Human Evolutionary Biology Human Anatomy And Physiology From An Evolutionary Perspective:

Human Evolutionary Biology Arndt Von Hippel,1994 *Evolution in an Anthropological View* C. Loring Brace,2000
Brace has reworked ten of the many articles he has published on human evolution over the past 40 years and assembled them into a statement on evolutionary anthropology He begins by investigating which anthropological data can benefit from an evolutionary perspective and which cannot Then he explores such topics as Darwinism race cladistics phylogeny Neanderthals dentition and cultural ecology Annotation copyrighted by Book News Inc Portland OR *Human Evolutionary Biology* Michael P. Muehlenbein,2010-07-29 Wide ranging and inclusive this text provides an invaluable review of an expansive selection of topics in human evolution variation and adaptability for professionals and students in biological anthropology evolutionary biology medical sciences and psychology The chapters are organized around four broad themes with sections devoted to phenotypic and genetic variation within and between human populations reproductive physiology and behavior growth and development and human health from evolutionary and ecological perspectives An introductory section provides readers with the historical theoretical and methodological foundations needed to understand the more complex ideas presented later Two hundred discussion questions provide starting points for class debate and assignments to test student understanding **The Evolutionary Biology of Human Body Fatness** Jonathan C. Ray, 2013 This book brings together current perspectives concerning the manner in which human mind behavior and experience evolved In addition to the traditional psychological literature it draws from work in the cognitive and affective neurosciences ethology and genetics The focus will be on a unification and integration of evolutionary understandings within a broader consideration The Art and Science of Aging Well Mark E. Williams M.D., 2016-06-22 In the past century average life expectancies have nearly doubled and today for the first time in human history many people have a realistic chance of living to eighty or beyond As life expectancy increases Americans need accurate scientifically grounded information so that they can take full responsibility for their own later years In *The Art and Science of Aging Well* Mark E Williams M D discusses the remarkable advances that medical science has made in the field of aging and the steps that people may take to enhance their lives as they age Through his own observations and by use of the most current medical research Williams offers practical advice to help aging readers and those who care for them enjoy personal growth and approach aging with optimism and even joy *The Art and Science of Aging Well* gives a realistic portrait of how aging occurs

and provides important advice for self improvement and philosophical spiritual and conscious evolution Williams argues that we have considerable choice in determining the quality of our own old age Refuting the perspective of aging that insists that personal social economic and health care declines are persistent and inevitable he takes a more holistic approach revealing the multiple facets of old age Williams provides the resources for a happy and productive later life *The Story of the Human Body* Daniel E. Lieberman,2013-10-01 In this landmark book of popular science Daniel E Lieberman chair of the department of human evolutionary biology at Harvard University and a leader in the field gives us a lucid and engaging account of how the human body evolved over millions of years even as it shows how the increasing disparity between the jumble of adaptations in our Stone Age bodies and advancements in the modern world is occasioning this paradox greater longevity but increased chronic disease The Story of the Human Body brilliantly illuminates as never before the major transformations that contributed key adaptations to the body the rise of bipedalism the shift to a non fruit based diet the advent of hunting and gathering leading to our superlative endurance athleticism the development of a very large brain and the incipience of cultural proficiencies Lieberman also elucidates how cultural evolution differs from biological evolution and how our bodies were further transformed during the Agricultural and Industrial Revolutions While these ongoing changes have brought about many benefits they have also created conditions to which our bodies are not entirely adapted Lieberman argues resulting in the growing incidence of obesity and new but avoidable diseases such as type 2 diabetes Lieberman proposes that many of these chronic illnesses persist and in some cases are intensifying because of dysevolution a pernicious dynamic whereby only the symptoms rather than the causes of these maladies are treated And finally provocatively he advocates the use of evolutionary information to help nudge push and sometimes even compel us to create a more salubrious environment With charts and line drawings throughout **Cultural Anthropology** Mr. Rohit Manglik,2024-03-08

Evolutionary Forensic Psychology Joshua Duntley, Todd K. Shackelford, 2008-08-20 The field of forensic psychology explores the intersection of psychology and the law The purpose of this book is to examine topics in the field using the powerful multidisciplinary conceptually integrated approach that the natural sciences have embraced for decades with great success Darwin's theory of evolution by natural selection is the meta theoretical framework that unifies the field of biology It unites research and understanding of the development control and organization of behavior The study of humans which includes all of the social sciences is part of the field of biology Darwin's theory provides a powerful meta theoretical framework that can unify and energize forensic psychology just as it has the biological sciences Evolutionary processes undoubtedly shaped physiological characteristics to help solve problems of survival and reproduction The lungs for example with their vast surface area and moist membranes are marvelous adaptations for extracting oxygen and releasing carbon dioxide Natural selection is the only known process capable of shaping complex functional mechanisms Just as it shaped physiological adaptations with specific problem solving functions it also shaped our thoughts and emotions to guide behaviors toward solving recurrent problems of survival and reproduction With this logic we can use knowledge of ancestral problems to guide our understanding of how the mind works Evolutionary Forensic Psychology is a necessary step toward a unified and complete understanding of psychology and the law It recognizes that crimes such as murder non lethal violence rape and theft are manifestations of evolutionarily recurrent selection when they gave individuals an advantage in competition for resources Each of the chapters that comprise this volume has been selected to provide the first unified examination of important research contributions and future directions of Evolutionary Forensic Psychology

Globalization Brian Spooner, 2015-03-27 Throughout human history the rate of world population growth overall has been outpaced by the rate of urban population growth Right now more the half the world's population lives in cities and that proportion will only increase in the next fifty years Rapid urban growth accelerates the exchange of ideas the expansion of social networks and the diversity of human interactions that accompany globalization The present century is therefore the crucial phase when the world's increasing interconnectedness may give rise to innovation and collaboration or intensify conflict and environmental disaster Bringing together scholars of anthropology and social science as well as law and medicine Globalization The Crucial Phase presents a holistic and comprehensive understanding of

the way the world is changing The contributors reveal the changing scale of social economic and financial diversity examine the impact of globalization on the environment health and nutrition and consider the initiatives to address the social problems and opportunities that arise from global migration Collectively these diverse interdisciplinary perspectives provide an introduction to vital research and policy initiatives in a period that will bring great challenges but also great potential Contributors Nancy Biller Christina Catanese Robert J Collins Megan Doherty Zhengxia Dou Richard J Estes James Ferguson David Galligan Mauro Guill n Cameron Hu John D Keenan Alan Kelly Janet M Monge Marjorie Muecke Neal Nathanson Sarah Paoletti Adriana Petryna Alan Ruby Theodore G Schurr Brian Spooner Joseph S Sun Zhiguo Wu Huiquan Zhou **Basics in**

Convergent Evolution in Stone-Tool Technology Michael J. O'Brien, Briggs Buchanan, Metin I. Eren, 2024-05-21 Scholars from a variety of disciplines consider cases of convergence in lithic technology when functional or developmental constraints result in similar forms in independent lineages Hominins began using stone tools at least 2.6 million years ago perhaps even 3.4 million years ago Given the nearly ubiquitous use of stone tools by humans and their ancestors the study of lithic technology offers an important line of inquiry into questions of evolution and behavior This book examines convergence in stone tool making cases in which functional or developmental constraints result in similar forms in independent lineages Identifying examples of convergence and distinguishing convergence from divergence refutes hypotheses that suggest physical or cultural connection between far flung prehistoric toolmakers Employing phylogenetic analysis and stone tool replication the contributors show that similarity of tools can be caused by such common constraints as the fracture properties of stone or adaptive challenges rather than such unlikely phenomena as migration of toolmakers over an Arctic ice shelf Contributors R Alexander Bentley Briggs Buchanan Marcelo Cardillo Mathieu Charbonneau Judith Charlin Chris Clarkson Loren G Davis Metin I Eren Peter Hiscock Thomas A Jennings Steven L Kuhn Daniel E Lieberman George R McGhee Alex Mackay Michael J O'Brien Charlotte D Pevny Ceri Shipton Ashley M Smallwood Heather Smith Jayne Wilkins Samuel C Willis Nicolas Zayns
