Human Rights And Development:

Human Rights and Development C. Raj Kumar, D. K. Srivastava, 2006 **Human Rights Indicators in Development** Siobhan McInerney-Lankford, Hans-Otto Sano, 2010-10-26 Human rights indicators are central to the application of human rights standards in context and relate essentially to measuring human rights realization both qualitatively and quantitatively. They offer an empirical or evidence based dimension to the normative content of human rights legal obligations and provide means of connecting those obligations with empirical data and evidence and in this way relate to human rights accountability and the enforcement of human rights obligations. Human rights indicators are important both for assessment and diagnostic purposes. The assessment function of human rights indicators relates to their use in monitoring accountability effectiveness and impact while the diagnostic purposes relates to measuring the current state of human rights implementation and enjoyment in a given context whether regional country specific or local. This paper offers a preliminary review of the foregoing in the development context and a general perspective on the significance of human rights indicators for development processes and outcomes. It is not intended to be prescriptive and does not provide specific operational recommendations on the use of human rights indicators in development projects. Nor does it advocate a particular approach or mode of integrating human rights in development or argue for a rights based approach to development. This paper is designed to provide development practitioners with a preliminary view on the possible relevance design and use of human rights indicators in development policy and practice. It also introduces a basic conceptual framework about the relationship between rights and development including in the World Bank context and surveys a range of methodological approaches on human rights measurement exploring in general terms different types of human rights indicators and their potential implications for development at three different levels of convergence or integration. **Human Rights, Development and Decolonization** D. Maul, 2012-01-27 An innovative diplomatic and intellectual history of decolonization post colonial nation building and international human rights and development discourses. This study of the role of the ILO during 1940-70 opens up new perspectives on the significance of international organisations as actors in the history of the 20th century. **China's Path of Human Rights Development** Huawen Liu, 2021-12-16 This book focuses on China's evolution in the field of human rights protection highlighting its achievements in various systems of human rights protection as well as its role in international human rights governance and the healthy development of human rights. From the perspective of China's human rights protection starting with various types of citizens e.g. women children and the disabled the book analyzes and discusses the changes and major events in the country's human rights development path one by one while also explaining the Chinese stance on human rights development. China is becoming more active in the international human rights cooperation field playing its unique and constructive role and serving as the participant builder and contributor of the international human rights governance. Right to Development and Illicit Financial Flows from Africa Serges Djoyou Kamga, Gerard Emmanuel Kamdem Kamga, Arnold Kwesiga, 2024-02-15 Gerard Emmanuel Kamdem Kamga Serges Djoyou Kamga and Arnold Kwesiga explore a relatively new phenomenon namely referred to as illicit financial flows that aim to impoverish the African continent and prevent its economic development There is a direct relationship between illicit financial flows and failed initiatives to realize the right to development on the continent For instance in 2016 Africa received 41 billion towards public development while 50 billion left the continent through illicit financial flows The gap between recent economic achievements on the continent and its state of generalized underdevelopment coupled with rampant poverty corruption prolonged economic crisis and political instabilities signals an issue with resource allocations The systematic theft of resources by multinational corporations and criminal networks is a hard blow to the idea of people driven development in line with the Pan African vision of an integrated prosperous and peaceful Africa proclaimed by Agenda 2063

Right to Development and Illicit Financial Flows from Africa Dynamics Perspectives and Prospects provides insights into the dynamics and perspectives on illicit financial flows and its dire impacts on the right to development and development initiatives across the continent

Insights into Policies and Practices on the Right to Development Carol Chi Ngang, Serges Djoyou Kamga, 2020-10-06 As the world continues to grapple with a range of practical development challenges that are directly linked to livelihood concerns about human well being and declining living standards often overlooked is the human right to development which remains largely unfulfilled In the face of successive global initiatives seeking to remedy these challenges it has become urgent to ask what the universal recognition of the right to development implies if it cannot be translated into improved well being for impoverished peoples around the world The contributors in this timely volume argue that setbacks to development are deeply rooted in the failure to implement the right to development which by nature guarantees equality of opportunities and equitable redistribution of the resources that contribute to better living standards Assessing policy and practical measures or the lack thereof they offer practical suggestions for implementation that will make the right to development a reality for everyone

Satya P. Kanan, 2006 **Democracy and Development** R.C. Bhardwaj, K. Vijayakrishnan, 2018-10-26 Published in 1998 The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development Allies or Adversaries with the Wilton Park an international agency of the British Commonwealth and Foreign Office in Wilton House West Sussex United Kingdom The week long conference brought together parliamentarians diplomats administrators political scientists economists and specialists from all over the world The participants shared their views and experiences on diverse aspects of the main theme This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter **Human Rights of Minority and Women's: Women and human rights development** Indrani Sen Gupta, **The Right to Development** Centre for Development and Human Rights, 2004-05-25 The Right to Development RTD a concept that emerged in the 1970s is one of the most debated and contentious issues in international relations RTD builds on the rights based approach to development seeking to integrate the norms and principles of human rights with policies and plans to promote development Despite its importance for the world's poor and dispossessed a great deal of definitional confusion still surrounds the concept This primer introduces the concept of RTD as well as discusses its practical application in the Indian setting It is divided accordingly into two sections the first of which traces the origins and the evolution of the idea of RTD This section identifies the defining parameters and content of RTD and focuses especially on the three rights the rights to food education and health that have been identified as a good starting point for the implementation of RTD The last chapter in this section underscores the importance of women's rights in order to emphasise the need to focus on safeguarding and promoting the human rights of vulnerable groups Part II covers substantially the Indian situation relating to RTD The first chapter in this section provides an overview of the legal and institutional mechanism in India for the protection of human rights in general and women's rights in particular The next chapter examines the implementation of the rights to food health and education The last chapter in this section details the functioning of Public Interest Litigation PIL
