There is also the perception of being totally One with the Universe One with Nature or the Universal Mind During this time one is also experiencing the feeling of total love acceptance and peace This book examines the relationship of mind as intelligence and consciousness to matter energy and space time The concepts of Universal Mind or Collective Unconsciousness are discussed and related to physical phenomena such as the holographic distribution of information throughout all of space and the universe From the paintings of Salvador Dal to Carl Jung s Archetypes and his Red Book and how they describe our collective subconscious to Machine Learning and Whole Genome Sequencing The Universal Mind explores the collective world consciousness super intelligence machine intelligence and the practical applications in engineering medicine law and politics 537 Pages Tags Philosophy Computer Science Collective Consciousness Artificial Intelligence Technological Singularity Analytical Psychology What We Are: The Evolutionary Roots of Our Future Lonnie Aarssen,2022-07-05 Other animals are driven to spend essentially their whole lives just trying to get fed stay alive and get laid That s about it The same was true for our proto human ancestors And modern humans of course also require a Survival Drive and a Sex Drive in order to leave descendants But today we spend most of our lives mainly just trying to convince ourselves that our existence is not absurd In What We Are Queen s University biologist Lonnie Aarssen traces how our biocultural evolution has shaped Homo sapiens into the only creature that refuses to be what it is the only creature preoccupied with a deeply ingrained and absurd sentiment I have a distinct mental life an inner self that exists separately and apart from material life and so unlike the latter need not come to an end This delusion conceivably gave our distant ancestors some wishful thinking for finding some measure of relief from the terrifying uniquely human knowledge of the eventual loss of corporeal survival But this came with an impulsive nagging doubt an obsessive underlying uncertainty self impermanence anxiety Biocultural evolution however was not finished It also gave us two additional uniquely human primal drives both serving to help quell the burden of this anxiety Legacy Drive generates delusional cultural domains for extension of self and Leisure Drive generates pleasurable cultural domains for distraction escape from self Legacy Drive and Leisure Drive Aarssen argues represent two of the most profound consequences of human cognitive and cultural evolution What We Are advances propositions regarding how a visceral susceptibility to self impermanence anxiety has paradoxically played a pivotal role in rewarding the reproductive success of our ancestors and has thus been a driving force in shaping

fundamental motivations and cultural norms of modern humans More than any other milestone in the evolution of human minds self impermanence anxiety and its mitigating Drives for Legacy and Leisure account for not just the advance of civilization over the past many thousands of years but also now its impending collapse Effective management of this crisis Aarssen insists will require a deeper and more broadly public understanding of its Darwinian evolutionary roots as laid out in *What We Are* ***Intellectual Freedom and the Culture Wars*** Piers Benn,2020-10-10 This book offers a sustained and vigorous defence of free expression and objective enquiry situated in the context of the current culture wars In the spirit of J S Mill Benn investigates objections to the ideal of free expression in relation to harm and offence reaching broadly liberal conclusions with reference to recent examples of attempts to curb free speech on university campuses Accepting that some expressions can cause non physical harm Benn also considers objections to free speech based on certain understandings of power and privilege In its exploration and rejection of arguments against the possibility of obtaining objective truth the book navigates hotly contested fields of contemporary debate including feminism and identity politics It challenges the dogma of social constructionism and examines current notions of identity arguing that a case for fairness can be made without appealing to them Offering a qualified endorsement of friendship between ideological opponents Benn highlights common obstacles to civil and rational discussions concluding with a rational moral and broadly spiritual solution to the cultural combat that monopolises present day society ***The Earth Is Our Home*** Nelson Rivera,2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views ***Evolution , Why Lyrics Last*** Brian Boyd,2012-04-05 *Why Lyrics Last* turns an evolutionary lens on lyric verse placing the writing of verse within the human disposition to play with pattern Boyd takes as an extended example the many patterns to be found within Shakespeare s Sonnets There the Bard avoids all narrative and demonstrates the power that verse can have when liberated of story

Reading Edith Wharton Through a Darwinian Lens Judith P. Saunders,2014-01-10 Beneath the polished surface of the genteel environments delineated in Wharton s fiction characters are competing fiercely for desirable mates questing for

social status and resources and plotting ruthlessly to advance their relatives fortunes in life This book identifies these and other evolutionary issues central to her fiction demonstrating their significance in terms of character setting plot and theme Connections to existing Wharton criticism are made throughout the book so that readers can see how an evolutionary perspective enriches refutes or reconfigures insights derived from other critical approaches

Rousseau on Language and Writing Barry Stocker, John Bolender, 2014-05-12 Two contemporary philosophers take two very different approaches to Jean Jacques Rousseau s Essay on the Origin of Languages and then each reflects upon the approach of the other Barry Stocker takes a deconstructionist approach discussing the importance of Rousseau in the work of Jacques Derrida John Bolender approaches Rousseau s Essay in terms of cognitive science most especially in light of the theories of Noam Chomsky and Alan Page Fiske Both authors agree that Rousseau s Essay still has much to teach us

The Evolution of Institutional Economics Geoffrey M Hodgson, 2004-03-04 This exciting new book from Geoffrey Hodgson is eagerly awaited by social scientists from many different backgrounds This book charts the rise fall and renewal of institutional economics in the critical analytical and readable style that Hodgson s fans have come to know and love and that a new generation of readers will surely come to appreciate

The Artful Species Stephen Davies, 2012-11-29 Explores the idea that our aesthetic responses and art behaviors are connected to our evolved human nature reaching back hundreds of thousands of years to our humanoid ancestors Examines human aesthetic interest in animals decouples human beauty from mate selection and weighs the arts as biological social or mixed adaptations

Reason, Virtue and Psychotherapy Antonia Macaro, 2006-06-14 In recent years philosophy has become increasingly popular as an alternative source of inspiration in helping people to lead a good life Ancient Greek philosophy in particular was conceived as a practical endeavour intended to have an impact on how people lived This book loosely organised around the structure of Aristotle s Nicomachean Ethics draws on Aristotle s ideas about virtue and on contemporary virtue ethics to create a framework that can be used by psychotherapists and counsellors in helping their clients or themselves to live flourishing lives It provides a clear discussion of Aristotle s key ideas about virtue and the good life and places these within the context of other philosophical and psychological theories both ancient and contemporary It goes on to address the practical relevance of these ideas to the everyday work of the therapist providing suggestions for practice and a number of useful exercises These will be particularly helpful for practitioners working with issues such as finding value and meaning in life making difficult decisions developing helpful character traits managing disruptive emotions and increasing self control Reason Virtue and Psychotherapy bridges the gap between academic philosophy and real life It will be of interest to practising counsellors and psychotherapists as well as students and trainees in these areas Since it is written in a clear jargon free style it is also appropriate for all those who are curious about how ancient understandings can improve their life

Ecological Public Health Geof Rayner, Tim Lang, 2013-06-19 What is public health To some it is about drains water food and housing all requiring engineering and

expert management To others it is the State using medicine or health education and tackling unhealthy lifestyles This book argues that public health thinking needs an overhaul a return to and modernisation around ecological principles Ecological Public Health thinking outlined here fits the twenty first century s challenges It integrates what the authors call the four dimensions of existence the material biological social and cultural aspects of life Public health becomes the task of transforming the relationship between people their circumstances and the biological world of nature and bodies For Geof Rayner and Tim Lang this is about facing a number of long term transitions some well recognized others not These transitions are Demographic Epidemiological Urban Energy Economic Nutrition Biological Cultural and Democracy itself The authors argue that identifying large scale transitions such as these refocuses public health actions onto the conditions on which human and eco systems health interact Making their case Rayner and Lang map past confusions in public health images definitions and models This is an optimistic book arguing public health can be rescued from its current dilemmas and frustrations This century s agenda is unavoidably complex however and requires stronger and more daring combinations of interdisciplinary work movements and professions locally nationally and globally Outlining these in the concluding section the book charts a positive and reinvigorated institutional purpose

Creation Stories in Dialogue: The Bible, Science, and Folk Traditions Jan G. van der Watt, R. Alan Culpepper, 2015-11-02 This book is about creation stories in dialogue not only between different religious views but also between current day scientific perspectives International specialists like Alan Culpepper David Christian John Haught Randall Zachman Ellen van Wolde from various disciplines are reflecting on the interface between science and religion relating questions of creation and origin This multi disciplinary discussion by some of the leading exponents in this field makes the book unique not only in its depth of discussion but also in its wide ranging interdisciplinary discussion The point of departure of all the contributions is the prestige lecture by Alan Culpepper where he argues for bringing Biblical material into discussion with modern scientific insights relating to creation and origin
