

MANUAL OF POLICIES AND PROCEDURES OF INFECTION CONTROL OF HOSPITAL CHANGKAT MELINTANG

- To wipe excess liquid that may accidentally splash, an absorbent cloth or paper towels should be used.

NOTE: If glass is involved, do not attempt to clean spill by hand. Tweezers, needle holder or another instrument should be used to pick up glass prior to cleaning

Environmental surfaces should be decontaminated with a 1:10 solution of 5.25% sodium hypochlorite in water .

NOTE: These disinfectants are highly caustic unless properly diluted. In addition, disinfectant solution is intended for use on environmental surfaces only, since it can damage instruments and equipment and skin damage.

When there are large spills of cultured or concentrated infectious agents, such as in the clinical laboratory setting, the contaminated area should first be flooded with a liquid disinfectant then physically cleaned and decontaminated with a hospital approved disinfectant. Gloves, gowns, masks, and safety glasses should be worn for cleaning large spills of blood or body fluids.

13.4 Decontamination of Patient Clothing and Personal Belongings:

Patient clothing and personal belongings that become contaminated by blood or body substances should be handled according to the following procedures.

13.4.1 Clothing

Clothing soiled by blood or body substances should be placed in a tightly sealed plastic bag at the patient's bedside and given to the family for home laundering. The family should be instructed to wash the clothing by machine, using a laundry detergent. Hot water and chlorine bleach should also be used unless these agents will damage the items. The plastic bag used to contain the clothing during its transport should be placed in a second plastic bag, tightly sealed, and discarded in the household trash. Persons involved in the handling of contaminated clothing should be instructed to wash their hands thoroughly after handling the items.

13.4.2 Personal Belongings

- Disinfect hard surfaces by wiping the items using a 1:10 solution of 5.25% sodium hypochlorite in water (1 part chlorine bleach to 9 parts water).
- Disposable articles, such as magazines, that are contaminated by blood or body substances should be disposed of according to the hospital's regulated and non-regulated waste policy.

13.5 Linen Handling
