Experts say the people in that area spoke a language called Proto-Indo-European. That language is no longer spoken. Researchers do not really know what it sounded like.

Yet, Proto-Indo-European is believed to be the ancestor of most European languages. These include the languages that became ancient Greek, ancient German and the ancient Latin.

A study of interviews and speeches Aykut Sahingöz, 2020-05-06 Bachelor Thesis from the year 2019 in the subject Speech Science Linguistics grade 2.7 University of Vechta language English abstract The linguistic differences between German and English are going to be researched and compared in order to light upon the reasons for mispronunciations and difficulties for German speakers of English Learning a language or a skill in general naturally needs practice and commitment to be able to master it However this text is going to leave this aspect aside and will concentrate on differences which emerge from the languages themselves German and English are two different languages with the same Latin alphabet and different grammar for the naked eye but beneath the surface are further differences and similarities which can be described in order to understand why German speakers of English seem to produce the same mistakes when no practice for correct pronunciation is given The importance of English has increased over the past years and is one of the most spoken and important languages It is needed in business relations to read manuals can be used in almost all foreign countries for communication and is generally important for every working citizen in terms of a business language as former European Commissioner G nther Oettinger stated in his interview with German broadcast channel SWR in 2005 In 2010 a speech of Oettinger was published which was held in the Columbia University of Berlin and showed after his contribution in the broadcast that his English proficiency was not appropriate when considering the circumstances Especially in terms of politics an individual wants to be taken seriously and act superior in all tasks given to comply with the

role of a representative politician After Oettinger held his speech it was naturally connected to what was originally said by him with the obvious connotation that he failed to meet his own expectations in English acquisition by far although it was of utmost importance The English language however can be difficult for foreign speakers Although being of the same Germanic origin as German many foreign speakers experience a hard time when trying to achieve native like pronunciation Words such as squirrel all words with a th and minimal pairs e g hat and had are often difficult to pronounce and distinguish for foreign learners due to phonetic and phonemic differences which cannot easily be translated into the German system due to their non existence

from the year 2007 in the subject English Language and Literature Studies Culture and Applied Geography grade 2 0 Martin Luther University Institut f r Anglistik und Amerikanistik course English Rules the World The Globalisation of English language English abstract The role of the English language among all other languages is constantly examined researched and written about It appears that no other language has ever had such an amazing and massive impact on other cultures languages and world history Statements like English is today a truly global language Rubdy 2006 5 and World English exists as a political and cultural reality Crystal 2003b xii underpin the notion of the possibility of a language that connects all people a notion and perhaps also a wish that is almost as old as mankind This paper will investigate the question of what defines a language as a global one and what factors are convincing or definite David Crystal s explanation makes it quite obvious A language achieves a genuinely global status when it develops a special role that is recognized in every country Crystal 2003b 3 However he himself admits that this is not precise enough a special role can mean many things The concept usually refers to political aspects like for example the status of the language of the state defined by law or the language being the only one in some states for historical reasons cf Crystal 2003b 66 But in all cases it can be argued the population is living in an environment in which the English language is routinely in evidence publicly accessible in varying degrees and part of the nation s recent or present identity Crystal 2003b 66 It also has to be clarified what processes can lead to a global status of a language and if so called na ve theories hold true For the purpose of examining this question further the concept of the lingua franca and the role of English as such will also be looked at Talking about English and its world influence it is inevitable to consider the roles and history of Britain and the United States In order to make the attempt of getting more precise numbers of speakers will be shown and it will be explained how these numbers came about and what they mean As obvious as it may seem English is dominant in so many spheres that it appears impossible to account for all of them thoroughly However the most significant domains will be explained as such in order to draw a connection between history present and future
