How Big Is Allah Arabic Edition:

New Researches on the Quran: Why and How Two Versions of Islam Entered the History of Mankind Dr. Seyed Mostafa Azmayesh, 2015 This book focuses on the time before the Quran and the emergence of Islam The research delves into the origin of the Quran using its verses alongside investigative works which support various new theories The Quran is a written document which according to recent discoveries such as the recently discovered world's oldest Quran manuscript at the University of Birmingham can be traced to the lifetime of Prophet Mohammad It focuses on the time preceding Islam and highlights the relationships that are pivotal for understanding the development of Islam The danger posed by false interpretations of the Quran has become increasingly more serious from first appearance of Islam until today the result of which we can see clearly in our current world Hence the Quran itself is the most important document to be researched and studied for resolving the problems caused by its false interpretation Tales from the Arabic of the Breslau and Calcutta (1814-18) Editions of the Book of the Thousand Nights and One Night Not Occurring in the Other Printed Texts of the Work, 1884 Three Testaments Brian A. Brown, 2014-01-02 From disagreement over an Islamic Center in New York to clashes between Christians and Muslims in Egypt tension between the three Abrahamic faiths often runs high Yet for all their differences these three traditions Judaism Islam and Christianity share much in common Three Testaments brings together for the first time the text of the Torah the New Testament and the Quran so that readers can explore for themselves the connections as well as the points of departure between the three faiths Notable religion scholars provide accessible introductions to each tradition and commentary from editor Brian Arthur Brown explores how the three faiths may draw similarities from the ancient Zoroastrian tradition This powerful book provides a much needed interfaith perspective on key sacred texts Sonallah Ibrahim Paul Starkey, 2016-06-02 This book provides an introduction not only to the works of Sun Allah Ibrahim but also more generally to the modern literature of Egypt and elsewhere in the Arab world over a 40 year period in its social historical and political setting *The Arabs and the Stars* Paul Kunitzsch, 2017-05-15 The influence of Arabic Islamic science on European astronomy is still evident in the number of terms and star names which derive from the Arabic These articles examine what the Arabs and other peoples of the Islamic world knew about the fixed stars and the constellations and the astrological traditions they associated with them Professor Kunitzsch shows how the early folk astronomy of the Arabs was radically altered without being swept away by the discovery of ancient Greek also Indian and Persian sources by far the most important of these was the Almagest of Ptolemy This knowledge was then transmitted to medieval Europe to Byzantium and especially to Spain as the articles go on to describe and was a vital factor in stimulating the development of scientific thought in the West *Al-Fatihah* Dr. Shihab M. A. Ghanem Al Hashmi, 2016-05-23 Al Fatihah is the first and opening chapter in the Holy Quran and in many ways it represents the essence of this holy book itself In this opening sura of the Quran used in every mandatory and voluntary prayer in Islam the one and only God Allah summarizes in
