Anscombe's Moral Philosophy Duncan Richter, 2010-11-19 G E M Anscombe 1919-2001 was one of the most important outspoken and misunderstood philosophers of the twentieth century More than anyone else she revived virtue ethics and the philosophy of action She was also almost alone in publicly opposing Oxford University's decision to award an honorary degree to President Truman She regarded his decision to authorize bombing Hiroshima and Nagasaki as murderous Some liberals admire her for this stand but conservatives also admire her for her opposition to abortion contraception and same sex marriage Clearly her values were not those of her times This led her to reflect on the differences producing such works as *Modern Moral Philosophy* in which she rejected all modern theories of ethics In this paper she coins the term consequentialism to describe the dominant view which she rejects that what matters morally is the results of what one does Put crudely the ends can justify the means If enough lives can be saved by targeting civilians then civilians should be targeted Against this Anscombe insisted that certain actions are forbidden which prompted her interest in the nature of action and its relation to a person's character Whether one agrees with her or not these are all issues that continue to be relevant and on which Anscombe's views are always strong and intelligently defended Her presentation of these views unfortunately is often dense and they are often badly misunderstood even by some very able minds Anscombe's *Moral Philosophy* clarifies what Anscombe thought about ethics showing how her different ideas connect and how she supported them It also evaluates her reasoning showing that it is stronger in some parts than in others The five main chapters of the book deal in turn with her work on military ethics including the so called doctrine of double effect her rejection of consequentialism her attack on the modern atheist notion of moral obligation her analysis of intention and its relevance for ethics and

The Quality of Life Richard Kraut, 2018-08-23 *The Quality of Life* Aristotle Revised presents a philosophical theory about the constituents of human well being The principal idea is that what Aristotle calls external goods wealth reputation power have at most an indirect bearing on the quality of our lives Starting with Aristotle's thoughts about this topic Kraut increasingly modifies and occasionally rejects that stance He argues that the way in which we experience the world is what well being consists in A good internal life comprises in part pleasure but far more valuable is the quality of our emotional intellectual social and perceptual experiences These offer the potential for a richer and deeper quality of life than that which is available to many other animals A good human life is immeasurably better than that of a simple creature that feels only the pleasures of nourishment even if it felt pleasure for millions of years human life would be superior In opposition to contemporary discussions of well being which often appeal to a thought experiment devised by Robert Nozick Kraut concludes that the quality of our lives consists entirely in the quality of our experiences While others hold that we must live in the real world to live well and that one's interior life has little or no value on its own Kraut's interpretation of this thought
